D. D. CHAMBLEE

"The Insurance Man"

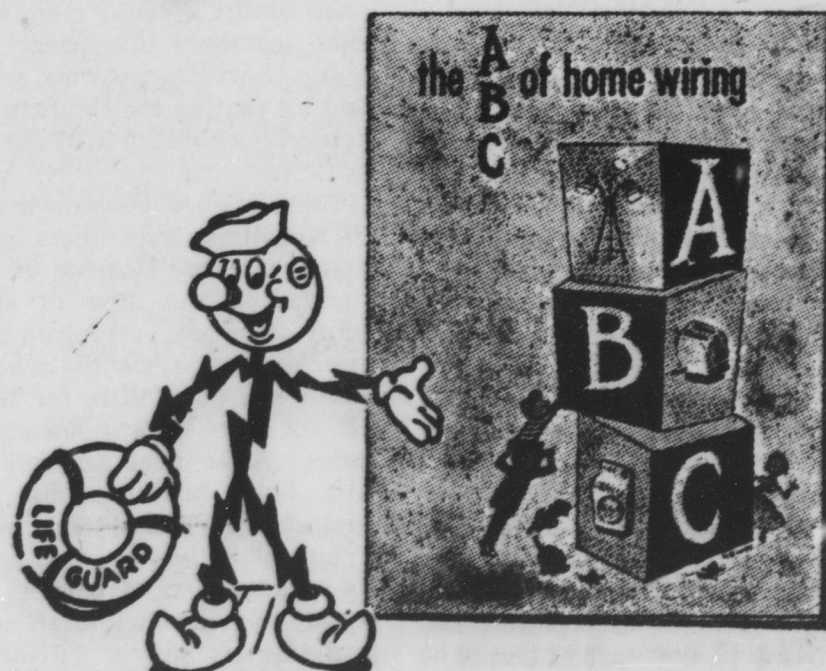

Memories are friendly things to have around the house but this outfit is strictly for the Family Album. Could be that some other old-fashioned things around the house may also belong in the Album. Not at all friendly, they can be downright inconvenient—like the wiring in your home for instance.

As do most modern families, you live electrically. BUT the odds are 4 to 1 that your electrical needs far exceed the capacity of your home wiring to serve you efficiently. The same wiring that once served for lighting and a few appliances, NOW must power the demands of more than a score of major and minor appliances. Such overloaded wiring costs you money, time and convenience. It wastes the current you pay for—cuts appliance efficiency—blows fuses and interrupts your electric service.

FREE BOOKLET SHOWS HOW YOU BENEFIT

Planning to build, buy or remodel? The "ABC of Home Wiring," illustrated at left, is yours for the asking. Written in non-technical language with plenty of illustrations it makes a handy guide for present or future plans. THE SUPPLY IS LIMITED so get your copy soon. Every day you delay costs you money, time, convenience and comfort. Just call or write your nearest CP&L office.
