VOL. 23

UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL, N. C., THURSDAY, NOVEMBER 12, 1914

NO. 9

V. M. I. 7-CAROLINA 30

Tar Heel Braves Take Another Scalp.

NEW RECORD WAS MADE

Two Touchdowns Made in One Minute. Reid Stars At Fullback.

Carolina continued her unbroken string of victories by easily defeating the V. M. I. team at Charlotte, 30-7. Seemingly at no time were the Cadets dangerous. Their one score was the result of a fumble by Capt. Tayloe on the 18 yard line, Bain recovering and going across for a touchdown. Throughout the remainder of the game the Cadets were on the defensive except for the last moment or two before the final whistle.

Again Carolina played nothing but straight football except in the few instances when forward passes were tried. It was the same old crushing game. No chances were taken in allowing anyone to see anything new. The Charlotte fans understood the situation. They knew that everything is going to be staked on the Thanksgiving game.

Carolina's offensive work was greatly aided by the punting of Tandy and Foust. The punter for the Cadets was completely outclassed. Then again Carolina outweighed her opponents several pounds to the man.

Reid's work at full was the outstanding feature of the game. He picked his openings well and plunged through them fiercely. His work in running interference was also good. Winston feathered with an 85 yard run through the entire V. M. I. team for a touchdown from kick off. Capt. Tayloe, Tandy, Bridges, and Ramsay played their usual good game. That means that they starred. To use an expression which has become somewhat trite this year, the whole team played good ball. Every man on the team showed up well. Bridges lived up to his reputation by showing the fans just how a quarterback should. Time after time he reeled off runs for substantial gains.

In the opinion of the fans a record was made in the game--two touchdowns within one minute. Immediately after Bain scored after a fumble Winston received a kick off and ran 85 yards for a touchdown within one minute.

The lineup:
CAROLINA Position V. M. I.
Winston..... Bucher
Left end
Ramsay..... Somers
Left tackle
Cowell..... Kidd
Left guard
Tandy..... Beasley
Center

THE SUFFERERS MAKE CRY

Anti-Germanic Demonstration Takes Place at Swain Hall.

Sunday night at supper-time there was a pseudo riot among the patrons of Swain Hall which was occasioned either by the tardiness of the arrival of food at a few of the tables or sparseness of it after its arrival. Quite a crowd gathered in the open space in the middle of the hall and invited the new manager, who is a German by birth, to come forth from the recesses of the pantry and explain himself. Yells were given which varied from "Bring on the Grub!" to "Hurrah for the Allies!" and "Dowit with the Germans!" As the sought for member of the latter nationality did not appear, it was rumored that he had followed the example of the well-remembered phrenologist, Professor Freys, and had shaken the dust of this community from his sandals, but later developments showed that this was not true. The new manager realized that the uproar was good-natured in its intent, and merely had no desire to deliver a speech. Accordingly he did the thing which seemed to him best and remained at his post in the culinary department.

AN INTERESTING DISCOVERY

Dr. Herty and Mr. Killeffer Discover True Composition of Rosin.

Dr. Herty and D. H. Killeffer in their work on rosins in the chemical department, have recently found a very serious error in the work of the renowned Dr. Tschirch of the University of Berlin on the same subject. Dr. Tschirch found, that by the action of an alcoholic solution of lead acetate on an alcoholic solution of the rosin-acids, he could effect a separation of them into two parts which he believed to be different. On this difference he bases the identity of some twenty-six of these acids in his book, "Die Harze und die Harzbehalter". Dr. Herty and Mr. Killeffer have shown that these parts into which he separated the acids were identical and believe they have found a way of overcoming the difficulties which led him astray, but have not yet announced it in detail.

Jones.....Campbell
Right guard
Gay.....Murphy
Right tackle
Williamson.....Goodman
Right end
Bridges.....Marshall
Quarter
Tayloe.....Holderby
Left half
Burnett.....Bain
Right half
Reid.....Oakes
Fullback
Umpire, Ritch (Georgetown);
Referee, Klutz (Davidson);
Headlinesman, Fetzer (Davidson)
Time Keepers, Shotwell (V. M. I.); Wiggins (Carolina).

FOODS AND FARMING

Mushrooms and Water Wheels Discussed

SCIENTIFIC MEN MEET

Dr. Coker and Prof. Hickerson Lead Interesting Discussion

At the 214th meeting of the Elisha Mitchell Scientific Society Tuesday evening in Chemistry Hall Dr. Coker showed the different kinds of mushrooms and in explaining them told how to avoid the poisonous ones. Prof. Hickerson followed him with a thorough explanation of the Hutchinson Overshot Water Wheel.

Dr. Coker began by saying that he had seen a recent article in a German newspaper urging the German soldiers to learn to eat mushrooms. Thousand's of dollars worth of food is at present going to waste because the people do not eat mushrooms. A great many deaths have occurred, however, on account of eating mushrooms. Among the number are noticeable many great men, such as Pope Clements VI, several emperors and kings, and the recent Russian ambassador to the United States. Twenty-two deaths occurred in New York City in one week for which poisonous mushrooms were responsible.

