A striking indication of the dis-integration which has paralyzed the figures showing the receipts of the present year. These figures have been dropping steadily for several months and the next audit is expected to show an even larger decrease in reve-nue indicating corresponding loss of members in good standing as the figures the standing as other Klans flock to the support of the mountain insurgents.

CAMELS are made of the choicest Turkish and Domestic tobaccos grown. To prove what we say about Camel's tobacco quality, make this test:

Take a Camel and any other cigarette. Tear off the papers and place the tobaccos from the two cigarettes in separate piles. Now shake them up and examine the tobaccos. Your own eyes will quickly show you the difference, how the Camel tobacco is longer and of a riper color. Then gather up the two piles separately-and smell them.

You will at once notice the rich, fragrant aroma of Camel tobaccos not found in the other.

This marked difference is even more apparent when you "taste the smoke." It is solely because of the quality of the tobaccos and the skill of the blending that Camels never tire the taste, never leave a cigaretty after-taste.

Camels are so good that we know you will like them. Give them every test known and you will find Camels the highest quality cigarette made, regardless of price. Have a Camel!
