A Wonderful Invention.

Zoology teaches us that the hairs of the
head are hollow, and contain an oil that
gives them life. In clipping the hair with
scissors, this hollow is left open, and the hair
loses its life-giving properties.

I have a Machine named the **Singeing
Machine**, which removes the hair and at the
same time closes up the hollow causing the
hair to retain its life-giving properties, and
therefore stopping the hair from falling out
or dying and giving it a soft life growth.

Call and examine this machine and have
your hair singed.

Special attention given to dressing Ladies
hair. Cutting hair done with exquisite and
artistic skill by the old University Barber of
twenty years experience.

The Singeing Machine is highly recom-
mended by scientists throughout the coun-
try.

Very respectfully,
T. D. DUNSTON,
Professor of Tonsorial Art.