Most all mushrooms are to some degree poisonous, but the most deadly are the white ones. They are death dealing. Little cups at the bottom of the stems are other signs of poison. Furthermore, Dr. Coker said that any kind of mushroom ought to be experimented with before that kind is eaten. The best way to test one is to feed it to some lower animal. If it does not hurt the animal, one of the same kind could be safely eaten by a person. There is one kind of mushroom that has the same effect on a man as alcoholic drinks. It makes him drunk, but seldom kills.

At the end of Dr. Coker's speech Dr. Battle said in his usual emphatic manner: "Boys, the safest way to solve the mushroom problem is to keep them out of your stomachs." Dr. Battle also spoke of Dr. Mitchell, from whom the society is named.

Prof. Hickerson began by a brief outline of the different systems of water works in use on the farms and the sources of supply. He first mentioned gravity, the hand pump, the gasoline engine, the windmill and the hydraulic ram, and then he took up the Hutchinson pump. Last summer Prof. Hickerson was looking for a good way to get water from a spring to his house and barn up on the hill. He happened to see the first advertisement of the Overshot Wheel.

A MEMORIAL TO O'HENRY

State Historical Association to Present Handsome Tablet.

The State Historical and Literary Association at their 15th annual meeting to be held in Raleigh Tuesday and Wednesday, December 1 and 2, will present to the state a handsome memorial of William Sidney Porter--O'Henry, born in Greensboro, North Carolina. Dr. Henderson of the University, who is the President of the association, will present the tablet to the state. Governor Craig will accept it. The tablet will be placed on the wall of the State Administration Building in the department of the North Carolina Historical Commission.

At this meeting Dr Henderson will make another speech on the Projected History of North Carolina Literature. Prof. E. C. Branson will also give a short address on the Vital Study of the County. The address on O'Henry will be delivered by his boyhood friend and authorized biographer, Dr. C. Alphonso Smith, now of the University of Virginia.

TOM BOUSHALL AT THE Y. M. C. A.

The Doubts of College Man Discussed Tuesday Night.

Thomas Boushall made the regular Tuesday night talk in the Y. M. C. A. on the subject, "The Doubts of a College man". The main idea of his speech was that God is an infinite spirit which pervades the whole world. To make ones outward actions correspond to ones inner conceptions of is the test of ones Christianity. God is a great spirit and the only things that a man will be held accountable for are his various attitudes toward the great moral questions of the day. A student's conception of God changes a great deal in the period between his entrance as a Freshman and his exit as a Graduate. When he enters he has a definite conception of God as a finite being who has fixed place of residence, but this conception is soon broken down in the light of science and philosophy in which he lives, and consequently the student goes through a period of great doubt. After a period of meditation and thought he comes to realize that there must be something which created everything and controls everything, and his conception of God is revised. When he adopts this conception as the foundation of his Christianity he come to know that infinite peace and good fellowship which results only from being in perfect accord with the Highest Power.

Mr. Starr will lead the discussion next Tuesday night on the subject of "Bible Study."

Lewis Thorpe, of Rocky Mount, was initiated into the Zeta Psi Fraternity last Friday.

TEAM ON LAST LAP

Begins to Make Final Preparations

EVERY MAN DETERMINED

Tar Heels Will Wrest From Virginia Long Withheld Victory.

The showing that Wake Forest made against South Carolina in the game last Saturday leads the Tar Heels to think that the coming game in Raleigh will not be a very hard one. Every man of the squad, however, is working like a Trojan, not so much for the Wake Forest game but for the great clash with Virginia. Every man is going into the Thanksgiving game with the determination to win, even if victory means the loss of all his dearly beloved front teeth, not to mention legs, arms, and ribs; they are "One equal temper of heroic hearts, strong in will to strive, to seek, to find, and not to yield". They are a body of men of which any University would be justly proud.

Secret practice, begun last Monday, will continue until Thanksgiving. This entire time will be devoted to the perfecting of new plays.

In the game last Saturday Winston played well but was not in the best physical trim on account of having missed several practises. The sub ends have not shown up as well as they will later in the season. So far Williamson is the best, but is light and not fast enough. Bates and Grimsley have not shown what they are capable of doing. Bourne has hardly been in fit condition to play. Bates has been tried out at end for two days and is heavier than any other candidate, but allows interference on defence to get into body and keep him out of plays. On offence he has shown ability to interfere for runner. Ramsay at tackle has been playing his usual steady game. Right guard and right tackle are still open; the fight lies between Foust, Gay, and Jones. F. Jones must get down to hard work, or the others will beat him out. Hambley is improving every day as sub tackle, and Tayloe, J. is developing into the best defensive tackle on the field. Jones, J. has to improve in passing for kicks and direct passing; his defensive work is good. Andrews is improving rapidly with the flight of time and will give the regulars a warm contest. Tennent seems perfectly satisfied to have made the Georgia trip, and since he has shown nothing. As a result of being out of the game since the struggle with Vanderbilt, Bridges showed up worse after he first went into the V. M. I. game than he has at any time during the season; by their suggestions, the backs, interfered too much with his running the team. After
