This system has been selected by the employees after careful listening to our many brand names, in order to give our customers the best possible system for their money.

The Sony Receiver has more than enough power, 30 watts RMS per channel from 20 hz to 20 khz with both channels operating at eight ohms with 0.2% or less distortion.

### The Infinity Speakers

Our first choice in speakers, the model 1001 is a 2-way speaker system using a 12" woofer and two exceptional cone tweeters, one in the front, the other in the rear of the enclosure. The over-all sound is very good with a clean solid bass which would put many larger systems to shame.

### The PE 3012

Everyone's choice as the finest in the price range, complete with walnut base and a hinged plexiglas dust cover.

This system adds up to be one of the best sounding available today, but at our discounted price of 675.00, we think it sounds even better.

Other Vickers systems start at 325.00
