

## Campus Is Saddened By Dr. Chase's Resignation

Much Speculation Concerning Successor; Connor, Henderson And Graham Most Frequently Mentioned.

(By R. W. Madry)

A pall of sadness tinged with pride hung low over the University of North Carolina campus today when it was learned officially that President Harry Woodburn Chase had tendered his resignation.

In the twenty years that he has been here the University community has learned to know and to love Dr. Chase. He and his faculty have been a happy official family. They have worked as teammates and always in the closest harmony. As was the case in the Graham administration, there have been no factions in the Chase administration.

The students held him in highest regard as their leader. They respected him for his educational statesmanship and his catholic views, but they loved him most perhaps because they felt that he was so human. They never found in Dr. Chase anything that resembled sham or hypocrisy.

Mingled with this sadness and regret over his resignation was a strong pride in the great opportunity that will come to him as president of the University of Illinois, one of the half dozen largest universities in the country.

Students and faculty alike were comforted today by the thought that in calling Dr. Chase away from Chapel Hill the University of Illinois had not only given him an enlarged opportunity to serve the nation but at the same time had paid the University of North Carolina in particular and the south in general the highest of tributes.

Messages of regret and congratulation poured in all day. Most of the congratulations came from Illinois, most of the regrets from North Carolina, although a number of telegrams contained both. Dr. David Kinley, who is retiring and whom Dr. Chase is to succeed, was one of the first to offer felicitations. Then came messages from Illinois alumni association, from the faculty, student body, trustees, and numerous student organizations. They all ran in the same vein. They were all tremendously enthusiastic and gratified that Dr. Chase was coming to live with them.

One of the most enthusiastic messages came from President L. D. Cuffman of the University of Minnesota.

It is understood that Governor Max Gardner is to call a special meeting of the board of trustees to consider a successor to Dr. Chase.

If there are any avowed candidates they were not announcing themselves today. That fact, however, did not prevent the community from indulging in a generous amount of speculation.

The view was expressed by many that the next head of the

### A Correction

In Friday's Tar Heel it was stated that T. R. Karriker who has been suffering from a cold in the infirmary is dropping out of school. The Tar Heel would like to correct this report. Mr. Karriker is not dropping out of school, although he has been ill for the past week.

### Co-Eds To Receive

Miss Kitty Wells announces that the annual co-ed-faculty reception will take place next Friday evening from 8:30 to 11 o'clock. The reception will be formal and invitational, only the members of the faculty and their wives being invited.

### KNOOP ADDRESSES ENGINEERS' MEET

Tells Why Walter Craig Kerr Is Considered One Of Foremost Engineers Of His Time.

The University student branch of the American Society of Mechanical Engineers held its regular meeting last night in Phillips hall. The program presented consisted of a talk by Frederick Knoop on the life of Walter Craig Kerr and an illustrated talk by E. L. Lowery on deisel engines.

Mr. Knoop gave a brief sketch of the life of Mr. Kerr and then pointed out the facts in his career which have caused him to be considered one of the foremost engineers of his time.

The principles of operation of deisel engines as well as descriptions of several large installations of this type of power plant were presented by Mr. Lowery.

At this meeting plans were made for representatives of the local branch to attend the meeting of the Raleigh branch of the A. S. M. E. next Tuesday. This meeting will be in the nature of a joint meeting, and several members of the local student branch will attend.

### LAW MEN ORGANIZE FIRST YEAR CLUBS

Four law clubs are now being organized by Waddell Gholson, president of the law school association. The clubs will be composed of members of the first year class, and will bear the names of Battle, McGehee, Manning, and Pearson, or other names which may be selected by the groups. Members of the faculty who have agreed to serve as advisers are Professors McIntosh, Breckenridge, Wetach, and McCall. The clubs are regular institutions of the law school, being reorganized each year. They are designed to give training in preparing written briefs and in making arguments under conditions identical to those in the Supreme Court of the state. Each club is to conduct three cases, the first two comprising the preliminaries. All members of the clubs will participate in one of the preliminaries, and judges will be selected from the third year class. Winners of the preliminaries will face each other in arguing the third case, when the faculty adviser will serve as Chief Justice.

Statement of the facts of the cases are to be furnished by the faculty advisers in a form corresponding to the record of trial in a state supreme court case. Argument of the preliminary cases will be held 7:30 p. m. March 13th. Procedure will be identical to that of the supreme court, and no student will be allowed to read from a brief.

