Tom Sims Says

Goats are nice animals. They get in bad by not bathing, but you never hear goats kick on the food.
Goat will eat tin cans, dynamite, bride's biscuits or what have you. Then eat a shoe for desert.
Imagine being chased about the yard by a goat full of dynamite?
Why not take this Illinois goat who eats dynamite and let him butt a nice fat bootlegger?
What could be nicer than feeding a bill collector on dynamite and then throwing rocks at him.
They milk goats in France, but Germany's goat has gone dry.
Goats will eat dynamite. Why not start feeding the stuff to people who are always butting in?
Wouldn't it be too awful if somebody fed football players dynamite?
Eating dynamite will ruin a goat's health. It will make him very thin and several miles wide.
What will happen to a goat who eats dynamite? Why, he will butt once and nothing else but.

What's left of a goat that eats dynamite is the goat's goat.
Biggest example of a goat that has been eating dynamite is Germany.
France has Germany's goat. She feeds it on dynamite. And kicks it about. Look out, France!
France is after England's goat. Would have it already only England says she hasn't any goat.
France even wants Italy's goat. But he can't get that goat. Italy's goat belongs to Mussolini.
When our own government gets the taxpayer's goat she always returns it just before election.

ARDEN FACE POWDERS
All the skin treatment in the world is wasted if your powder is not right. It must not be coarse. A pure, fine powder will greatly enhance the appearance of the skin and prevents impurities from entering the pores. So many cheap, heavily-scented powders are used that coarsen the skin and even the appearance of the person, that I particularly urge the use of only the purest.
