
WATCH THE INCUBATOR WHEN HATCHING CHICKS

Raleigh, N. C., Dec. 1.—Incubators are in use during winter on many North Carolina farms and in commercial hatcheries from which young chicks are supplied to the trade. To be successful with the hatch, the incubator must be carefully looked after.

A fertile egg with a strong germ will hatch into a strong, vigorous chick if care is taken in supplying the proper heat, plenty of moisture sufficient ventilation, and the egg is turned. A chick hatches normally in 21 days but the amount of heat determines this time and if the eggs are kept too hot, the chicks may hatch in 19 to 20 days. According to A. G. Oliver, poultry extension specialist, at State College, the heat occurs in the incubator in layers and for best results should be 103 degrees on top of the eggs, 100 degrees at the middle of the eggs and 97 at the bottom. During cold weather the heat zones are narrower and where air is forced through the machine, the heat is properly distributed.

Mr. Oliver states that moisture in the incubator is next in importance to heat. Too much moisture prevents evaporation and causes the chick to become strangled with liquid in its attempt to breathe. Too little moisture, causes such quick evaporation that the air cell is so large the chick cannot break the shell to get out. It reduces the amount of food in the egg and results in a small, undersized chick being hatched.

Ventilation brings to the egg oxygen and takes away the poisonous carbon dioxide gas. The chick is a factory, says Mr. Oliver, using the oxygen and egg material to build a body and expelling the gas. Thus it is important to ventilate the incubator so as to adjust this process to correct proportions. By carefully turning the eggs, all of these things are equalized in the egg and the embryo is given exercise.

Mr. Oliver advises any one first beginning to run an incubator to write for a free bulletin telling how to do it.

Ford

TUDOR SEDAN
$580

To anyone familiar with closed car values, it is amazing that such quality and workmanship can be had at this low price.

Everyone admires the smart lines and the cozy interior, with its strong, hand-built seats and attractive upholstery. Windows and windshield are of fine plate glass.

Inspect all the new features at any Authorized Ford Dealer's showroom. Any Ford car can be purchased on very easy payments.

Runabout	$260
Touring	290
Coupe	520
Fordor Sedan	660

Closed cars in color. Demountable rims and starter extra on open cars. All prices f. o. b. Detroit

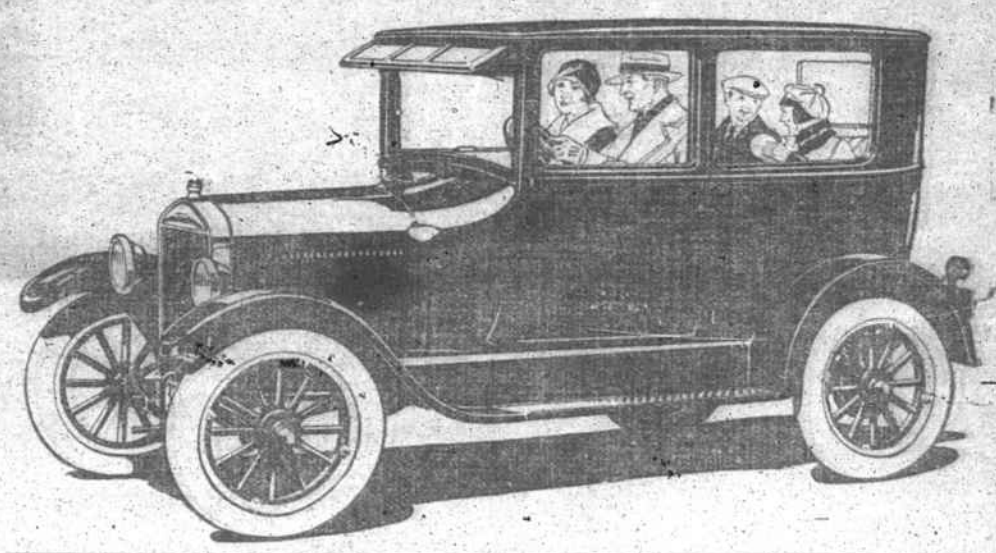
Detroit, Mich.



