Pres. Office

ALTON PACKARD.

On "Types of Uncle Sam's Folks." Star Course Address Delivered February 18th.

Mr. Alton Packard delivered the fifth Star Course Entertainment in Gerrard Hall on last Wednesday evening. His subject was "Types of Uncle Sam's Folks." Mr. Packard as a cartoonist holds a place unique and universal among Lyceum Entertainers. His great versatility, his graceful wit and genial humor added to skill as an artist, musician, and impersonator enabled him to present an evening of rare enjoyment.

He began his lecture by portraying the four seasons of a hat. First it appeared upon the head of the bloated bond-holder; upon next his coachman; then upon the drunkard, and lastly our friend "Happy Hologon."

He then made sketch in similarity in expression, beginning with a Chinaman, passing on through Jew and Irishman, finally ending with the old negro preacher. He next attacked the Anglo-maniac, telling several good jokes at the expense of our cousins across the pond. The Indiana hoosier also came in for a share of attention accompanied by lines from James Whitcomb Riley. He also demonstrated his ability as a sculptor by carving, from a seeming block of marble a Cupid's head.

Next he showed types of Uncle Sam's women, beginning with the typical American girl and ending with the Old Maid of Boston, who dipped into science, read medicine, and attended all anti-societies, while her father stayed home and darned socks.

He discussed the Delsarte woman at length and cited lines showing how even Delsarte could be turned to good account.

He closed the evening with a landscape showing the evolution of a Cuban wilderness into a modern city with sky scrapers, rail road, and the Carnegie Library, and all other late improvements. His parting advice was "Keep cheerful."

A New Book Coming.

I am now asking the citizens of the State to send me any copy or copies of Original Poems they may have in hand—such poems as have not heretofore been published in book form. I will have them examined by a committee of scholars.

Any poems that are accepted and published in the book will entitle the author of such poem to a copy of the book free, when issued.

The book will be neatly bound in cloth, and will contain about 300 pages, and retail at \$1.00 per copy.

Also any newspaper copying this note and sending me a marked copy of the paper, will get a copy by mail free, when issued.

LEVI BRANSON, Publisher.
Raleigh, N. C., Feb. 15, 1903.

Music.

Address by Dr. C. A. Smith—"Some Southern Orators of Antebellum Days."

Music.

The exercises will begin promptly at 11 o'clock. Everybody is cordially invited to be present.

Review of the February Magazine.

The February issue of the Magazine comes to us with a new name at the head of the "Editor's Page," but judging from the contents and the get-up it is still in the hands of its friends.

On the editorial page we have these words: "A college magazine should represent the institution's serious thought, * * what goes in it should be worthy of preservation." This seems to be a statement of the policy of the present editor-in-chief, and in the frontispiece and opening article, certainly, he is living up to his ideal. It is eminently fitting that Dr. Linscott should have the place of honor in this issue of the University Magazine. His address on "Pure Scholarship and the College" needs no comment. It is well known to University men and the State in general. It is worthy of preservation. We are all indebted to the Magazine for publishing the few short poems of Dr. Linscott. They serve to show us how "symmetrical, rounded, and perfect like the sphere," to use his own words, his life and scholarship was.

The article by Mr. Wilson, "Critique of Westward Ho," is a valuable and interesting paper. It is a carefully worded well written piece. The setting of the story is especially well given, and shows us something of the spirit of adventure and of the full free life of Elizabethan England. The bibliography will, no doubt, be a help also, to students of Kingsley.

The article entitled "More University Days Seventy Days Ago," adds materially to the interest of of the number. We are liable to forget what manner of men our forefathers were in their youthful days. The above mentioned article will lead to the conclusion that they were at least indued with something of the same kind of human nature that some times expresses itself in the college student of today.

The piece of fiction by D. A. B. is good, and displays some talent on the part of the author. The tone of "A Summer Episode" is well sustained throughout.

The account of the "Washington meeting of Scientific Society" will be read with interest by all.

We consider this issue of the Magazine up to the standard set for it this year. We only regret that the students themselves will not permit the editors to put in more distinctly student work.

H. M. F.

Prep English.

Prof.—Illustrate the use of the conjunction "but" in a sentence.

Prep—I saw the goat "butt" the man.

Prof.—Explain.

Prep—"Butt" shows the connection between the goat and the man.
