### Foot-ball Prospects.

(Continued from first page).

will help the 'Varsity along considerably. He is a strong, heavy man and just about as gritty "as you make 'em."

Haywood, Allen, Rogers, and Lake of last year's Scrubs are also applying for the team.

Rogers applies for end this year. He is a good tackler, gritty and strong.

Harry Lake will try tackle. He is in good trim and means to hustle somebody for the team.

Green, McCullen, Spencer, Williams, Hayes and many others are working hard and steady and will certainly make the Scrubs if not the 'Varsity.

Mr. Gordon Johnston, Princeton '95, has arrived on the Hill and will coach the team this season.

Mr. Johnston comes to us with a brilliant record both as a foot ball player and as a gentleman, his family being among the very best in the South. Phil. King says "Johnston knows more about foot-ball than any man in the United States."

Manager Carmichael is to be congratulated on securing Johnston as a coach, and we feel assured that if the men follow his instructions and do their duty with a firm resolve to win, success will be our's.

Though you have a good coach and a good captain and all the prospects are auspicious, still you must not be over confident, you have got to work hard to win the championship of the South—and win it you must. No positions are secure, the team has not been selected, and all the places are open to the best foot ball players.

This article is merely a forecast, a prospectus, and each applicant can rest assured that his position will be contested and a "survival of the fittest" will rule in this case.

The present freshman class has made a good start. It showed up well at the recent meeting of the Athletic Association and is well represented on the track and foot-ball teams. If they will only keep up the good beginning and at once identify themselves with all the organizations of the University, they will acquire untold benefit and turn to account their effervescent college spirit. The reason that our teams are made up of seniors and graduates is no more because they never are trained before they get here than because it is a custom to wait to begin training. Don't let the waiting spirit get hold of you.

If you have sufficient endurance go in for foot-ball with all your might; the trainers stand ready to do all in their power to help you make your name an athletic by-word. On the other hand, the Literary Societies welcome every acquisition and promise to every, seeking in good faith to fit himself for a higher position in life, a handsome return for all work.

From time to time there will be notices of other organizations with varied purposes; let them have your consideration. If no other good is accomplished they will take your thoughts from yourself and keep you from getting homesick.

Will Hunter has converted one of the old dressing rooms of the Commons Hall into a bicycle repair shop. He seems to be well up in the bicycle repairing business.

### Facts and Fancies.

This is about the time of year that the young psychologist sprouts. He paddles around in the "deeper facts of life," well satisfied with his discourses and quite content that he has controlling stock in the monopoly of knowledge. We should not be surprised at a failure about Christmas, however, with H. H. Williams, assignee.

We understand that several good men are not content to stop with the resolutions adopted by the Soph. class but intend to organize a national Protective Freshman Association whose motto shall be "For home and our infant industries." It's a good idea.

There has been a great deal of complaint about the poor service in the reading-room this session. There are but very few file papers and even they are not put on when they come. It is strange that the authorities have not subscribed to Leslie's or Harper's.

And while we are kicking we should like to register one more: the unnecessary cost of books and materials in some departments, in the University. The professors ought to make a matter of special consideration every cent's worth they tell the class to buy. The frank gaiety some of them assume when telling a man to get four or five dollars worth of stuff causes cold shivers.

Representatives of the press are noted for their delightful geniality. Mr. Harry Smith of the N. Y. Journal and J. T. Jones of the World are no exceptions. They are on the Hill and will remain till spring reporting the progress of junior politics for their respective papers.

If you know anything at all about handling a tennis racquet you should come in the tournament next month. There will be "more fun for less money than you can get anywhere else at the same price."

## A Wonderful Invention

Zoology teaches that the hairs of the head are hollow, and contain an oil that gives them life. In clipping the hair with scissors, this hollow is left open, and the hair loses its life-giving properties.

I have a Machine named the Singeing Machine, which removes the hair and at the same time closes up the hollow, causing the hair to retain its life-giving properties, and therefore stopping the hair from falling out or dying, and giving it a soft growth.

Call and examine this machine and have your hair singed.

Special attention given to dressing Ladies' hair. Cutting done with exquisite and artistic skill by the old University Barber of twenty years' experience.

The singeing machine is highly recommended by scientists throughout the country.  
Very Respectfully,  
T. D. DUNSTAN,  
Professor of Tonsorial Art.
