

### Doctor Makes Incision In Cuban's Hand, And Out Jumps Small Frog

Havana.—This is the story of a frog. In fact, it ought to end frog stories.

The frog who spent some 40 years entombed in a stone wall was really "small fry" compared to the yellow frog of Cienfuegos, and thereby hangs this tale—which, literally translated from a Havana newspaper, is as follows:

"A case which left astounded the surgeons and others in whose presence it took place occurred yesterday in the Municipal hospital of Cienfuegos when upon opening an abscess in the right hand of the Spanish farmer, Manuel Acosta Santalla, of the town of Abreus; hardly had the first incision been made when from the interior of the abscess there jumped a young yellow frog which had been living within the inflammation, which had given atrocious pain to the unfortunate farmer who, on realizing what occurred, could not control his nerves and fainted.

"The case was observed by various persons and many others have gone to the hospital to convince themselves. The doctors explained the case by saying that possibly Acosta Santalla, who had an injury in the same place as the abscess, had washed it when the injury occurred, in some creek or puddle containing frog eggs, one of the eggs remained within the wound and hatching under the heat of the inflammation and producing the pain suffered by the patient. One thing which makes the case stand out is the fact that before the operation the hand was free of bandages, making impossible any hypothesis that the batrachian might have been hiding in a fold of a bandage.

### To Make Check Of Contracted Acreage

Cotton and tobacco growers who are under reduction contracts are being cautioned by Charles A. Sheffield of State College to make careful measurements of their planted acres.

He is also urging them to designate which acres have been set aside from cotton or tobacco production so that the committees who will make a check of the acreage can do so as rapidly as possible.

It will be to the farmers' advantage, he said, to have their production as nearly in line as possible. Growers who have planted more than their contracts allow will be required to reduce their acreage or cancel their contracts and refund any rental payments they have received.

After the committees have made their check, government surveyors will make a recheck of a few farms chosen at random to determine the accuracy with which the first check was made. Corrections will be made when necessary.

The check will also be made to determine whether the growers have retired from production land which is of good average fertility and whether they have planted on the rented acres any crops which are prohibited under the contracts.

Farmers who are not complying with their contracts in every way will be given a chance to do so. If they do not bring their farms into compliance, their contracts will be forfeited.

Due to drought conditions in the middle west, the contracts have been modified so that a grower can plant forage and feed crops on all the rented acres. He may also grow for sale such crops on nonrented acres, says Sheffield.

### Firestone Opens New Series Of Garden Concerts

GLADYS SWARTHOUT

The Voice of Firestone has developed something entirely new, different in mood from anything the radio audience has heard, in the new series of Garden Concerts which started June 27, and will continue each Monday evening through the summer. The atmosphere of the summer garden, moonlit nights, the woods, the brooks, the birds and the flowers, has pervaded the selection of the new talent and the type of music to be presented.

Gladys Swarthout, the outstanding American contralto, together with a vocal ensemble and William Daly's Symphonic String Orchestra, combine to bring a delightful variety to the program. Instrumental music, Miss Swarthout in solo leads with the ensemble, together with duets, trios, and mixed quartets by members of the vocal

### Timely Farm Questioned Answer'd At State College

Question: Should breeding cockerels be selected now for us next fall?

Answer: The first point to consider is whether there is a need for new blood in the flock. Unless a definite system of breeding has been established it is best to introduce new blood from a known satisfactory source every three years. If new blood is not necessary then go ahead and select the large boned, early maturing and early feathering cockerels from your home flock. Be sure that only birds of high vitality are selected. Select about twice as many cockerels as needed as this will allow for late culling.

Question: How can I cure the scours that is prevalent in my herd of calves?

Answer: When the first symptoms appear the individual calf should be isolated and the milk feed reduced at least one-half. Legume hay should be replaced by grass hay until the trouble disappears. Give the calf a dose of one to three tablespoons full of castor oil, depending upon the age of the calf, mixed in a pint of fresh milk. Following this a teaspoonful of a mixture composed of one part salol and two parts each of sub-nitrate of bismuth and bicarbonate of soda should be given and repeated at six hour intervals until the diarrhea is checked. This trouble is caused by improper feeding such as over-feeding, using dirty pails or boxes, irregular feeding or feeding milk too rich in fat. These

should be checked and corrected before putting the calf back on the regular diet.

Question: How much feed will it take to "harden" out 75 pound pigs for the early fall market?

Answer: This depends upon the condition of the animal at start of feeding period. The accepted formula requires 35 pounds of fish meal or tankage, 160 pounds of corn meal, 22 pounds of wheat shorts and 220 pounds of corn for a twelve weeks feeding period. Rations for different weight animals and for short or long feeding periods are contained in Extension Circular 143 which may be secured from the Agricultural Editor at State College upon request.

Joseph Conrad's real name was Theodore Josef Konrad Korzeniowski.

