PRAISE IN FARM PAPER
Berkshire Herd of A. H. Litaker Gets
Promhent Publicity in the Southern
Berkshire News.
A special correspondent of The Southern Berkshire News, published at Pinehurst, N. C., has the following to say about a visit to the farm of Mr. A. H. Litaker, of this county:

The other herd we had the pleasure of visiting was that of Mr. A. H. Litaker at Concord, N. C. For a long time we have been promising ourselves that we would visit Mr. Litaker and look over his herd, We knew that he had a good herd because we had seen some mighty good Berkshires from there but we must admit that we were surpriseat what we saw. In the first place it would be hard to select a more ideal spot for a hog breeding plant than the Litaker farm, about five miles from the farm we failed to observe it as it is gently rolling from one end of the 200 acres to the other and no more ideal daniage could be imagined. Very, little of the farm is in cultivated crops, something like twenty acres of corn the farmeter farm, except the "Hog Town" as Mr. Litaker calls it, is cut into the farm farmeter farmet

acres to the other and he breeding lead drainage could be imagined. Very little of the farm is in cultivated crops something like twenty acres of corn that both the acre, and the balance of the corn that both the acre, and the balance of the entire farm, except the "Hog Town as Mr. Litaker calls it, is cut into about ten to twenty acre pastures and every one of them is down to a good stand of grass or clover. If there was a wash or gully on the entire place we failed to find it. A good crop of hay is cut from most of these mendows and the Jerseys, for Mr. Litaker has one of the cbst little herds of Jerseys we have seen in a long time, and the Berkshires make good use of the pasture. We found the sow herd to numbes about eighteen breeding sows of the best blood lines but we did not find but a few pigs over weaning age as the dwand for spring pigs has cleaned out the herd with the exception of a feth at the being retained for the breeding lerd and some young pigs that are only within the last Saturday evening in August, with Dr. T. C. Splude, at Albenarle.

that are being retained for the breeding herd and some young pigs that are only waiting to be weaned band shipped. The herd is headed by a son of Reay "yepe and a young boar of Bowsher breeding is coming on and is being used a little this spring.

One thing we saw that was a source of real regret was a young herd of pigs sired by a Penshurst boar named Big Jack and out of a sow purchased from Penshurst Farm. We simply can't get these pigs off our mind and the source of our regret is that they were farrowed in February and will not be eligible to show in the Under Six Months class this fall for they certainly would

Experiment Declared to Be Unique in the

Experiment Declared to Be Unique in the Field of Industrial Research. Washington, July 30.—The United States government is now making iron, but only as an experiment and not for the commercial field. Its blast furnace is located at Minneapolis and is operated as a laboratory by the Bureau of Mines in co-operation with the University of Minnesota. After four years of experimentation to develop it, the furnace recently produced several tons of gray iron and spicyeleisen.

This type of experiment is declared unique in the field of industrial research, as blast furnaces are not included usual.

complete technical control, it is believed

the demonstration showing every phase of the operation of from making under complete technical control, it is believed to the investigators at the Minneapolis station are in a position to undertake the investigators at the Minneapolis station are in a position to undertake the study of various problems, the solution of which would be of great practical value to blast furnace operators.

The furnace was operated first as a stagging-type gas producer until it had reached a steady state thermally and chemically. Iron ore without the addition or a flux then was introduced, and its decent by means of gas samples taken at various stations. When the effect of this charge had been dissipated, more ore was charged without linestone, and other sets of samples were taken.

The purpose is to obtain a comparison of the gas composition at various spines of the furnace. Various sizes of the ore at the stockline was found to the ore at the stockline was found to the ore at the stockline was found to be greater with smaller sized ore, as indicated by higher carbon dioxide.

One of the most important problems that will be worked out with the experimental furnace will be that of finding a means of extracting iron from the low gride ores found especially in norther that will be worked out with the experimental furnace will be that of finding a means of extracting iron from the low gride ores found especially in norther than the problems of the ore at manufacturing industry in the United States, employ between two and three thousand operatives and have an usual production of more than 400, 000 desear of hats.

Better Living.

Even people who are not known as heater goers or are not particularly increated in dramatic productions know of David Belasco, the distinguished American playwright. His marked literary ability and his 'everend and deeply eligious character have endeared him to thousands who know of him. We tree indebted to Mr. Belasco himself for he splendid report of his address which he made in celebrating his fortieth year is a play producer. His address on 'Love—the Greatest Thing in the World" was a marked one and it does not suffer at all in comparison with the ssay by Henry Drummond on the same subject.

"In all these years it stands to reason that I must have learned something, and is this—if took years to learn it and

if thing.

"Another thing I nave learned in my sperience in New York and it has rown to be my creed; I believe that jod made us to work. I believe that He meant that we should earn our living by the sweat of our brows. But I believe that He made us, to love our work so much that we haight play at I; find real and profound pleasure it, and so labor on until, tired out, we

f each day.
"And I believe that the last sleep

"And I believe that the last sleep is may the end of another, day, and there will be a tomorrow—to work again and to play again and to love again.

