B. AND L. LEAGUE OPENS SESSION IN ALBEMARLE

Charming Welcome is Given to Delegates by the Stansky County Capital. Albemarle, June 19.—With what is said to have been the largest number of delegates ever to assemble at any previous meeting, the North Carolina Building and Loan League opened its first session here tonight at 8 o'clock in the city school auditorium.

The meeting was a most interesting one, and the large crowd forgot the sweltering heat and every one seemed thoroughly interested from the very beginning. A. P. Harris, of this city, who is a member of the executive committee of the state league, on behalf of the president called the meeting to order.

The session started off with America, in which all joined most heartily. This was followed by a piano trio by Messrs. J. R. Price, B. L. Smith and A. C. Lentz. The invocation was made by Rev. Q. C. Davis, pastor of the First Baptist Church of this city. Mayor O. J. Sikes delivered the address of welcome. Col. Albert Cox was scheduled to have made the response, but as he failed to arrive in time, the president drafted C. E. Kestler, of Charlotte, and he did it to the quiver's taste.

He told the delegates that if they were not trying to be of service to the small share holder, they were failing to see the great thing for which building and loan stands. He roasted the fellow who would attempt to collect a higher rate of interest than that allowed by law.

His address was heartily applauded, and it put plenty of pep into the meeting to start off with. When he took his seat the crowd stood and sang "Home Sweet Home."

A large crowd is expected to be here for the sessions tomorrow, and for the picnic lunch at Rocky River Springs tomorrow evening to be given by the local building and loan associations and the Lions club of Albemarle.

If you are doing good work, don't worry; somebody will find it out.

FRENCH CREWS TO GET WINE ON TRIPS BACK HOME

New "Medicinal" Liquor Order So Contrasted by French Line Official. Washington, June 18.—Secretary Welton issued instructions late today to Public Health Service officials to comply fully with the laws of foreign nations compelling ships of their nationals to carry adequate supplies of "medicinal" liquor.

Treasury officials declined to discuss details of the instructions, and Dr. M. J. White, acting Surgeon General of the Public Health Service, disassociated reports that the new orders were intended to relax the rigidity of the regulations recently promulgated barring all except "medicinal" liquors from American territorial waters.

It was learned Public Health Service doctors and representatives of the Treasury had conferred regarding claims of the French government that all liquor aboard its ships should be classed as "medicinal" except cargo beverages sold over the bar. The consensus of opinion was that the French statute must be construed as placing "dietary" rations in the medicinal category.

Discovered Wireless Waves. Wireless waves were proved to exist long before they were ever experimentally with. In 1877 a man named Clerk Maxwell worked them out theoretically, and predicted that before long they would be demonstrated practically.

Peacocks Love Freedom.

Peacocks will roost in trees or on tops of houses during the coldest frosty night, and will never, if possible, let themselves be confined in a house.

In New York the daily allowance of water per head is nearly two hundred gallons. In London it is but forty gallons.

CHAPEL, MORGUE AND JAIL FEATURE NEW SIXTY MILLION DOLLAR STATION

NEW UNION STATION

JOSHUA D'ESPOSITO

Opening of the new \$60,000,000 Union passenger station at Chicago, for which ground was broken eight years ago, is at last in sight. J. D'Esposito, the chief engineer, now states that this tremendous development with its acres of

train sheds, miles of tracks, its monumental main building of Indiana limestone containing a small city in itself, will be ready next year.

Among the unusual features of the station will be a jail, for the detention of prisoners awaiting transportation; a chapel and a morgue.

The basic architectural idea is that everything having to do with passengers shall be on the same floor, restaurants, ticket offices, waiting rooms, rest rooms and the like. A conception of its size may be gained from the fact that the lobby of the concourse with the subway under Canal street will form a single room 300 feet long and 180 feet wide, communicating with a waiting room 250 feet long and 100 feet wide. The whole construction is being handled without the interruption of a train. The limestone blocks, of many designs and measurements, are all cut at the quarries in Indiana and come numbered so that they may be swung into place without delay.

Everywhere in Europe America Is Regarded as the Hope of the World

By C. S. MAC FARLAND, Federal Council of Churches of Christ.

Everywhere in Europe, from the Baltic sea to the Black, America is regarded as the hope of the world. Indeed, the most striking moral and psychological phenomenon in Europe, today, is the persistence of this hope. Our brothers across the sea, in this, have shown a greater tenacity even than many of our own sympathetic people. Here at home we find good men and women yielding to despair. Men who two or three years ago counted upon our participation in a society of nations as obvious have now settled back into a sense of hopelessness. But in Europe it is not so, and our brethren there give striking testimony to the fact that hope does "spring eternal in the human breast."

"How do the European peoples feel toward us?" is the question often asked as we return. Their feeling is one of disappointment that has not reached disillusionment, mingled with faith that still persists. They feel that we have left the field of battle without stopping to bury the dead or to help repair the devastation made by our own artillery.

Recognition for our private, philanthropic help is not overlooked and still gives impulses to prayers of gratitude. No rancor is manifested, just disappointment; sometimes, however, almost to despair.

MISS GOWER, CLAYTON, IS DROWNED IN RIVER

Meredith College Senior Loses Life While Bathing in Stream Near Sylva. Sylva, June 19.—Miss Dorothy Gower, of Clayton, was drowned in the Tuckasegee River while in bathing this afternoon.

Miss Gower, who was a senior at Meredith College, was visiting her friend and schoolmate, Miss Nita Garratt, here, and she and a party of young people were in bathing when she and another young lady became frightened and excited.

Robert Garret went to their rescue and attempted to bring both girls to the bank, but in their excitement both grabbed hold of him and he finally succeeded in reaching the bank with but one girl and in saving his own life, which was greatly in danger.

By the time young Garratt had towed the one girl to the bank, Miss Gower had disappeared.

The alarm was spread and crowds of men and boys from Hillsboro and Sylva have been diving for the body all afternoon, but it has not yet been recovered.

The man-faced crabs, which swarm in the inland sea of Japan, are queer creatures. The body is only about an inch in length, but it is crowned with a head which has a face which closely resembles that of a Chinese coolie.

The "life tree" of Jamaica grows and thrives for months after being uprooted and exposed to the sun.
