Save Farm Labor

Make it Produce More

With practically the same labor, horse, mules, wagons and implements, you can produce bigger crops from the same or less acreage. It takes no more work to raise 60 to 90 bushels of corn, or one and a half to two bales of cotton, to the acre than it takes to make ordinary yields. It is not necessary to plant a larger amount to get a bigger yield. Simply work and cultivate the same amount of land more thoroughly. You can produce bigger crops of
