

Resource—Use Meeting Opened Here Yesterday

The fourth annual Resource-Use Education Conference convened here yesterday. Eight sessions are being held in the Alumni building, all open to the public.

The Conference, attended by teachers and school administrators from throughout the State, will continue through tomorrow afternoon.

Power resources and development will be discussed this morning by George Ross, director, N. C. Department of Conservation and Development; Dr. S. H. Hobbs, Jr., UNC, member of the board of Rural Electrification

authority; E. N. Pope, Carolina Power and Light Co., and Van Court Hare, TVA.

School programs in resource-use education will be summarized Thursday afternoon under the chairmanship of Dr. J. Henry Highsmith, State Department of Public Instruction.

National programs of resource development will be described at the Thursday night session.

Other school programs to be discussed Friday afternoon under the leadership of Mrs. Ruth Woodson, State Department of Public Instruction, are Northampton county, Nash county, and wildlife projects.

Schoolground and roadside development will be described tomorrow morning by William Snider and W. R. Phelps of the N. C. Highway Commission; John Harris, Extension horticulturist, and Dr. Weaver.

Polar Regions Are Described In New Show

Visitors to the Morehead Planetarium, though thousands of miles away from the polar regions, are "traveling" to the ends of the earth to view the heavenly bodies seen only at the poles.

The current Planetarium demonstration, "From Pole to Pole," brings the spectator a view of all the heavenly bodies, as seen from every part of the planet. An effect, especially designed to simulate the beautiful Northern Lights, is created upon arrival at the North Pole, Anthony Jenzano, acting Planetarium director, states.

The explanation of why this region is known as "The Land of the Midnight Sun" is clearly presented. Stars which never rise or set, when viewed from the Pole, come into view as the intricate Zeiss Planetarium instrument turns end over end to place Polaris, the North Star, directly overhead.

The historic, and scientifically valuable, expedition to the South Pole by Captain Robert Scott and his companions is recounted, using excerpts from his diary. Their trek is traced on a traveling map, from the beginning to its tragic end in the blizzard-ridden expanses of Antarctica.

Over 1,500 persons have already seen this presentation since it opened July 24. It will continue until August 20. Tickets are available for nightly performances at 8:30 and matinees on Saturdays at 3 o'clock and Sundays at 3 and 4 o'clock.

"Eclipses of the Sun" will open at the Planetarium Tuesday, August 21. This coincides with the annular eclipse which will occur on September 1, and weather permitting, can be most conveniently viewed from the Eastern part of North Carolina, Jenzano explained.

Dance Tomorrow

Eighth Student Union square dance of the Summer will be held tomorrow night at 8 o'clock in the Y court.

A string band will be present for the occasion and between square dances recorded music will be provided for those who wish to social dance.

All interested persons are invited to attend, either stag or with a date. Coeds, particularly, are urged to attend stag if they so desire.

7th Annual Management Clinic Set

Representatives of credit bureaus and merchants associations from a dozen states will attend the seventh annual Management Institute to be held here Sunday, August 19, through Saturday, August 25.

Sponsored by the Credit Bureau and Merchants association with the cooperation of the University's Bureau of Business Services and Research, the institute was the first such program to be established in the nation, and since then five other regional institutes have been patterned after it in various parts of the country.

Comprising a four-year course, the Institute this year will offer a graduate seminar on research methods for those already completing courses offered in the past.

A faculty of 17 specialists will conduct the courses for first, second, third and fourth year "students" in various phases of management, including psychology, collection service, employee supervision, public speaking, business communication, salesmanship, conference leadership, publications, job improvement methods, and economics of consumer credit.

"Students" will convene in Chapel Hill Sunday night for a buffet supper to be given by the North Carolina Merchants association in the Navy Armory beginning at 6 p.m.

Classes get underway Monday morning at 8:30 and continue until 4 p.m. This schedule will be followed each day.

Tuesday night, August 21, will be "Stunt Night" at the Armory, and Wednesday night will remain open to give "students" an opportunity to attend performances in the Morehead Planetarium and the Playmaker Theatre.

Color movies on North Carolina will be shown Thursday night, and Friday night will be devoted to preparation for final examinations on Saturday morning, August 25.
