Lesson for January 4

CHRIST'S TRIUMPHAL ENTRY

LESSON TEXT—Luke 19:29-44. GOLDEN TEXT—"Blessed be the King that cometh in the name of the Lord."—Luke 19:38. PRIMARY TOPIC—A Great Crowd Praising Jesus. JUNIOR TOPIC—The Triumphal Entry. INTERMEDIATE AND SENIOR TOPIC—Making Christ Our King. YOUNG PEOPLE AND ADULT TOPIC—The Kingship of Christ.

The title given this lesson is somewhat misleading. Strictly speaking, this was far from a triumphal entry. It was rather the official presentation of the King of the Jewish nation. Back of the cry, "hosanna," the awful word, "crucify," was uttered by the same persons who cried "hosanna."

1. The Presentation (vv. 29-34). I. Sending the Disciples for the Ass (vv. 29-31). He told them just where to go to find it and told them how to answer the inquiry of the one who owned it.

2. The Fulfillment of Prophecy (Matt. 21:4-5). Some five hundred years before Zechariah had predicted this event. Christ's entry into Jerusalem was an exact fulfillment of this prophecy.

3. Obedience of the Disciples (vv. 29-31). Though the ass may have seemed strange and unreasonable, they fully obeyed. The true disciple will render glad obedience to the Lord no matter how strange His commands may seem.

4. The Entry of the King (vv. 35-38). 1. The Disciples Set Upon the Ass (v. 35). This act of putting their garments upon the ass and sitting thereon upon it showed that they recognized him as their King.

2. Satisfaction of King by the Disciples (vv. 36-38). Some great throngs of people in the city, both men and women, came out to meet him. They were shouting and praising him.

3. The King's Entry into Jerusalem (vv. 39-44). The King entered Jerusalem and went to the temple. He looked at the buildings and said, "I will destroy this temple which is built with hands, and in three days I will build it up, without mortar and cement."

4. The King's Entry into Jerusalem (vv. 41-44). The King entered Jerusalem and went to the temple. He looked at the buildings and said, "I will destroy this temple which is built with hands, and in three days I will build it up, without mortar and cement."

5. The King's Entry into Jerusalem (vv. 41-44). The King entered Jerusalem and went to the temple. He looked at the buildings and said, "I will destroy this temple which is built with hands, and in three days I will build it up, without mortar and cement."

6. The King's Entry into Jerusalem (vv. 41-44). The King entered Jerusalem and went to the temple. He looked at the buildings and said, "I will destroy this temple which is built with hands, and in three days I will build it up, without mortar and cement."

7. The King's Entry into Jerusalem (vv. 41-44). The King entered Jerusalem and went to the temple. He looked at the buildings and said, "I will destroy this temple which is built with hands, and in three days I will build it up, without mortar and cement."

8. The King's Entry into Jerusalem (vv. 41-44). The King entered Jerusalem and went to the temple. He looked at the buildings and said, "I will destroy this temple which is built with hands, and in three days I will build it up, without mortar and cement."

HOME OWNERSHIP

A man who has spent most of his life in social service work recently said that he had practically reached the conclusion that the most effective way of attacking modern problems would be to inaugurate a permanent nation-wide campaign for home ownership.

His idea is that the source of most of our present-day trouble is the lack of family stability. The home owner does not desert his wife and children. He does not suffer from wanderlust. He takes a strong interest in his community.

The purchase of his own home arouses his ambition, his thrift, and his industry. Being permanently located, he has a better husband, a better father and a better citizen, and a better worker.

The more you think about the matter, the more you will be convinced that it is fundamental. Stateville Landmarks.

FROM THE COURIER. There was an old woman with a her nose was stuck up like a pig. Her eyes were keen from the top. Her tongue was loud as everybody knows.

Her head was turned because she built a little house on a hill. To those who were passing by she said, "I built a little house on a hill."

She said, "I built a little house on a hill. To those who were passing by she said, 'I built a little house on a hill.'"

She said, "I built a little house on a hill. To those who were passing by she said, 'I built a little house on a hill.'"

She said, "I built a little house on a hill. To those who were passing by she said, 'I built a little house on a hill.'"

She said, "I built a little house on a hill. To those who were passing by she said, 'I built a little house on a hill.'"

She said, "I built a little house on a hill. To those who were passing by she said, 'I built a little house on a hill.'"

She said, "I built a little house on a hill. To those who were passing by she said, 'I built a little house on a hill.'"

Convenient Nests Easy to Keep in Good Order

Good nests are easy to clean and easy to get at when collecting eggs. They are most convenient to reach when located under the dropping boards or on the side walls. Unless the dropping boards are at least four feet from the floor, the nests should not be under them.

There should be one nest for every four birds in the pen. A box 12 by 12 inches is the most suitable size for the average bird. A 1 by 4-inch piece placed about four inches in front of the nests will give the hen a place to step from into the nest. By hinging this strip it can be used to close the nests against pullets in the fall and the broody hens in the spring.

The New Jersey experiment station ranks nesting materials in the following order: hay, shavings, sawdust and straw. To make cleaning easy, they suggest building nests in sections 12 by 12 by 16 inches, with a strip in front of 1 by 4-inch material to hold in the nest filler and a similar strip for the back of the nests. This sets on a platform the width of the nests and as long as the row of nests is to be. The nests are covered with a top of matched lumber which answers for the platform for the second tier of nests. When it is desired to clean the nests, they are simply pulled off the platform and all the nest material falls to the floor. These nests can be used either under the dropping boards or on the side walls.

Chicken Lice Destroyed by Dipping in Solution. Chicken lice can be easily destroyed by dipping the birds in a solution of kerosene and water. This solution of kerosene and water is made by mixing one part of kerosene with ten parts of water. The birds are dipped in this solution for a few minutes and then dried.
