

# Over 1,100 New Homes Reported

Warren County gained more than 1,100 new structures during the four-year period from 1973-76, according to figures included in a new building codes study now being reviewed by county commissioners.

Statistics gathered to indicate future inspection needs in Warren County show that the 599 mobile homes brought into Warren County during the past four years exceeded the number of traditional homes built in the county during the same period.

New home starts during 1973-76 in Warren were put at 524. Additionally there were 13 commercial, industrial and public buildings erected during the four years.

The figures were lifted from reports of septic tank inspections, and were included in the 85-page study to show commissioners how many inspections might be required in future years.

According to the study, the majority of code inspection activities will take place in the Lake Gaston area and in the Manson, Ridgeway, Norlina, Warrenton area.

The study further suggested that some 64 percent of the inspections in the Lake Gaston area will be for the new location of mobile homes, while in the Warrenton area, inspections will be fairly evenly divided between mobile homes and new housing construction.

In assessing manpower needs for enforcement of additional building codes, the study shows that several on-site inspections may be required per structure.

At the present time Warren County enforces an electrical code and has an electrical inspector who also enforces the county's subdivision regulations.

County commissioners have the option to enforce any or all of six codes which have been adopted by the state of North Carolina. Roy Williford, community planner with the Kerr-Tar Regional Council of Govern-

ments and author of the code, suggested that all state codes be enforced, along with a minimum housing code.

Two or three code enforcement officers, each drawing an annual salary of \$10,000, were suggested, with the bulk of the cost borne by the homeowner. A fee system would be established to finance enforcement.

Warren now pays \$7,000 more yearly for the enforcement of subdivision regulations and the county electrical code than permits and inspection fees bring in.

## Conserve Energy Even If You Don't Have Unit

Summer energy conservation measures benefit both those with and without air conditioners.

During the summer months, reducing the amount of heat inside the home can be accomplished through careful and limited use of appliances, says Everette Prorise, Extension Housing and House Furnishings specialist at North Carolina State University.

Turn off light bulbs, radios, TV and even phonographs when they are not in use.

When possible, do heavy baking in the cooler time of the morning or evening.

Use the washer, dryer and iron during cooler periods of the day. This saves energy used by the air-conditioner and also avoids peak electrical load periods.

Use small appliances as much as possible instead of your large oven. The oven may produce more heat than you need, use more energy and put a strain on the house cooling unit.

## Egg Bonanza

A female halibut in just one season lays more than a million eggs, each one one-eighth of an inch in diameter.

# Local National Guardsmen Immersed In Summer Training

Roads that carried thousands of soldiers preparing for combat in Europe more than 30 years ago are being upgraded this week by peacetime soldiers from Warren County and surrounding areas.

Members of the local National Guard unit, undergoing annual summer training at old Camp Butner near Durham, are being called on to perform a wide range of jobs during their two-week encampment.

In addition to improving existing roads, the Guard unit and its heavy equipment are constructing firing ranges, cutting fire lanes and demolishing several old warehouses. Guardsmen have also set up and are operating a rock crusher with a 35-ton per hour capacity.

The unit left the Warrenton Armory on Saturday to link up with its component from Henderson for its training session. An additional 41 Guardsmen from the 30th Engineer Brigade in Roxboro have joined the 180 enlisted men, five officers and one warrant officer of Company C. The company is part of the 505th Engineer Battalion headquartered in Gastonia under the command of Lt. Col. Harvey Poole.

Among community projects undertaken during weekend training in the past year by Company C has been the closing of the Warren County Landfill.

The company will begin a 72-hour tactical exercise on the Butner reservation beginning Monday. At the completion of the exercise on Thursday, the unit will be paid. The annual company party, featuring barbecued pork, will be held Thursday night of next week. The following day Guardsmen will begin breaking camp for their return home on June 18.

Officers of the unit said Wednesday that morale has been excellent despite tent living and that there have been no injuries or sickness of any proportion.

Commanding the company is Capt. Jimmy D. Tate, with Lt. Theodore L. Wade as executive officer. Other officers are Lieutenants Paul D. Kearney, Jimmy C. Harris, Jr., Kenneth J. Simurdiak and Warrant Officer Willie G. Hunt, Jr.

