FRIENDSHIP COUNCIL HAS SPRING QUARTER BANQUET

Freshman Organization Entertained At Parish House—Graham Rankin and Comer Make Speeches

The regular spring quarter meeting of the Freshman Friendship Council was held at a banquet at the Parish House last Tuesday night. The banquet was prepared by the ladies of the Episcopal church and served by high school girls. Visitors at the meeting were Professor Frank Graham of the history department and Mr. E. R. Rankin of the bureau of extension.

Mr. Rankin spoke to the Council on their part in the coming high school debate. He made suggestions how they could help in the entertainment of the high school visitors to the University. Acting upon his suggestion the Council appointed a committee to take charge of this work. Mr. Graham next spoke to the men on the importance of the Blue Ridge conference next summer.

Secretary Comer then spoke on

DEPUTATION TEAM HAS BUSY WEEK-END TRIP

Play Basketball and Tennis, Make Total of 45 Speeches on Trip to Wilmington.

Jaw-broken but happy, the deputation team of the University Y. M. C. A. returned to the Hill Monday from Wilmington where they had been for the week-end. The team was composed of the following men, the figures with their names indicating the number of speeches the men made: C. C. Poindexter, 10; V. V. Young, 7; L. J. Phipps, 7; E. C. Jernigan, 7; F. B. McCall, 8; Secretary Comer, 6. Total number of speeches made, 45. There was also a string quartet along, which rendered 15 programs, composed of J. H. Mendham, F. M. Dula, L. A. Stauber and R. F. Hunter. The team went to the "city-by-the-sea" under the auspices of the boys' department of the Y. M. C. A. and of all the city schools.

Beginning Thursday night at a dinner with the Working Boys' Club of the Y. M. C. A., the team started on a week-end of talks and good times, being advertised all over the city as "The Athletes" from U. N. C. Friday morning the team divided and took charge of chapel at seven different schools. Poindexter and the quartet officiated at the high school chapel with over 900 students present. Friday night they spoke at meetings of every Boy Scout troop in the city and finally at a dinner to the Hi-Y Club.

Saturday was the athletic day for "The Athletes." In the morning, however, they were entertained on the sound with an oyster roast. Then in the afternoon, Jernigan and Hunter won a tennis match over the high school champions in spite of stiff opposition. The high school reciprocated that night by winning a basketball game from Carolina by the score of 23 to 17. A feature of the game was that the girls of Fayetteville and Wilmington played between halves.

Sunday morning the University men took charge of the boys' classes of six Sunday schools, and also at church services. They also took charge of a joint meeting of several young peoples unions. The string quartet was at the Baptist church Sunday night and Secretary Comer filled the pulpit at the Methodist church that night.

the coming series of lectures by Sherwood Eddy and the importance of the freshman attending these lectures. He also explained the proposed campus budget of pooling student activity funds. The Council voted to send a special form letter to every Hi-Y club in the state explaining the Friendham Friendship Council at Carolina of which every Hi-Y boy would become a member for which purpose a final committee was appointed.

WILL TEST TWO MILES OF ROAD AS EXPERIMENT

Thirteen miles from Springfield, Ill., there is a two mile model road that has never been used. Last week test were begun that will bring about the destruction of the concrete, brick and bituminous pavements that have been built into various sections of the tract. Auto trucks will race over the Bates experimental road for months to give the highway engineers of the country information on the actual comparative value of the various types of road now being built.

Sixty-three kinds of construction, differing in kind of material, or method of design, or construction, were used in the test road. Each type of construction is made in varying thicknesses ranging from those obviously too thin to those overstrong, and it is planned to increase the weight of the trucks as the test progresses. Over twenty engineers will constantly observe with automatic machines the deflection and other effects of the premeditated and regulated traffic.

The road has now seasoned two years. It is the first road designed and built for such a test. The Illinois State Highway Commission and the United States Bureau of Public Roads are cooperating in the large scale testing venture. Voluminous test data were obtained during construction.

In 1919 heavy truck traffic caused the partial destruction of a well-built road in Illinois, Clifford Older, chief highway engineer of Illinois, explains. This failure led to the construction of the model test road. Illinois has spent over \$10,000,000 on highway construction and throughout the country many times that amount has or will be spent in the near future. The Bates road test will aid in scientific design of roads and will do much to eliminate doubtful "rule of thumb" methods, engineers believe.

DURHAM THIRD IN TAXABLE VALUES.

Durham, March 30. — Durham stands well up in the list of 25 cities of the state in the valuation of city and county taxable property.

The city ranks third among the number for the valuation of taxable property, placed at \$58,112,649. Winston-Salem tops the list, the taxable property there being placed at \$109,000,000. Charlotte comes second, with \$84,578,030; Asheville, fourth with \$55,003,789; Greensboro is fifth with city taxable property valued at \$46,000,000.

The standing of Durham county is not so high among the list. Winston-Salem leads again with \$150,000,000. For the school budget Durham ranks about fifth or sixth.

Taste is a matter of tobacco quality

We state it as our honest belief that the tobaccos used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.
