Jamestown, Va., was the first permanent English settlement in North America.

SPIN THE DIAL AND SPAN THE NATION

Have You Tried Dialing Your Own Long Distance Calls?

You should. It's the quick, easy, low-cost way to call Long Distance almost anywhere in the country. And it's as simple as 1-2-3.

1. Dial "1" to connect your phone with the Direct Distance Dialing equipment.
2. Dial the Area Code of the city you're calling IF it's different from your own area code (here, our area code is 919). If you're calling a person who has the same area code as your own, just dial "1" and then the individual number of the person you're calling. You'll find a list of area codes for many cities in your Direct Distance Dialing directory.
3. Dial the Number of the person you're calling. Give the operator your telephone number when she asks for it.

That does it! Direct Distance Dialing — DDD — lets you call clear across the country as easily as you call down the street. What's more, when you dial direct, you pay only those low station-to-station rates. Why not try it now? Surprise that out-of-town family member or friend. Dial direct. They'd like to hear your voice.
