## \$5,445,869 More a Year for Tobacco Farmers

The total value of the tobacco yield for the eight Tobacco States is over \$59,554,181 annually. With the same acreage the tobacco growers in these States could, by improved methods of cultivation and fertilization, undoubtedly increase the total value of the crop to \$65,000,000.

## Virginia-Carolina Fertilizers

are compounded with the utmost care, containing only such elements of plant foods as can be taken up and properly assimilated by the plant without causing injury to its quality. Years of investigation of the cultivation and fertilization of tobacco enables the Virginia-Carolina Chemical Company to furnish fertilizers of superior quality for the production of this crop.

Mr. J. W. Rogers, R.F.D. No. 4, Durham, N.C., writes: "I have been using your fertilizers this year and the crops are the best looking I have ever seen—especially the tobacco crop. I have never seen any other fertilizer which acted as quickly as yours does. The leaf is large and waxy, cures bright, and I am satisfied will bring a big price. Also, my neighbors in this district use your fertilizer with the best results."

Is there any reason why you couldn't do as well? Be sure and ask your fertilizer dealer for a copy of the 1909 Virginia-Carolina Year Book or Almanac, or write our nearest sales office and a copy will be sent you free.
