A Real Gym Class For Busy Men at the Y.

The first class for business men met Wednesday at five o'clock. After the regular program in setting up exercises and medicine ball throwing the men enjoyed a game of volley-ball.

These classes are especially for the busy business man, the steady-going doctor, the over-worked lawyer and so on.

When the business men get into a class of this kind then it is good-bye to headaches, stiffness, tired feeling and general ails and complaints common to a man who does not play a little along with his regular work.

Every busy man in town is invited to join this class. If he doesn't want to join up until he knows what it is, he is invited to come down and watch the others.

Senior Hi-Y Boys and Girls Clubs Meet. The Senior Hi-Y Boys and Girls Club held a joint meeting and served a Dutch lunch in the dining hall at the Y. M. C. A. Tuesday night.

There is nothing new about this text. Don't let these big words scare you. Lay apart all futilities and superfluities of naughtiness simply means "quit your meanness."

He said in part: "There is not an infidel in Kannapolis." He said: "We used to have cattle like that in olden days, but way down deep in your heart you know there is a God, and He is holy, and He hates sin.

"I want to ask you folks of Kannapolis four questions: First, has Jesus His place in your life? He won't play second fiddle to your dirty sin.

"The third question I want to ask you folks is this: Are you right with one another? John the apostle says: 'Hereby we know we have passed from death unto life because we love the brethren.'"

"The last question is this: Are you free? 'He whom the Son makes free is free indeed.' So says God's word.

KING TUT SERVICE STATION National Highway Below Southern Station

MUSETTE, Inc. Question: What Causes some tires to wear down faster than others?—Q. M., Kansas.

Answer: Maximum tread wear depends on a great many conditions. The tread may be overcurved, causing an unnatural wear.

The tire may not be properly centered on the wheel, which will cause it to run out of line. Misalignment of wheels, results in tread wear out prematurely.

Tires of different size wear down in relatively the same ratio per degree of misalignment. Experiments show that the wheels of a car to give the best service should be "toed in" from 3-16 to 3-8 of an inch, and that they should be slightly farther apart at the top than at the bottom.

Other causes for unnatural wear are: Misuse of brakes, sudden application of clutch. Driving in street car tracks. Sprung wheel. Worn hub. Bearings out of adjustment. Worn Knuckle bushings. Loose arms in a knuckle.
