NEARLY 2,000,000 ARE EXECUTED IN RUSSIA

A Riga dispatch to the London Times says that, according to the official bolshevik figures, Cheka executed 1,766,118 persons before being renamed to the supreme political administration at the capital last February. The total includes 6,675 professors and teachers, 3,755 doctors, other intellectuals and priests, 64,565 officers, 200,000 soldiers, 59,000 policemen, 12,969 land owners, 19,250 workmen and 18,101 peasants.

During the civil war the bolsheviks have had more persons killed than were killed during the great war.

Peggy Joyce said she was in the west for hard work. Then it is given out that she kissed Charley Chaplin the other day. If she calls that hard work—and possibly it was—she need not have gone so far, and worked so hard. But we do not regard that as anything to re-joyce over. She could have found a Chap nearer home.

THE BOONE TRAIL HIGHWAY (Salisbury Post)

Josephus Daniels, writing his paper from Boone, says that the Boone Trail highway is now complete and that you can ride from Boone to Winston-Salem in five hours in a five-ver. Dr. Daniels also rode over the road being built into Blowing Rock, there to connect with the highway to Lenoir. When the whole project is put through one can leave Salisbury, go by way of Statesville and Wilkesboro and to Boone, then to Blowing Rock, to Lenoir, then to Hickory, there strike the Central highway and run into Salisbury. It will be a circuit of great interest and every foot of the highway will be of intense value to the State and the large territory touched.

The day does not seem far off when the beautiful mountain section of our wonderful State will be made accessible. The well built highways in which North Carolina leads will enable all sections of the State to travel to the beautiful mountain lands, and to the rich coastal plains in comfort and with ease. These highways will also furnish delightful automobile tours for thousands from outside the State, and with the completion of the present ambitious plans the State ought to begin a well defined advertising campaign to impress this great resort section on the tourists. There will be no fairer land on earth, not only most beautiful, but made easy to view by reason of the fine highways. If the State will properly advertise what it has to offer by way of sightseeing, vacation possibilities, the tourists of other States will pay a large share of the great cost of building these fine highways throughout the State.

The next legislature ought to consider an appropriation that may be augmented by local contributions from sections that will most profit by such an influx of tourists, and provide for the same being intelligently spent in printer's ink. Something like \$25,000 a year for four years would go a long way towards turning the tide of tourists into the unsurpassed scenic sections of the State.

EDUCATION PAYS

Does it pay to go to school? We mean from a monetary standpoint. Most emphatically, it does. If you ever hear of a boy or girl who wants to quit school, when it is necessary; if you ever hear of parents who are thinking of putting their children to work when it is unnecessary, just bring these figures to their attention: Every day spent in school pays the child \$9. Here is the proof, based on the wage scale of 113: Uneducated laborers earn on the average of \$500 per year for forty years, a total of \$20,000. High school graduates earn on the average \$1,000 per year for forty years, a total of \$40,000. This education requires 12 years of school of 180 days each, a total of 2,160 days in the school. If 2,160 days at school add \$20,000 to the income for life, then each day at school adds \$9.25. The child that stays out of school to earn less than \$9 a day is losing money—not making money. These figures are based on an investigation made by Dr. A. Caswell Ellis of the University of Texas, and issued in the Bulletin of the U. S. Bureau of Education.

ONLY SIX PERSONS OUT OF 332 ABOARD SAVED

Only six persons, including two passengers, out of a total of 332 on board the Chilean steamship Itata, were saved when the vessel sank last week off the Chilean coast. The vessel sailed from Coquimbo with 250 passengers aboard, of whom 90 were laborers proceeding to Antofagasta. Heavy cross seas damaged the rudder of the vessel, which was overloaded. In this helpless condition and caught in the strong south gale, the steamer was swept time and time again by the enormous waves. She listed badly and sank by the bow. A Chilean warship, which speeded to the rescue, found only scores of drowned floating on the ocean, and remnants of wreckage. One boat carrying 20 persons capized and 17 perished. Another boat with many passengers and sailors aboard, and in which Capt. Caldera, who had been grievously injured, was placed, also capized near the beach. Only two passengers and one sailor of this group escaped.

"It Must Have Been Dead at Least 6 Months But Didn't Smell."

"Saw a big rat in our cellar last fall," writes Mrs. Jonny, "and bought a 35c cake of RAT-SNAP, broke it up into small pieces. Last week while moving we came across the dead rat. Must have been dead six months, didn't smell. RAT-SNAP is wonderful." Three sizes, 35c, 65c, \$1.25. AMERICA ESCAPES THE SUN ECLIPSE IN SEPTEMBER

The fact that you do not live on the east coast of Africa, Australia or on islands in the southern Pacific ocean relieves you of the unpleasantness of a dark day on Sept. 21. On that date, according to Prof. Edwin B. Frost, of the University of Chicago and director of the Yerkes observatory, a total solar eclipse will occur over that region. The moon, coming between the earth and the sun, will cast a shadow which will sweep over the southern sea from a point off the eastern coast of Africa near the equator, cross a few scattered islands and the continent of Australia and then out to the southern Pacific ocean, he said. The duration of totality at different points will vary from three to six minutes, and Prof. Frost declared this to be an unusually long eclipse.

Expeditions from various astronomical institutions will be established at favorable points to study the eclipse. "The total eclipse of the sun always has been one of nature's most thrilling spectacles," said Prof. Frost. "It gives a momentary glimpse of the mysterious veil surrounding the sun, called the corona, which is never visible at any other time. Gigantic rosy eruptions of flowing gas also may be seen along the rim of the eclipsed sun."

On Sept. 19, 1923, he said, a total solar eclipse will touch the coast of the United States at Santa Barbara and near San Diego, Cal. After the one of 1923 the next total solar eclipse that can be observed under favorable conditions in the United States will be on Aug. 23, 1917.

THE NORTH STATE BIRTH RATE LEADS THE NATION

The birth rate is declining and the death rate increasing according to statistics made public last Thursday by the census bureau, covering the first quarter of the year.

The birth rate in the States from which comparative figures were available showed an average of 23.3 for each thousand of population in the first three months of 1922 against 25.3 in 1921, while the mortality average in the registration area in the first quarter of the year was 13.7 against 12.6 in the same period last year.

North Carolina, with 29.2, reported the highest birth rate for the three months this year, and the State of Washington, with 16.5, the lowest. The District of Columbia had the highest mortality rate, with 17.8, and Wyoming the lowest, with 9.6.

COMB SAGE TEA IN HAIR TO DARKEN IT

It's Grandmother's Recipe to keep her Locks Dark, Glossy, Beautiful.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's recipe, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use product, improved by the addition of other ingredients, called "Wyeth's Sage and Sulphur Compound." It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur Compound, is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive. This ready-to-use preparation is a delightful toilet requisite for those who desire a more youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

PREPARATIONS FOR A BIG FAIR IN CATAWBA

For the first time in the history of the Catawba Fair Association three railroads will make special rates for the event to be held during the first week in October. The Southern will sell tickets as far west as Marion and south as far as Charlotte and Gastonia, the Carolina & Northwestern will put on special rates from Edgemont to Gastonia, and the Seaboard will put on special rates along its line from Marion to Lincolnton. The rate will be one far and a half for the round trip, good as early as Oct. 2 and valid until Oct. 8 at midnight.

John W. Robinson, president of the association, has been devoting most of the past few months in creating interest in the four counties which will exhibit in Hickory. A day will be given to Alexander, Catawba, Burke and Caldwell and the fair will be a four-county attraction.
