A meeting was held Sunday night at Stanfield to discuss the moving of the Baptist Church here to that place or concentration of the two churches at a convenient site. We did not learn what the final decision was.

A sermon from Billy Sunday would not have caused a greater discussion than the one from Rev. E. L. Melton, of Macon, who preached Sunday afternoon at the Baptist Church.

We always like to read the Daily and were sorry we had to wait for the coming of the "male" the day after the publication or go to Concord for our paper.

This new way the editor has of sending the paper out by a carrier is far superior; for in the afternoon of some leisure (if we steal it from our farm work) we have the fresh news to read, either on the nice cool shady porch of summer, or by the sparkling wood fire of winter.

NIX. American business genius is clearly reflected in the rapidity with which the giant project has been carried out. In the span of a few months, properties of more than a score of large concerns in the famous Bedford-Bloomington

district were acquired, the various units coordinated, and today the new company is functioning with the smoothness of a perfectly organized and long established corporation and, incidentally, effecting huge savings by elimination of duplicate efforts. Production efficiency has increased 90 per cent a remarkable record for so short a period.

This is but one of a number of immense projects to the credit of Mr. Whiting, who is among the most promising of younger American bankers, and who is still in his mid-thirties. In the formation of the Indiana Limestone company he had the support of large Chicago, New York and Cleveland banking interests.

The Bedford-Bloomington district provides a very large proportion of all building stone used in America, and financial and industrial leaders say the new corporation is destined to rise to great heights in the next few years.

Where Health Decees the Fashion. Bobbed hair is one of the chief allies of Near East Relief physicians and nurses in fighting the avus, dread Oriental scalp disease, in the American orphanages, and

it has been made the uniform style of wearing the hair. This picture shows a wholesale "trimming" at the orphanage center on the Greek Island of Syra.

Popular Headliners in Radio's Greatest Broadcasting Program

MARY LEWIS. CHAS. G. DAWES. R. LEWIS.

The largest audience in history was desired to make epochal the annual Radio Industries Banquet, in New York, September 15, and it is estimated that the thirty-three stations on the hook-up broadcast, the program reach a total of more than 15,000,000 possible listeners.

Vice President Dawes, the principal speaker, when invited to address the banquet, came face to face for the first time with the change that radio has made in after-dinner speaking. He was told that he would begin speaking at a certain time, and the time he would cease speaking was also specified.

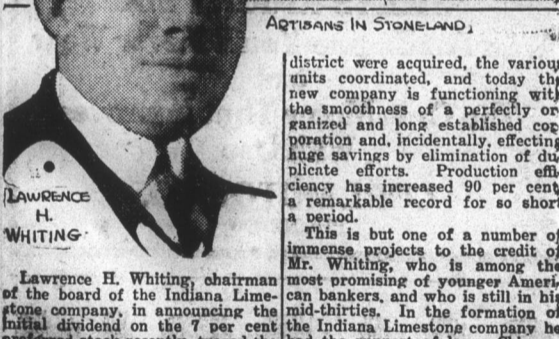

To broadcast the dinner from so many stations, it was necessary to arrange a strict schedule as in the handling of any other regular radio program, with the speakers and artists each allotted a limited time, bringing the program to a close at 11:45 for the hour of dance music following.

A. Atwater Kent, the Philadelphia radio manufacturer, volunteered the services of any of his operatic or concert artists, who headline the radio programs of the country. The choice of the committee was Mary Lewis, the gifted soprano of the Metropolitan Opera, whose opera opportunity followed almost immediately upon her first radio broadcasting under Mr. Kent's auspices. It was necessary to shorten her European vacation in order to keep the banquet engagement.

The program, with its two hundred singers and musicians, was arranged through the cooperation of several radio trade associations. It was through the same efforts that arrangements were made to broadcast the banquet from so many different points—Springfield, Schenectady, Boston, Paterson, Providence, Buffalo, Washington, Portland, Cleveland, Detroit, Philadelphia, St. Louis, Worcester, Pittsburgh, Minneapolis, Davenport, Hartford, Chicago, and Cincinnati, in addition to the eleven stations in New York State.

Thirty thousand dollars in cash prizes are offered for the national air races to be held at Philadelphia the first week of September. The program will cover an entire week and will include nineteen contests, of which fourteen will be solely for civilian aviators.

ARMENIAN ORPHANS OBSERVE THE SESQUI

THIS ten-year-old girl in the American Near East Relief orphanage in Sidon, Syria, played the part of Miss America in a pageant which the children produced in honor of the sesquicentennial of American Independence. All of the children taking part were Armenian waifs rescued from starvation by American charity and the pageant was in the nature of a tribute to their benefactors.

Round the World Golfers to Tee Up Again

ROUND THE WORLD GOLFERS TO TEE UP AGAIN. RAYMOND OHAIU COUNTRY CLUB, HONOLULU.

The Round the World Golf Club, open to all golfers who cherish an ambition to tee up in strange lands during an entire circuit of the globe, will leave New York Dec. 2, 1926 on their palatial floating clubhouse the Empress of Scotland for 132 days of golf, travel and sightseeing, returning to New York via the Panama Canal April 12, 1927. This novel club was organized last year by an enthusiast who wished to play as many different links as possible and enjoy the fascinating experience of driving a golf ball around the world. A score of amateur golfers of both sexes became enthused with the idea and joined the world cruise of the Empress of Scotland in order to save themselves the time and trouble of looking after baggage, transportation and hotel accommodations. They played in Egypt, India, Ceylon, the Philippines, Japan, Hawaii and other countries, Manila, Hongkong, Cebu, Santos, and were hospitably received everywhere and invited to come again. They found splendid courses clear around the globe and caddies who could hand out the right club for the shot and find the ball, even if they were Egyptians, Filipinos, Japanese or Hawaiians.

The golfers who embark on the Empress in December will visit Madeira, Gibraltar, Algiers, Monaco, Naples, Haifa, the port of Jerusalem and Bethlehem. Port Said, en route to Cairo, Suez, Bombay, Colombo, Padang, Batavia and Singapore. Still driving the little white ball they will see Japan, Hawaii and other countries, Manila, Hongkong, Cebu, Santos, and were hospitably received everywhere and invited to come again. They found splendid courses clear around the globe and caddies who could hand out the right club for the shot and find the ball, even if they were Egyptians, Filipinos, Japanese or Hawaiians.

New Double Track Railroad Completed All the Way to Miami; Millions Spent in Improvements by Florida East Coast System

Southward the Course of Empire takes its way. As the ancient civilizations of Greece and Rome reached their climax on the balmy Mediterranean, so today wealthy America is building a new seat of civilization in the South.

On the East Coast of Florida, the new American Riviera, millions are being expended to provide for expanding populations. Outstanding is the sixty million dollar program of construction and expansion of facilities undertaken by the Florida East Coast Railway. The immense program includes the double tracking of the main line between Jacksonville and Miami, now completed.

The Florida East Coast Railway receives at Jacksonville trains and Pullmans bound for the resorts and cities along its 500 mile expanse—St. Augustine, Ormond Beach, Daytona Beach, New Smyrna, Ft. Pierce, Stuart, Palm Beach and West Palm Beach, Ft. Lauderdale, Hollywood, Miami and Key West.