"Every day that dawns, I find greater deasure in my life in the theatre. The man who does not love his work—who inds no pleasure in it—who cannot toil it it fill he drops—is a slavy.

"But, to go on with our work, we all need loving encouragement, recognition. It is a great thing.
"Encouragement we all long for. Need I say how much encouragement our kindly tribute tonight has given to ne?

our kindly tribute tonight has given to ne?

"We are all human,

"We pet the child, and when it grows in the second of the secon

In my experience in the theatre, the changes that have come about are almost neonceivable.

"I marvel at the daily difficulties oversome, only to find increasing difficulties newly arisen—until sometimes, like a ting of old, I say: 'O Lord, remember David and all his afflictions.'

"I think I love and reverence all arts qual.' our own dear Charlotte Cushman used to say. only putting my own inst a little above the others; because in t I recognize the union and culmination of them all. To me it seems as if when God conceived the world, that was pottry; He formed it, and that was pour; He colored it, fand that was painting: He peopled it with living beings, and that was the grand, divine eternal frama."

"If the leaders of tomorrow will only bring love to their work and deal with ruths—and only truths—our art in America will yet bear the torch and lead the way.

"The curse of our times is the vast army of people who care nothing for heir work—who labor solely for money. No one can do this and succeed.

"This is felt by all artists, scientists and men and women in the business world; so the best we can do its to take I fresh viewpoint of old matters."

"Now, in the theatre, we call this treatment, and 'treatment' performs miracles.

"Love in the theatre is taken very seriously. There is a certain element which is greatly to be desired in a blay—we call that element 'heart-inter-st."

blay—we call that element 'heart-interost.'

"The appeal of love is ont only necessary to the drams—it is the keynote
of all arts, of all science, of all business.
It is the foundation, the mertar, the
bricks, the beams and the thing itself,

"Even the hard-fisted financier has
been made today to recognize its value—
the very dust in the street knows it,

"Why was John the beloved dissiple—
beloved above all others? Because
he bore a love message,

"Nothing in the world is so tremen;
dous as a thought; and a love thought
is overwhelming.

CAMPAIGN AGAINST WAR

To Begin Two Days' Session All Over

the Country.

Washington, July 27.—Thirty-five organizations will begin a two days' campaign over the country tomorrow in favor of American participation in the world court, acting under the auspices of the National Council for Prevention of War.

The occasion will be the ninth anniversary of the outbreak of the World War, and, according to sponsors of the movement, in 18-other nations demonstrations for pence will be held. Although the activities in the United States will be part of an international movement for "No More War," Frederick J. Libby, executive servetary of the National Council for Prevention of War, said leaders in America, had adopted the slogan "Law-Not War," to give opportunity to many cities not on President Harding's itinerary to express their opinion on the World Court proposal.

"The president's tour," Mr. Libby said, "has convinced leaders in the movement for closer international amity that the people want some action on the World Court during the coming session of Congress, and do not want the question, or so burdened with amendments that debate on the subject will be prolonged and a definite conclusion, as to America's position postponed perhaps several years."

According to the plans announced demonstrations will be held in cities of every state, taking the form of street speeches, luncheons, Sunday school and church addresses on the subject outdoor meetings, house-to-house canvasses, poster displays, and theatrical exhibits. The organizations participating represent, Mr. Libby said, a membership of ten million. They include civic societies, labor unions, church bodies of several denominations, peace societies, women's clubs, farmers associations, and welfare organizations participating represent, Mr. Libby said, a membership of ten million. They include civic societies, labor unions, church bodies of several denominations, peace societies, women's clubs, farmers associations, and welfare organizations.

"Candidate," is originally a Latin word which means "white." With the ancient Romans, at election time, those who were running for office wore a "toga eguidida," a white mantle, emblem of the purity of their political intestions. A herald announced to the voters gathered in the forum: "tua res agitur" ((your interests are to be attended to!") and then the tribunes took each candidate by the hand and led him around, presenting him to the crowd.

If Back Hurts Begin on Salts

by Drinking Quarts of Good Water

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Too much rich food creates acids which clog the kidney pores so that they sluggishly filter or strain only part of the waste and poisons from the blood. Then you get sick. Rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a sensation of scalding, begin to drink soft water in quantities; also get about four ounces of Jad Salts from any reliable pharmacy and take a table-spoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush clogged kidneys and stimulate them to activity, also to help neutralize the acids in the systems of their of the strain of the systems of the property of the preventing serious kidneys centrel thia-water drink, which everyone can take now and then to help keep the kidneys clean and the blood pure, thereby often preventing serious kidneys complications. By all means have your physician examine your kidneys at least twice a year.
