### CHRISTMAS SEAL SALE IS NOW ON IN EARNEST

Local Tuberculosis Prevention Committee in Charge—Negro Sanatorium is Planned Here.

The fourteenth annual tuberculosis Christmas seal sale began Monday, November 28th, under the auspices of the Health Department of the local Community Club. Seventy-five per cent. of the proceeds from the sale is retained by the committee for the relief and prevention of tuberculosis in the community. The remaining 25 per cent. is sent to state and national associations.

Since the mortality from tuberculosis among the negroes is very great and since they are a menace, and a source of infection to the whites, it is the object of the local committee to establish a sanatorium or open air camp for the colored tubercular. This method will not only mean a chance of recovery for the patient, but will mean protection from infection for the immediate members of the patient's family, as well as for those with whom they come in contact, both white and colored. Later when the colored sanatorium is in running order, it is the ambition of the committee to have the entire county work for a county tuberculosis sanatorium for white people.

The committee therefore asks the co-operation of the students and the town people in this most worthy cause. It means only a small sacrifice on the part of the individual, while we cannot place an estimate on the value of good health to the University and the community in general. Buy tuberculosis Christmas seals and help deal a death blow to one enemy, tuberculosis.

### MANY MINISTERS WITHOUT CHARGES

There is no shortage of ministers with the Baptist denomination in North Carolina according to the report of Mr. E. L. Middleton, statistical secretary of the Baptist state convention. His inquiries reveal the fact that there are 330 ordained Baptist ministers in the state without charges. A new crop supply of ministers is being trained, there being 196 ministerial students in the

### SIGMA DELTA CHI INITIATES SIX MEN

Five Members of Tar Heel Staff Are Initiated Into National Journalistic Fraternity.

After a hectic period of running down fake assignments and interviewing various campus celebrities on various and sundry subjects six neophytes were last Thursday night initiated into the journalistic fraternity of Sigma Delta Chi.

The men initiated have all shown up prominently in campus journalistic circles, and have voiced their intention of entering an active pursuit of journalism as their life work. Four members of the editorial staff of The Tar Heel, were among those taken in.

A feed was given after the initiation ceremonies in the garret room of the "Y" where the scribblers hold their meetings. The term "Scribblers" was the name applied to the organization before it affiliated with the national fraternity of Sigma Delta Chi, an organization numbering more than thirty chapters.

The men initiated were: Robert L. Thompson, Jr., of New York, Marshall Y. Cooper of Oxford, R. S. Pickens of Morganton, and C. Y. Coley of Rockingham.

### Gold Footballs Ordered For 1921 Football Men

Wednesday night the entire student body contributed to a fund that goes to buy gold footballs for the members of the 1921 football squad. No institution on the campus has ever received a heartier response from the student body, and no practice ever instituted at the University has the same significance as that of buying for the football men these gifts.

A number of men on the squad will receive these emblems from the student body. The gold footballs will be ordered at once and as soon as they are received the men will be presented with them before the entire student body.

schools with all of the schools not reporting. There are 893 pastors and general workers actively engaged in ministerial, evangelistic and other work.

### STUDENT DIRECTORY OUT FOR THANKSGIVING GAME

New Directory, Issued By Y. M. C. A., is Complete Index to Residence and Other Facts.

According to its promise, the Y. M. C. A. promptly issued the directory of the students and faculty of the University on the day of the Virginia game.

Upon returning to his room after dinner on that memorable day, the student was surprised to find on his desk, a nicely bound, pocket size directory with all possible information about any student, his class, his home town, and his room number. And not only about the student but about his "prof." also, in case he might have occasion to visit him some night before exams.

Secretary Comer of the "Y" states that it was the purpose of the compilers of the book to insert statistics, such as the total number of students registered to date, the number of freshmen, the number of co-eds, the number of students from the largest counties of the state, etc. All of this would have materially added to the attractiveness of the volume, but in the rush to get the book out in time for visitors attending the game, it was impossible to obtain such statistics.

### SAYS ANYONE CAN LIVE FOR 100 YEARS

New York.—Dr. Stephen Smith, who is nearly 100—he was born in February, 1823—sees no reason why every person with average health and a knowledge of how to live properly should not prolong the span of life to the five-score goal instead of the accepted three-score and 10 years.

You can still be an active and useful citizen at 98 and 9 months, Dr. Smith thinks, and to prove it he recently delivered an address before a large gathering, standing half an hour and making his voice reach to the farthest person from the speakers' table.

