It can readily be seen that practically all these men are definitely following agricultural careers, except the 50 men engaged in business of one kind or another. If we were to analyze the jobs of these men we should find that many of them are engaged in business closely related to agriculture...

What is Henry, Anyhow?

Charity and Children. The national campaign next year promises to be highly entertaining. The funniest figure on the horizon is Henry Ford, the tin lizzie wizard. The trouble with him just now is that neither he nor the country knows what he is politically. In the west he thinks he is a progressive and in the south a Democrat...

Blackboard and Wardrobe.

A novel piece of school furniture is a combined blackboard and wardrobe, panels of the former swinging out on hinges to reveal presses to hold clothing.

HAPPENINGS IN OUR NEIGHBORING VILLAGES

FAITH.

We just took dinner today at the Yackin Hotel and got one of the finest dinners in the State. We met a lot of people there taking dinner. They have a new cashier since we were there last, a fine, pretty, young lady, who is busy taking in the cash.

VENUS.

There are some people who never seem so happy as when tearing down, as when saying sharp things that leave a sting and yet leave no constructive idea behind them.

STANFIELD ROUTE TWO.

The farmers are about through with their field work and are beginning to think of the Thanksgiving hunt.

AN EASY THING.

Winston-Salem Sentinel. In his admirable address at the men's meeting Sunday afternoon under the auspices of the Y. M. C. A., Dr. O. J. Chandler, of Asheville, presented very forcefully the danger of destructive criticism in any realm.

He said that tearing down is the easiest thing in the world. It requires no great intelligence to criticize in a destructive way.

Anybody can do that. The man who simply criticizes, who tears down without putting something in the place of what is torn down, is a man who is calculated to do much more harm than good.

Dr. Chandler was not discounting criticism of a constructive type. He showed clearly that there is a place for that kind of criticism.

What he was attacking was the attitude of those who destroy but who do not build.

It would have been fine if everybody in Winston-Salem could have heard his brief, but forceful, discussion of this matter.

There are some people who never seem so happy as when tearing down, as when saying sharp things that leave a sting and yet leave no constructive idea behind them.

The world has too much of that kind of thing. Let's adopt something like this as a motto:

I am not going to be, under any circumstances, a knocker; if something needs criticism at my hands, that criticism will always be of a helpful, constructive, forward-looking type.

Three hundred thirty-four million cubic feet of timber has been sold by the Forest Service in the Tangass National Forest, Alaska. The stumpage alone is sold, title to the land remaining in the Federal Government. The purchaser has agreed as part of the consideration for the timber to build a pulp-manufacturing plant of not less than 100 tons daily capacity at the Cashe Creek water power site on Thomas Bay. A complete newsprint pulp plant with a daily capacity of 200 tons will be installed. The timber will be cut on a perpetual supply basis, enough seed trees being left to insure complete natural reproduction.

One of the richest men in Salisbury has just bought a jar of that home-made eczema salve from J. T. Wyatt. It has never failed to cure.

A young couple motored over to Faith from Granite Quarry and got married a few days ago. The young lady was a Miss Eller, and the young man was reared by Mr. and Mrs. Honeycutt, near Granite Quarry, and is a fine young man.

G. C. Miller has lumber and granite on the grounds to make his one-story residence into a fine two-story building, with a fine granite front.

If you have any Confederate money or Indian arrowheads J. T. Wyatt, at Faith, will buy them for his collection.

Tom Lingle has moved back to Faith from Winston-Salem, and says that Faith is the best place to live after all.

One of the richest farmers in Rowan county is making preparations to retire and move to Faith to live a good, quiet life, as Faith is the best place to live in this country. Several other farmers have retired from farm life and have moved to Faith, and they all like it very much.

VENUS. There are some people who never seem so happy as when tearing down, as when saying sharp things that leave a sting and yet leave no constructive idea behind them.

STANFIELD ROUTE TWO. The farmers are about through with their field work and are beginning to think of the Thanksgiving hunt.
