Need For Substitute Methods Of Heating Indicated By Ice Storm

By FRANK REAMS
County Ext. Chairman

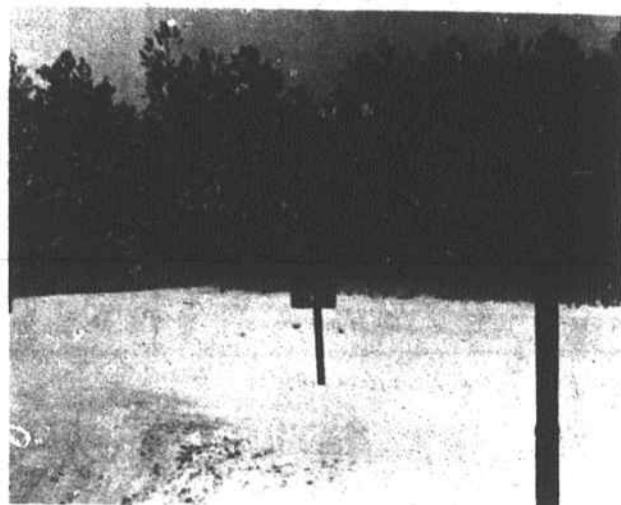

COMING EVENTS

- March 6-Inez Community Club meets - 7:30 p. m.
- March 6-10: DHIA Supervisor's Training Course, N. C. State University.
- March 7: Tobacco Association, Raleigh.
- March 8-10: Tobacco Trade Fair, Raynor and Forbes Warehouse, Greenville, N. C. (Suggest people in communities arrange car pools).
- March 13-17: Artificial Breeding Technician's Training course, N. C. State University.

Snow And Ice

The recent 11 inch snow shown in the pictures taken on US #1 and US #158 was short lived and slowed things up a little but the recent sleet was a humdinger and one of the worst on record. As far as can be determined, everyone in Warren County was without electric and/or telephone service from a few hours to several days. There is no doubt about it - some people actually suffered and/or put to great inconvenience attempting to find substitute or supplemental sources of heat and cooking facilities. All of this focuses attention on the fact that we should consider some minimum substitute methods of heating and cooking during emergencies. This would also become handy in Civil Defense preparedness, severe storms and national emergencies, etc.

Based on comments here and there, almost 100% of the damage was caused by trees

and limbs falling on wires. A tour of the county indicated that the damage was heavy in the southern area of the county but was progressively worst toward the Virginia line. It is difficult to determine the financial damage but it was

heavy. There is a strong feeling developing that the power and telephone companies should be given more authority and encouragement in clearing the light-of-ways to eliminate or decrease falling objects on the wires. Trees are beauti-

N. Warren Honor Rolls Released

A and B elementary and high school honor rolls at North Warren High Schools were released this week by Principal G. H. Washington, who said that the listed students have achieved a successful academic record at 93 and above to make the A honor roll and 86 and above to make the B honor roll. The list follows:

- Elementary A honor roll: Grade 4: Evert Howard, Ruth Merchant, Venicia Moss. Agricultural Extension Agent Soybeans

Soybeans are sold and consumed in many different countries, and they are used in many different ways.

We export nearly half of our soybeans in one form or another. Exports are in three principal forms—the whole beans, soybean oil and soybean meal.

In Japan and other oriental countries the whole beans are made into highly nutritious foods. But most of the beans that are produced in the United States are crushed and processed to obtain two products—oil and a high-protein meal. A bushel of beans, 60 pounds, usually yields about 10.8 pounds of oil and 47.5 pounds of meal. The oil typically makes up about 40 percent of the value of the products while the meal provides 60 percent.

The oil is used principally for making salad and cooking oils, frying and baking fats (shortening), and margarine. It competes with lard, butter, cottonseed, oil, edible tallow, peanut oil, corn oil, and other edible fats and oils.

The meal is used for feed for all kinds of livestock and poultry. It provides high-quality protein to balance rations that are made up largely of corn and other high-energy feeds.

Soybean products are used in the production and preparation of most of the foods that appear on our tables morning, noon and night.