### CO-OP STUDENTS TO SCATTER TO DISTANT POINTS

Junior Engineering Men Will Start Practical Experience Monday; Some To Middle-West.

Monday morning twenty members of group 1 of the junior cooperative engineering students will report for work with the various firms to which they have been assigned, and the men whom they are replacing will begin a seven week's period of study here at the University.

Since 1922 when the system of a cooperative junior year was installed in the school of engineering, junior students in this school have spent half their time at the University and the other half doing actual work with various firms who use the students in their organizations.

This year the students are working with many different organizations, some in Chapel Hill and some as far away as Illinois. Within the state the group will go to the Armature Winding Company, the Duke Power Company, R. H. Bouligny and Company, and the Charlotte Filter Plant, all in Charlotte; the Tidewater Power and Light Company at Wilmington; the U. C. S. P. and the State Department of Conservation and Development in Chapel Hill; and the locating and bridge departments of the State Highway at Marion and Raleigh.

Outside the state the men will go to the Maintenance Department of the Southern Railway at Danville, the Catipillar Tractor Company in Peoria, Illinois, the Illinois Telephone Company at Chicago, and the Milwaukee Sewage Commission in Milwaukee, Wisconsin.

The system of cooperative work which is used at the University is known as the Harvard plan in which one year of the course is spent in cooperative work with the students spending half their time in school and the other half on the job. The idea of having students do cooperative work originated at the University of Cincinnati about 1906, when a five year curriculum was adapted which included the feature that half of the student's time was to be spent doing actual work. This plan was altered at Harvard to include only one year of cooperative work. This plan was adopted here in 1922.

The plan of cooperative work for students in the school of engineering was installed because through it the students obtain a

### College Students Who Drop Out Of School Become Business Men

(By Jay Dratler)

Lo! and behold! We have at last discovered, without the aid of the incomparable Sherlock Holmes and his bewildered Dr. Watson, what becomes of men who drop out of school before the end of the quarter.

David W. Bell of Washington, D. C., dropped out of school a couple of weeks ago because of ill health. And because of ill health he promptly searched around for a job. He finally got one in Durham—to be near his girl friend, he said—with a publishing and advertising concern.

The firm was in its infancy when Bell secured the job, and it was incorporated a few days later; he bought some

### Changes In Rhodes Scholarship Will Affect Carolina Students

#### Debating Notice

The following rules will be observed in awarding the gold monogram in debating this year:

1. The gold debater's monogram shall be granted regularly for representing the University in two intercollegiate debates.
2. It shall be granted for participation in one intercollegiate debate only in the case that the debate council sees fit to deviate from the regular rule.

J. C. Williams,  
Pres. Debate Council.

### ENGINEERS DISCUSS CO-OPERATIVE JOBS

At the meeting of the William Cain student chapter of the A. S. C. E. Thursday night, five junior members of the society gave brief descriptions of the co-operative jobs on which they have been working this year.

The work with the Southern Railway at Danville, the State Department of Conservation and Development, the locating and bridge divisions of the State Highway Commission, the Charlotte Water Works, and the Chapel Hill Filtration Plant was discussed briefly by the students who have been working on these jobs.

The program, which was under the direction of "Chuck" Erickson, vice-president of the society, was presented for the purpose of acquainting the sophomore members with the jobs that will be open to them next year.

### Meetings Of Taylor Society Open To All

To correct a false impression that has arisen in the minds of some, that the meetings of the University branch of the Taylor Society are open to members only, the president of the branch, W. C. Burnett, has stated that all meetings of the Society are open to the public and that anyone interested in the subjects under discussion at the meetings is urged to attend.

During this quarter the Society has heard several faculty speakers who have spoken on various matters related to business management. At the next meeting, Tuesday evening, Professor Taylor, of the school of commerce and economics, will speak on "Scientific Management in Marketing."

### Candidates To Be Chosen From Districts Instead Of States; A Total Of Thirty-Two Scholarships From United States.

The recent changes in the administration of the Rhodes Scholarship Fund will affect the applications from the University of North Carolina students, according to an announcement from Dean Addison Hibbard of the College of Liberal Arts.

