You've got to keep whistling if you want things to keep tumbling. People who live in rock houses should not throw glass. Sometimes a quartet is nothing but four fluffers. It's a wise man who makes up his wife's mind before his own. People who live in spring suits should not open milk bottles. Wedding rings are different from circus rings. In wedding rings the performance is continuous. (Copyright, 1926, NEA Service, Inc.)

CONSIDER QUALITY

In buying furniture you cannot put your money into anything that will bring greater returns in happiness to yourself, your family, your friends.

It will pay interest for every day of your life.

It builds character in children. It strengthens your backbone to do.

It is within your reach—you can afford it—in fact, with such a store as this—filled with it—you can't afford to be without it.

The young people in a community delight in entertaining their friends in their own homes, provided they are well furnished, and a little sacrifice in order to do this is well repaid by the renewed interest and love of home life which the young folks in the family will display.

May we not show you the goods?

THE UNIVERSAL CAR

Thermo-Syphon Cooling System

The circulation of water in Ford cars is entirely governed by engine temperature—the flow starting as the motor warms, and being most rapid at the points of the greatest heat. On cold mornings the Ford engine warms up quickly, because the water does not circulate from the cylinder block until it becomes heated. In hot weather, too, the Ford cooling system is equally efficient, for the capacity of the radiator is unusually large in proportion to the heating surface of the cylinders. Since there is no water pump requiring frequent need for packing, the Ford cooling system is exceedingly simple and always efficient.
