

LET US EXPLAIN—

When you buy a new Refrigerator you should satisfy yourself on the following points:

- 1—Will foods always be kept cold, sweet and wholesome.
2—Will less ice be necessary than in your old refrigerator.
3—Will it be necessary to open food chambers and set foods out when cleaning the trap and drain pipe.
4—Will it have a water cooling system.
5—Will it make an attractive "furnishing" for my kitchen.
6—Will it be reasonable in price.

These and many other questions are answered to your entire satisfaction when we show you the Automatic—refrigerator we believe to be the best, most economical, most modern, and most satisfactory in every respect of all refrigerators.

Varnish to Imitate Ground Glass. To make a varnish to imitate ground glass dissolve 50 grains of sandarac and 20 grains of mastic in two ounces washed methylated ether, and add, in small quantities, sufficient benzine to make it dry with a suitable grain, too little making the varnish too transparent and an excess making it crapy. The quantity of benzine required depends upon the quality, from one-half to one and one-half ounces, or even more. The best results are obtained from a medium quality. It is important to use pure washed ether, free from alcohol.