Finland contains so many lakes that they have never been counted; the country is often called the world's greatest land of lakes.

**Relieves Headache Due To Constipation**

"Theford's Black-Draught has been used in my family for years," writes Mrs. J. A. Hightower, of Carthage, Texas. "I take it for sick headache that comes from constipation. When I feel a headache coming on, I take a dose of Black-Draught. It acts and my head gets easy. Before I knew of Black-Draught, I would suffer two or three days—but not any more since I have used Black-Draught."

### CARD OF THANKS

We wish to take this method to thank each and every one for their many kindnesses shown us during the illness and recent death of our father, J. E. Whitfield. While he was ill for months, never did friends minister more kindly than did you, and we will never forget the many kindnesses shown. May God in His richest manner remember you, is our sincere prayer.

The Whitfield Family.

Vacation time calls for an automobile in tip-top condition. Let us check yours over for you. Tires, motor, body, all need to be checked before long trips. We are prepared to do every job from pumping up your tires to an extensive motor repair job. See us today.

**Roxboro Motor Co.**

Roxboro, N. C.

### YET TIME TO PLANT NEEDED FEED CROPS

Since the drought in the middle west has greatly reduced the amount of hay and feed crops, the Agricultural Adjustment Administration has authorized the growth of such crops on all land with drawn from the production of basic crops under reduction contracts.

There is yet time to plant soybeans, sorghum, corn Sudan grass, german millet, and a few other similar crops. It was pointed out by Dean I. O. Schaub at State College.

The amount of fertilization needed will vary with the type and condition of the soil and the kind of crop planted, but he advised growers to fertilize sufficiently to produce good crops. County agents can advise individual farmers what fertilization is necessary.

With the curtailment of the feed crops out west, he said any North Carolina grower who buys his feed will have to pay exorbitantly high prices. Under the circumstances, all farmers should produce enough feed for their own livestock.

Land rented to the secretary of agriculture may be used for the production of such feed and forage crops for home use, and the farmers may grow such crops for sale on the non-rented acres.

The corn-hog contracts however, do not permit the harvesting of as many feed-crops as do the other contracts from acres rented to the secretary. Among seed which may not be harvested under this contract are: soybeans, field peas, cow peas, peanuts, and sorghums.

These crops may be grown, however, if the farmers plan to plow them under for soil improvement purposes. Feed crops which may be harvested from corn-hog rented acres are: timothy, red top, orchard grass, blue grass, meadow fescue, grove grass, crested wheat grass, clover, alfalfa, sweet clover, lespedeza, and similar pasture and meadow crops.

### FORD V-8 REDUCES PRICES \$10 TO \$20

Detroit, Mich., June 19.—Reductions of \$10 to \$15 in list prices of 1934 Ford V-8 commercial cars and trucks were announced last week by the Ford Motor Company effective Friday, June 15.

Ford prices had remained unchanged since the introduction of the 1934 Ford V-8 last December, the Ford Motor Company not having participated in the recent general automotive price increase. The reductions announced are, therefore, a decrease in the original prices.

The prices reduction on the standard and de luxe Tudor Sedans, most popular individual models in point of sales, is \$15. Prices of other standard and de luxe body types were reduced \$10, except prices of the roadster, phaeton and cabriolet de luxe types, which remain unchanged. Both standard and de luxe passenger cars have the same V-8 engine and 112-inch wheelbase chassis. Body types for both are identical except for the de luxe equipment.

The soldiers of Gen. Philip H. Sheridan's army knew him by the name of "Little Phil."

There are more than 6,000,000 farm homes in the United States.

### A WEDDING WRITE UP

Most newspaper men shrink from the task of writing up a wedding and prefer to pass that responsible duty to the female society editor. Yet there are exceptions. Occasionally an editor is found who can paint a word picture of nuptial events that any lady reporter might envy.

We discovered one like that who appears to be hiding his great talents in an obscure Kansas town, while he ought to be holding down a big city job. Here is a sample of his literary ability, which proves our point:

"It was a wonderful wedding. The girl was as sweet as any girl who ever lived; but modern. As she walked up the aisle on her father's arm, her lips lightly tilted at the corner with a happy smile, she was a picture of modest beauty. Her filmy wedding gown and gossamer veil floated around her fair blond head like a halo. She was as nearly an angel as girls get to be in this world. At the altar, as she passed from her father, the man she always loved, to the other man whom she would devote the rest of her life, her dainty slipper touched a potted lily resting on the floor and turned it over. Smiling again, she turned to the dear old pastor waiting at the chancel and said: 'That was a hell of a place to put a lily.'"

Monroe Enquirer.