In discussing the world food needs, it is predicted that the United States will feed half of the world in 20 years. Soybeans will play a great part in this area because of its diversity.

Flowers To Demonstrate Grasses And Lawn Care At Meeting Of Federation Clubs At Charlotte

A beautiful lawn is not a freak of nature but a product of knowledge and work, says T. W. Flowers, extension horticultural specialist at A. and T. College in Greensboro, and consultant for the Federation of Garden Clubs.

In cooperation with the Federation of Garden Clubs he will present an educational exhibit showing eight kinds of grasses that will grow well in any kind of geographical situation in North Carolina. The exhibit will be part of the Southeast-

ern Flower and Garden Show at the Charlotte Merchandise Mart March 4-12.

Information concerning the show was released here Tuesday by Mrs. E. M. Brown of Warrenton who is state president of the Federation of Garden Clubs of North Carolina.

"A well-kept lawn is a beautiful sight," said Flowers, "and it can last the year-around. It creates a setting for a house that cannot be had in any other way."

The exhibit will consist of eight strips of grass, each 1 1/2 X 5 feet. Four will display warm season grasses, Bermuda, Zoysia, Centipede and Carpet. The others will feature grasses that thrive well in the cool season, including Tall Fescue, Kentucky 31, Kentucky Bluegrass and Red Fescue. Plots will be separated by white gravel.

The Federation of Garden Clubs will have educational material on cultivation requirements for various grasses. These will show which types grow well in the shade, drought tolerance and other factors important to a good lawn.

There will be 18 landscaped gardens a colorful picture of springtime at its prettiest. Members of the Carolinas chapter, American Institute of Interior Design will present 24 lovely room settings. The Charlotte Council of Garden Clubs will hold three consecutive standard spring shows, and The Garden Club of North Carolina will have a nature lovers map of the state. The show is sponsored by The Charlotte Observer for benefit of Observer Charities.

Four State officers of the Federation of Garden Clubs of N. C. are members of the local Town 'N' Country Garden Club. Mrs. E. M. Brown is State President; Mrs. M. A. Cooper, Corresponding Secretary; Mrs. S. H. Brown, Recording Secretary and Mrs.

C. H. Hawkins is State Program Chairman. Mrs. E. M. Brown, President, urges all Garden Club members, homeowners, and others interested in "beautiful surroundings" to make a special effort to attend this educational show—the only Big Flower and Garden Show to be held in this area in 1967. Mrs. Brown and her daughter, Miss Thurlotta M. Brown, Hawkins High School Senior, will leave Friday to attend a special Press Show on Friday night at the Charlotte Merchandise Mart and attend the Show over the weekend. Other members of the Town 'N' Country Garden Club will attend the Show on Sunday.

Mr. R. E. Zimmerman, Southeastern Show Executive, promises that the show will have special attractions for the young and old. Several nationally known Landscapers and Florists will have gardens on exhibit. A big attraction will be the animated Garden of Oz by noted designer, Jack Pentes. This will have Dorothy, Toto, the Tin Woodman, Scarecrow and Cowardly Lion tending some of the wildest flowers and vegetables ever seen. The Carolina Chapter of the American Institute of Interior Design, whose members will decorate rooms, will also hold interior design forums at 1:30 p. m. March 6, 7, and 8. The big event will have nightly style shows, and models from the stores of the downtown Char-

lotte Association will stroll through the gardens at fashion time. Garden Club members throughout the state have sold advance tickets and thousands of North Carolinians are expected to attend the Show at the Charlotte Merchandise Mart March 4-12.

DANGEROUS SPOT

A gentle Quaker roused from sleep by a strange noise investigated and found a burglar at work. The Quaker went for his gun and returned to the room where the burglar was occupying himself with the family silver. He stood in the doorway and announced quietly: "Friend, I would do thee no harm for the world, but thee standest where I am about to shoot."

SQUIRRELS TOO?

Stumped for the cause of a blaze they extinguished in a tree. Bloomington, Ill., firemen finally marked down the origin as: "Squirrel smoking in bed."
