

# Indian Teepee To White House

So Will Read History If Curtis Of Kansas Wins 1928 G. O. P. Nomination And Election To Presidency

Washington, D. C.,—Senator Charles Curtis, of Kansas, and leader of the United States Senate, is the first of the dark horse regulars to announce his candidacy for the Republican Presidential nomination in 1928.

In the Senator is combined the blood of old New England—the Hubbard and Curtis families of Massachusetts and New Hampshire; the early French settlers and traders—Convilles and Pappans, and an inheritance of Indian royalty, for Senator Curtis is one-eighth Indian—hereditary descendant of two well known Indian Chieftains.

He seems destined by birth for leadership. His great grandmother was princess of the Kaw tribe of Indians, a daughter of White Plume, their Chief. Her grandfather was Chief Pawhuskie of the Osage tribe, which are now perhaps the richest people per capita in the world.

The Senator's mother died, when he was three years old, and he was taken back to the Kaw reservation by his grandmother, who directed as far as possible his early years and instilled in him an ambition for greater things than riding races at the fairs and gatherings.

**Spirited From Reservation**

It was his grandmother, who, when the government started the transfer of the Kaw Indians from Kansas to a reservation in the old Indian Territory, persuaded young Curtis of the wisdom of embracing the world of his white people, and after the exodus had begun, helped to spirit him out late at night.

He walked to Topeka—some sixty-five or seventy miles, and from that time his ambition, his study and his sense for hard work have carried him steadily on and to the place he now occupies as leader of the Senate of the United States—second only to the President in importance.

Young Curtis studied law while driving a hack in Topeka. He was admitted to the bar at 21. After three years of practice he was made county attorney where he served two most successful terms. He then engaged in private practice. His clients came and so did money.

Then in 1892 "Charley" Curtis was nominated for Congress from the fourth district in Kansas.

**Out to Ride to Win**

Since that time he has spent fifteen years in the House of Represent-

Original American In Presidential Race

That's Curtis. He means he is out to ride to win.

## Gives Fertilizer Mixtures For The Tobacco Crop

Raleigh, N. C., Nov. 21.—Field tests and farm practices have determined the best fertilizer mixtures to use under tobacco for highest production and quality. These mixtures were agreed on recently at a conference of the agronomists of the southern states presided over by Prof. C. B. Williams of State College.

The findings of this committee were released last week and contain some interesting facts for the tobacco grower. The agronomists state that the best mixture for bright flue cured tobacco is an 8-3-5 except for the gray soils with red subsols where an 8-3-3 is recommended. For the light less productive soils, an 8-4-6 is advised. All of these should be applied at the rate of 800 to 1,200 pounds per acre.

If sand-drown occurs in the soils, use at least two percent of magnesia on the land derived from the potash

carriers or from dolomitic limestone.

The committee recommends that the phosphoric acid come from acid phosphate. The potash should come from sulphate of potash-magnesia, sulphate muriate or high grade of potash. Tests show that the muriate sometimes make better yields and good quality of weed but the chances are that it will give too much chlorine which affects the burning quality and the potash carriers should be so used that not over two percent of chlorine is in the fertilizer mixture.

The nitrogen should come one-half from the organic sources like cottonseed meal and fish scrap and the other half from urea or the inorganic sources such as nitrate of soda or sulphate of ammonia. At least one-fourth of the total nitrogen should be from nitrate of soda.

For dark tobaccos, the committee recommended an 8-3-3 mixture ap-

plied at the rate of 600 to 1,000 pounds per acre with the materials from the same sources as for the light tobacco.

Mrs. Youngbride—Jack, those banks are frauds! Didn't you tell me that they would lend money on notes?

Husband—Certainly, dear.

Mrs. Youngbride—Well, they won't. I took those lovely ones you wrote to me before we were married, and the cashier read them and laughed, but he would not let me have a cent on them.

If the ham hangs around the smoke house, where does the veal loaf?

Within a year now, the American people will have to make their quadrennial choice of the lesser of two evils.

The play had a happy ending—everybody was happy when it was over.

## Nurse Advises WEAK, RUN-DOWN WOMEN To Take Cardui

"I have known of Cardui for nearly twenty-five years," says Mrs. Selma Meissner, 1072 Harrison Ave., Beaumont, Texas. "During that time, I have taken it several times and have frequently recommended it to others, for it is a splendid medicine and I am glad to give people the benefit of my experience."

"I have been a nurse for several years and have often come in contact with patients who were run-down and weak. Often I have told sufferers of Cardui, and the way I, myself, had been helped after taking it, and advised them to give it a trial. Many of them have since thanked me for what I told them, so I am willing that other women should know about it, too."

"I first took Cardui because I was awfully run-down. I had no appetite, and was weak and listless. It was hard to keep going under such conditions, and I looked for something which would help me."

"I had read of Cardui and decided to try it. After taking it, I improved so much that I have taken it since whenever I needed a tonic."

Many a good car would go to the scrap heap long before its time if it were not for "Standard" Motor Oil

When you stop to consider that a million or more cars drop out of the running each year, you realize how important it is to have the right lubricating oil. Always ask for it by name.

# "STANDARD" MOTOR OIL

The Measure of Oil Value

FIVE HUNDRED DOLLARS

What will you do with it?—You haven't got it you say. Well, you could have had it—if you had started only a short time ago—to deposit regularly every week—or every month, a part of your earnings.

A dollar here—a dollar there—tossed off for this or that needless luxury or pleasure—seems so little—but in the aggregate they soon mount up to a sizable sum.

Many big and successful business ventures have started on a sum less than \$500. If you had \$500 today—you could be keeping eyes open for opportunities to make a safe investment—and have that money working for you.

Or—you could ask us to assist you by offering suggestions of ways to increase your savings—then soon—it would be \$1,000.