### LAND SALE

**NORTH CAROLINA PERSON COUNTY**

Under the authority conferred upon me by that certain deed of trust executed on September 24th, 1929, by Henry Lawson and wife, Addie Lawson, to me as trustee, the same being recorded in the Person County Registry in Book 4, Page 231, default having been made in the payment of the bonds secured thereby and at the request of the holders thereof, I will on

**MONDAY, JULY 23RD, 1934,**  
at twelve (12) o'clock noon at the courthouse door in Roxboro, North Carolina, sell to the highest bidder for cash at public auction a tract of land conveyed by said deed of trust, to-wit:

Containing 61 and 2-3 acres, more or less, conveyed to said Henry Lawson by warranty deed made on the 22nd day of November, 1909, and registered in the office of the Register of Deeds of Person County, North Carolina, in Book 16, page 524, by C. H. Dudley and wife, Lorena Dudley, said tract of land lying in Allensville Township, Person County, North Carolina, and being bounded on the North by lands of Richard Harris, on the West by lands of Tom Barnett, on the South by lands of H. W. Harris, and on the East by lands of Abner Spatterfield.

The purchaser at the sale will be required to deposit ten per cent of the bid price as an evidence of good faith.

This June 18th, 1934.  
E. G. Long, Trustee.

When serving eggs on toast to children, cut the toast into cubes, leaving the slice in its original shape. Place the egg on the toast in the usual manner. Children will find it much simpler to manage when served this way.

In Australia there are 7,000 species of plants found in no other country.

### The Family DOCTOR JOHN JOSEPH GAINES M.D.

LENSES FOR THE EYES

All of us read accounts of hold-ups and robberies of various kinds; they are such common occurrences. But, when I learn of some villain exploiting the sick and unfortunate—fleecing them—then my blood boils! I shall talk about "spectacles" in this letter.

When I bought my first reading-glasses, I went to a refractonist to have a pair fitted. My eyes were not diseased—I knew that; they were rather tired from over-use.

The man "fitted me out." I asked for my bill. He drew near me, and said: "Now, doctor, those LENSES are a special kind; were I to charge you less than \$10. for the pair, they'd

### MILEAGE HINTS

By J. F. Winchester, S.A.E. Supervisor of Motor Vehicle Equipment, Standard Oil Company of New Jersey

MANY motorists are content to drive indefinitely with the inconvenience and discomfort caused by a wobbly steering gear. They seldom bother to remove the surplus play in the steering gear and they often seem inclined to consider hard or difficult steering as just part of the game. This shouldn't be.

Most steering gear difficulties arise from improper lubrication or the lack of any lubrication. Slipshod greasing of the car, the use of inferior lubricants or of lubricants unsuited to steering gears, wheels out of line, underinflated tires, wobbly wheels and too tight an adjustment of the steering gear are causes of difficult steering.

After a winter of rough driving over rutted roads and through snow and ice many motorists will find that their steering gears need to be taken up. This adjustment is not difficult and should be made immediately to insure comfortable driving and to prevent the possibility of any difficulties with this part of the car later in the year. At the same time this is done have the engine steering apparatus checked and lubricated and keep it lubricated properly if you would prevent wear and provide easy steering.

take the agency away from; but the FRAMES, I can make you at fifty off."

He HAD to charge me \$10 for a pair of lenses that cost the maker not over \$1.30. As this transaction was over twenty-five years ago, we can faintly imagine the toll of the fleecers, taken from consumers, who often broke a 65-cent piece of glass, and paid \$5. for a new one to fill its place. One of the greatest brace games on earth, is the traffic in lenses for the eye. People cannot do without them, hence a monopoly of any kind, in glasses, is a walk-over.

I have seen the "train-butcher" on a passenger coach—selling spectacles to such people as he could interest; if he got \$1.50 for his wares, he made a profit of 250 percent.

I must not forget to tell you—I broke one of my \$5. lenses very soon after I began to wear them. A jeweler friend who knew things, said he'd get me a duplicate lens for 65 cents—and he did it!

It dawned on me that a manufacturer or patentee can, in this country, compel a retailer to charge the consumer an exorbitant price, and fleece him for all that can be wrung from him! It's plain villainy.

### RESOLUTIONS OF RESPECT

Whereas the Great Creator in His Infinite wisdom has called from all earthly cares Albert P. Clayton, our esteemed friend and Postmaster, whom we learned to love and respect during the years spent under his kind supervision; and

Whereas his passing is a great loss to all those who enjoyed the privilege of his association; his wise counsel was sought by many and always cheerfully given; and

Whereas, by his parting, his surviving relatives and friends have lost a most loyal friend and companion; therefore, be it

Resolved, That we, the Postal Clerks and Rural Carriers of the Roxboro Post Office, extend our deep and heartfelt sympathy to Mrs. Clayton and her family. May they be comforted by the realization that our lives have been made richer, and our characters strengthened by the association with this good man, a Christian gentleman; and be it further

Resolved, That a copy of this resolution be sent to his bereaved family, a copy to the Roxboro Courier and to the Person County Times for publication.

N. H. Fox,  
N. A. Edwards, Com.