Local candidates for the scholarships which begin in October of 1931, must be in the hands of Mr. Hibbard, head of the local committee, by October 18 of this year. On December 6th two candidates will be selected to represent North Carolina at the district meeting which will be held about two weeks later. The district which this state is in includes Virginia, North Carolina, South Carolina, Georgia, Florida and Tennessee. Four candidates will be selected out of each of the eight districts in the United States, thus making thirty-two Rhodes Scholars from this country.

Another important change is that beginning in 1930 Rhodes Scholars will be allowed the option of spending their third year at Oxford or at any other University in the world, outside their native country, provided it may be best for the pursuance of their studies. They will be allowed to take their third year's work immediately after the completion of the first and second year's work, or they may return to the United States after the first two years at Oxford and work here several years and then return to England for the third year.

The stipend of a Rhodes Scholar is 400 pounds (approximately \$2,000), and no restriction is placed upon the choice of studies of a Rhodes Scholar. In order to become eligible for the candidacy of a Rhodes Scholarship the applicant must be a male citizen of the United States between the ages of 19 and 25 and unmarried. He also must have completed at least his sophomore year in college. A candidate may apply in the state in which he resides or in the one where he has received two years or more of his college education.

The qualities considered in making the selection are as follows:

- (1) Literary and scholastic ability and attainments.
- (2) Qualities of manhood, truth, courage, devotion to duty, sympathy, kindness, usefulness and fellowship.
- (3) Exhibition of moral force of character and of instincts to lead and to take an interest in his schoolmates.
- (4) Physical vigor as shown by interest in outdoor sports or in other ways.

### McCormick To Harvard

Dean McCormick, of the Law School, will leave about the last week in July to serve on the faculty of the second term of the Yale Summer School. He is to teach a research course in procedure of assessing damages, which is one phase of the subject, Damages, about which Dean McCormick is at present engaged in writing a book.

Sigma Chi fraternity announces the pledging of Emmet Ferebee of New Bern.

### SCOUT SEMINAR COMES TO CLOSE THIS AFTERNOON

Executive Meeting Under Direction Of Commodore Longfellow To Conduct Business Session Today.

The Boy Scout Seminar, being held here under the auspices of the University extension division and the regional educational committee of the Boy Scouts of America, will be brought to a close by the final sessions today.

Since the opening Thursday evening, the seminar has, according to those in charge of the program, proved quite successful for the small number of executives from over the state who are attending. This seminar is the second of the year, the first having been given in January. The 12 hours work of each executive at this session will complete the quota of 25 hours required by the standards of the national organization.

Three talks by prominent scouting leaders of the state featured the opening program Thursday evening. Paul Schenck of Greensboro, who is Boy Scout Commissioner for the south, delivered the first of these. Executive Claude Humphries of Raleigh spoke on the growth of the Boy Scout movement in North Carolina. The final talk of the evening was given by Executive R. M. Shiele of Gastonia on the subject of taxidermy. Mr. Shiele had a number of specimens with which he explained the fundamentals of his subject.

The meetings of the seminar yesterday morning were conducted by Dr. McPherson of the medical school, who gave the development of public health, and by Dr. Plyer of the physics department, who demonstrated some of the latest experiments in physics. The work yesterday afternoon was directed by Commodore Longfellow, first aid director of the American Red Cross.

The executives were guests of the Athletic Association last night at the Carolina-V. P. I. basketball game. After the game Dr. Fussler of the physics department spoke to a meeting of the seminar on astronomy.

The first meeting today will be under the direction of Commodore Longfellow. Afterwards the seminar will be brought to a close by a business session.

North Carolina scout executives in attendance at the seminar are: J. E. Steere, Charlotte; A. W. Allen, Asheville; B. W. Hackney, High Point; Claude Humphries, Raleigh; O. B. Gorman, Reidsville; Herbert Stuckey, Wilson; H. T. Thompson, Winston; W. E. Vaughn-Lloyd, Winston-Salem; W. B. White, Greensboro; E. M. Shiele, Gastonia; W. E. Pennington, Goldsboro; and D. E. Dabbs of Atlanta, field secretary.

### Wilder Injured In Motorcycle Crash

J. F. Wilder, freshman in the University, sustained a broken leg and several minor lacerations Thursday night as result of collision between two cars and the motorcycle on which he was riding. The collision occurred near Spencer dormitory while Wilder was on an errand for Sutton's Drug Store. He was taken to the infirmary, where the leg was temporarily bandaged, and was later taken to Watt's hospital in Durham to have his leg set.