FARM PROGRESS PROMOTED BY ORGANIZED EFFORT

Raleigh, N. C., Dec. 1—Continued progress along the lines of improved farming is being materially aided in North Carolina by the organization of county boards of agriculture in each of the counties where farm demonstration agents are now employed.

As a general rule, these boards consist of one representative farmer from each township in a county together with a representative from the Board of County Commissioners and from the Chamber of Commerce of the county seat. Meetings are held once each month or at such other times as matters of importance to the agriculture of the county need to be discussed. Generally, there is an executive committee which takes the lead in bringing important matters to the attention of the whole board.

To show how effective such a board may be, at a recent meeting of the Board of Agriculture in Jackson County, the members agreed on a comprehensive plan for the development of agricultural extension work during 1926. The plan called for work to be done by the farm agent and the farmers in dairying, poultry, hogs, sheep, beef cattle, truck growing, soil building, horticulture and boys and girls club work. Under each of these headings, it was suggested and recommended that one or more definite things be done.

Under the head of dairying, for instance, the board stated that farmers in Jackson County should during the coming year bring in four cars of good dairy cattle; cull out four cars of scrub bottom cows; bring in ten pure bred dairy bulls; grow stock beets and legumes for cow feed; develop and promote a market for dairy products and have ten community demonstrations in better methods of dairying. In like manner were suggestions made for each of the other general types of farming. The county agent, C. W. Tilson, now has a definite plan along which he can work with his cooperating farmers through the coming year.

LODGE HERE

5 Victory Won By 1 Delegates of Person Cou.

A great Grand Lodge meeting of the Good Samaritan and Daughters of Samaritan met in Sanford, N. C., Oct. 6-7, with Prof. J. L. Pearson at the head. Never in the history of Good Samaritanism has there been a time when men and women appeared more willing to live and labor under the influence of a Samaritan spirit than at the time mentioned above, for the Master said to the young lawyer "Go thou and do likewise and thou shall live." Luke 10th chapter and 25 to 35th verses. Never in the history of the Samaritan order has reports been so encouraging, both numerically, socially, and financially as so splendidly manifested at this grand meting of G. S. and D. of S. in Sanford. Among the many bright talents from other parts of the State were Prof. J. L. Pearson, Britton Pearce, Honorable Sister Young and Rev. C. S. Stroud, State Organizer.

Delegates from Person County were W. E. Barnett, Prof. E. W. Brooks, J. W. Pettiford, Collie Bumford, Lelia Harris, Orphelia Jones, Daisy Williams and J. E. Westbrooks, and with these, by following a leader after being organized, we succeeded in electing Prof. W. E. Brooks, of Woodsdale, the Endowment Secretary and Treasurer of this grand old order, and by the assistance of our white friends we had no trouble in raising our bond of $10,000.00 and took the cash over to help swell the financial business in our own home town.

W. E. BARNETT, Reporter.

An outbreak of hog cholera in Martin County was checked recently by the prompt action of County Agent T. B. Brandon who treated the exposed hogs susceptible to the disease.

County Agent F. E. Patton of Rutherford County found that some of his Negro farmers had been paying from 12 to 15 per cent on money for five or six years. He helped them to apply for a farm loan.

DOES YOUR BACK ACHE

Bad Back Bring Suffering to Many Roxboro Folks

Is that dull, constant backache making you old and miserable? Does your back throb and ache until it seems you just can't keep going? Do you suffer headaches, dizzy spells and urinary disorders; feel weak, tired and worn-out? Then look to your kidneys. Delay may mean serious kidney sickness! Use Doan's Pills—a stimulant diuretic to the kidneys. Doan's are recommended by Roxboro folks.

C. E. Brooks, farmer, R. F. D. No. 3, says: "Backache came on from a strain and I couldn't do any heavy work. When I got down, it was all I could do to straighten again. Nights I seldom got an hour's rest, as every time I moved, a sharp pain stabbed through my kidneys. My kidneys became weak and acted too freely. Doan's Pills completely rid me of the trouble and I haven't been bothered since."

60 cents at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Hall's Catarrh Medicine is a Combined Treatment, both local and internal and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists.
