### House Numbers Are on the Way

By mid-summer or even before the businesses and residences of Zebulon will be numbered.

Last week the property numbering map was received for the town and is on display at the Town Office. This map was devised by the League of Municipalities.

Town Manager Willie B. Hopkins said before any numbering takes place the streets will have to be redesignated. This means that each street marker east of Arendell Avenue, which is the north-south axis street, must be repainted with its proper designation.

He said, for example, Vance Street west of Arendell must be designated West Vance Street.

In a like manner Arendell Avenue north of Vance Street must be redesignated North Arendell and that portion south of Vance Street must be redesignated South Arendell.

Hopkins said a number will be necessary for every 50 feet of residence property and every 25 feet of business property.

No numbering will be changed, for the town must abide by the numbering system set up by the League.

The following is a proposed ordinance establishing a property numbering system for the Town of Zebulon.

Mayor Wilbur Debnam said in all likelihood the following document will be accepted by the Town Board of Commissioners at the May meeting.

Section 1. Numbering Map. The property numbering map entitled the "House Numbering Plan" of the Town of Zebulon and dated June, 1951, is hereby adopted as the official property numbering map of the Town of Zebulon, North Carolina, and all property numbers assigned shall be assigned in ac-

cordance with this numbering map and no other property numbers shall be used or displayed in the Town of Zebulon except numbers assigned in accordance with official numbering map. The property numbering map shall be kept on file in the office of the Town Clerk.

Section 2. Numbering System. On the property numbering map there shall be designated a North-South axis and an East-West axis and all avenues, streets or alleys running generally North and South shall be numbered from the East-West axis consecutively to the corporate limits or the extremity of such avenue, street or alley. Avenues, streets or alleys running generally East and West shall be numbered from the North-South axis in the same manner. One hundred numbers shall be allowed to each block so that the number (See HOUSE NUMBERS, Page 7)