Carlton W. Whitby serves as first sergeant and unit mess sergeant is Master Sgt. Martin L. Vaughan. Staff Sgt. Robert D. Ed-

monds is operations sergeant and Staff Sgt. Luther H. Greenway serves as supply sergeant.

## My Church

A poem of Reedy Creek Church, and also a tribute to Rev. E. W. Greene, who was pastor almost 28 years. Homecoming day is June 25, 1977.

—MY CHURCH—

By LOUISE WILSON

My church stands in a quiet place, long ago the members were of more than one race, It's made of brick now, and has a fine steeple, A cemetery, pretty lawn, and the congregation sometimes a small group of people.

There's dignity and respect, a lot of love one for the other All stand and talk after service, of work to do, fishing trips, Or how to help a needy brother.

When crops were very thirsty, the earth so dry, it seemed as if every green thing was just going to die, Members asked the pastor to pray for rain We all silently joined him, believing it was not in vain, before that service ended the thunder just rolled Then came the down pour, a blessing tenfold.

You need not take my word, ask the members, Anyone—they'll quickly tell you that what I've said was done. Maybe you know a soul you feel needs to be saved, bring them on down, the road is paved.

Revival is held the last week in June, time passes quickly, it will be here soon, everyone is welcome, there is good preaching, good food too, on homecoming day. Most people know of Reedy Creek Church And will gladly tell or show you the way.

# Area Deaths And Funerals

**MRS. LELIE H. VAUGHAN**  
Mrs. Lellie Hight Vaughan, 83, died in Warren General Hospital at 6:45 p. m. Tuesday, following a short illness. She was the widow of the late J. T. Vaughan.

Moscow's subway fare is only about 7 cents in U. S. money.

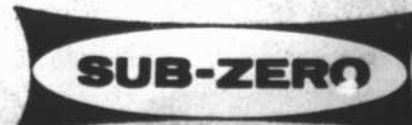

An orchestra seat at the Metropolitan Opera sells for \$30.

# Functional elegance

Home owners with discriminating tastes often select Sub-Zero because it is the only home refrigeration that doesn't look like home refrigeration. Handcrafted in the Sub-Zero tradition of quality, all models are true built-ins because they are designed to accept the personalized finish best suited to the decor of your kitchen. You can use virtually any material: wood, metal, plastic, etc., on the front and sides. You can hide it or disguise it or have it highlight your kitchen with a contrasting finish. A true built-in also to the extent that your Sub-Zero unit does not extend beyond the 24" depth of kitchen base cabinets.

The beauty of a Sub-Zero built-in unit is further enhanced by superior workmanship and one of the most durable refrigeration systems available—a reliable system to assure you of maximum and precise temperatures throughout all storage areas. Every Sub-Zero unit is factory tested to the most exacting specifications assuring each new owner trouble free years of accurate operation.

Complimenting its unmatched beauty and functional capabilities, Sub-Zero offers the largest capacity units in the industry and complete flexibility in kitchen planning because of many model variations. Choose from full size units in widths up to 48 inches—capacities up to 32 cubic feet—side-by-side, over 'n under (freezer on the bottom) or "all" refrigeration "all" freezer. You will find complete flexibility with little or no fixed storage. Extra crisp storage gives you added convenience. You also choose from a complete line of under counter refrigerators, freezers, combination units and icemakers.

## SUB-ZERO

# Built-in home refrigeration

# Features

1. Automatic icemaker is standard equipment on all full size Sub-Zero units.
2. Completely automatic defrosting in both the refrigerator and freezer (except model 249R).
3. All models are self-venting.
4. All shelving, including door shelves, is adjustable.
5. Full one year parts and labor warranty on entire unit and additional four year warranty parts and labor on the sealed system.
6. Decorative door and side panels can be installed without the use of any added equipment.
7. Toe space at the base of the unit to line up with base units of kitchen cabinets.
8. Two separate refrigeration systems available in models 2411, 2511 and 3211.
9. Your choice of decorative door handles.
10. All units are available with right or left door swing.