Dr. Smith spends three hours a day at his typewriter, finishing the manuscript of his latest book, which is on longevity. It is work that keeps you young, according to this authority.

When asked to give 10 important points to observe in order to attain the century mark, Dr. Smith offered the following:

- "Eat hardly any meat.
- "Drink lots of milk. If it disagrees with you, drink more.
- "Take a 10 or 15 minute nap after luncheon and dinner.
- "Sleep 10 hours."
- "Take a nap outdoors when the weather permits.
- "Don't smoke.
- "Don't eat sweets.
- "Take no alcoholic or other stimulants, like tea or coffee.
- "Avoid the easy chair; absence of work is the first step to the grave.
- "And, finally, just be natural; quit all foolishness."

Dr. Smith's mother lived to be 97 and one sister reached the age of 100 years and 1 month. He has lived during the life of every President of the United States except Washington.

Dr. Smith was sickly as a child and young man. In fact, he says he was not strong until after he reached 60. But he took excellent care of himself and was most strict about his diet, which consisted almost entirely of milk. People drink too little milk, according to him, and the excuse that it disagrees with them is nonsense. If they drink much more they would find it an easy and agreeable diet.

His daily mail contains hundreds of letters from persons asking him what they shall do to live longer. Some of the questions are absurd, he declared, and gave as an example the question received that day from a woman who said she had weak ankles and wanted to know what to do about it.

"Change your peg heel and pointed toe shoes for your grandmother's common-sense shoes," I told her. "If you can't eat eggs, cut them out; if you and do not feel fresh, walk a mile, thus pumping dead air out and fresh air into your lungs."

Dr. Smith is a native of New York State. He was graduated from the College of Physicians and Surgeons in 1851. Three years later he was appointed surgeon to the City Hospital on Blackwells Island. He founded and was president of the American Public Health Association.

### How Dates Grow.

The Arabs live almost entirely on this fruit when crossing the desert. The date is the fruit of the date-palm, which grows best in Persia, Palestine, Arabia, and the North of Africa. The stem reaches a height of 50 feet to 70 feet and throws on a magnificent crown of large leaves and a number of spadices. In the female plant these bear bunches of dates weighing from 50 to 25 pounds.

### ALAMANCE BOYS AT N. C. STATE COLLEGE

The Alamance county club held its first meeting of the year on November 2, at which officers were elected for the coming year, as follows: A. P. Cates, president; H. B. Dixon, vice president; J. F. McBane, secretary and treasurer. Alamance has fifteen boys here who take an active part in all campus activities, and are represented in all four classes.

One of our number, S. L. Home-wood, of Burlington, has made varsity football, basketball and track four years. A. P. Cates, S. L. Home-wood, J. F. McBane and R. A. Scott played important parts in the agricultural fair last week. The rest of the members of the club are active members of various student organizations on the campus.

Our club ranks among the first of the county clubs at State College.

Our motto is "Alamance First." We are for Alamance and we want Alamance to back us by sending us more men next year.

Just a few words about North Carolina State College. We have the largest student enrollment since 1918, having about 1,200 students. These men are about equally divided between our different technical courses.

N. C. State College is rapidly coming to the front as one of the leading technical colleges of the country.

### High Flyer.

It is no rare occurrence for the condor to soar to a height of four miles.

### DIES WHILE SITTING IN AUTOMOBILE IN REIDSVILLE

Reidsville, Nov. 29.—F. L. Henry, traveling representative for Weld and Cothran, cotton brokers of Greenville, S. C., died suddenly on Scales street here about 12:30 o'clock Monday afternoon. He came to Reidsville to sell cotton to the Edna cotton mills and had completed his transaction and rode up town with Superintendent John F. Scott in the latter's car. Mr. Carr stopped the car in front of Smith's book store; left

Mr. Henry in the car, and walked over to the postoffice. When he returned to the car Mr. Henry was found dead, the body being in an almost upright position. Dr. McGhee made an examination and found that the deceased's sudden death was due to heart failure. The body was carried to an undertaking establishment and prepared for shipment to Greenville.

Pockets in Garters. Recently patented garters for men include pockets for carrying money.

### THE BANK OF CHAPEL HILL Oldest and Strongest Bank in Orange County.

# Everything for QUALITY—nothing for show

THAT'S OUR IDEA in making CAMELS—the Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth, refreshing mildness and their freedom from cigaretty aftertaste.

Camels are made for men who think for themselves.
