

Treat Seed Oats For Smut Control

Raleigh, N. C., Oct. 11.—The smut diseases of oats can be largely controlled by treating the seed before planting with a weak solution of formalin. The treatment will insure clean oats and bigger yields. There are nine important points to observe when treating the oats and these are outlined by G. W. Fant, extension plant disease specialist at State College, are as follows:

1. Seed to be treated should be placed on a hard-surface floor (concrete or wood) where the moisture from the treating solution will not be injurious.
2. One half gallon of treating solution is required to treat each bushel of grain.
3. The amount of solution needed for treating the seed is calculated from the amount of seed to be treated.
4. Prepare the solution in the proportion of one pint of commercial formalin to 40 gallons of water. If, for instance, ten bushels of seed are to be treated, five gallons of treating solution will be needed. Prepare this by adding 1.8 pint of commercial formalin to five gallons of water (proportion the pint to 40 gallons water.)
5. The solution should be sprinkled on the grain as it is shoveled from one pile to another. Use the ordinary sprinkling can and scoop shovel for this purpose. See that all the grain is wet in the sprinkling.
6. After the sprinkling is over, stir the seed with a shovel so as to insure all the grain being wet.

DR. S. RAPPORT of Durham OPTOMETRIST

Specialist in examining eyes and fitting glasses will be in Roxboro at Davis' Drug Store every first Wednesday in each month. His glasses will give you real pleasure and satisfaction. They are accurately fitted in every detail. They feel right and look right. Charges reasonable.

My next visit will be Wednesday November 3rd.

7. Cover the pile with sacks for one to two hours in order to hold the fumes. Then spread the seed out in the air to dry.

9. Make allowance for the swelling of this grain by regulating the drill so as to sow the proper amount per acre.

Tarheel Farmers Must Study Market Reports

Raleigh, N. C., Oct. 11.—Faced with a price below the cost of production and one of the largest crops of cotton ever produced in the South, it is time that farmers of the State gave more attention to market reports and arranged their production to meet the situation.

This is the opinion of Dr. G. W. Foster, head of the department of agricultural economics at State College. Early in 1925, Dr. Foster's department issued an outlook for the cotton crop for this year in which it was pointed out that the American cotton crop for this year would likely be as large if not larger than in 1925. Two seasons pre-

vious, said the report, the production of cotton had exceeded consumption and cotton stocks had increased. The domestic and foreign demand would not materially increase in 1926 but would likely decrease and production costs would be about the same as in 1925. These predictions based on a survey of the situation in the entire Nation and on facts established by many years of observation and research have proven to be true this fall.

Dr. Forester states that the chief advantage had by the cotton farmer is his control over the supply of cotton. This control comes through the control over acreage. It has been proven that 54 per cent of the actual supply of cotton may be attributed to changes in acreage and 48 per cent to weather conditions. It is evident therefore that cotton farmers can, if they wish, exercise control over the supply and hence over the price. Dr. Forester does not believe in the efficacy of campaigns for the reduction of acreage. They have been failures, he states, but if farmers were conscious of the fact that the acreage intended

for cotton was going to be materially increased, they could revise their plans and cut down their acreage. Where the farmer has no idea before planting just what the acreage will likely be, he has no basis for intelligent adjustment of his acreage.

JUNIOR ORDER MEETING

Roxboro Council No. 121. Meeting opening at 8 o'clock P. M. All members requested to be present. Visitors of other orders invited.

ROBERT LUNSFORD, R. S. W. K. MOORE, Councilor.

JUNIOR ORDER MEETING

Loughran Council No. 520 meets every Monday evening 7:30. Come to these meetings members. Moments of importance comes before us often which you should know about. LEMON OLIVER, Councilor. O. J. BLUE, Rec. Sec.

Better lubrication from the moment the motor starts — that's the secret of the new oil

7 Advantages of "Standard" Motor Oil

1. Constant lubrication.
2. Minimum friction.
3. Less "breaking-down" under load or at high speeds.
4. More miles per quart of oil.
5. Better hill climbing—smoother operation.
6. Negligible carbon.
7. Actual saving in gasoline.

HUNDREDS of road tests on all types of cars and trucks prove that the new "Standard" Motor Oil produces results never before associated with motor oils.

Typical of these tests is one with a Dodge, run over a 1,080 mile course from September 24th to October 22d, 1925, under engineering supervision. This test revealed 40.9% increase in oil mileage; 10% increase in gas mileage; smoother operation of the motor at all speeds; more power; less drag on the hills—all due to the remarkable lubricating properties of the new oil.

You can verify these astonishing results in your own car. Just have your crank-case drained, flushed and filled with the new "Standard" Motor Oil. Then expect results. You can actually feel the difference.

Roxboro and Person County

BOOSTERS CLUB

C. H. Hunter, Secretary

Roxboro, N. C., Oct. 12, 1926.

Mr. Farmer,
My Dear Friend:

We have organized the Boosters Club to help every one in Person County. It is in no sense a money-making venture. It's sole purpose is to help, and we want the ladies to know we have not forgotten them. We have secured the rooms under the old Post Office building, corner of Main and Depot Streets, and want them to use it for a "Rest Room." Water, lights, toilet, and all conveniences. It will be open at all times for your use.

We are glad to say that the Roxboro Tobacco Market is "strong," about a half million pounds were sold last week. It started off Monday better than ever, the price being around 30 cents average. Honestly, I believe you will be wise in bringing what you have stripped to Roxboro right away.

When you come to Town if I can help you in any way, call on me. My whole time belongs to the public, and I want to be of service to you.

Your friend,

C. H. HUNTER, Sec.
