

DEBATE TEAM IN THREE CONTESTS

To Meet Maryland, Northwestern, and Boston University Within Next Month.

The latter part of the present month and the early part of May will see the Carolina debaters engaging in three intercollegiate contests. Three queries will be used.

Bill Speight and McB. Fleming-Jones leave Thursday night for College Park, Maryland, where they will debate the University of Maryland's representatives on "Resolved, that the principle of the chain store is detrimental to the best interests of the American public." The local team will uphold the negative.

Carolina will be represented against Northwestern here April 15 by Billy Uzzell and John Wilkinson. The chain store question will again be used. The visitors will uphold the negative.

J. C. Williams, J. M. Baley, and G. P. Carr will journey to Boston early in May to debate Boston University's forensic aggregation on "Resolved, that the nations of the world should adopt some plan of complete disarmament of all forces, except those which are needed for police purposes." The Carolina team will debate the negative.

RECTOR DELIVERS INAUGURAL TALK

President For Spring Quarter Is Installed By Dialectic Senate.

The Dialectic Senate started off the quarter with a well attended meeting last night, the feature of which was the inaugural address of President Beatty Rector. Giving a brief history of the founding and of the early years of the senate, he cited the names of famous men who have been affiliated in the past with it, mentioning those of William R. Davie, James K. Polk and William R. Kenan. Emphasis was placed upon the prestige and position of importance which the senate held in former times. Turning then to present conditions, President Rector deplored the lack of interest and participation in the activities of the organization. "What we need, Senators, is not merely organization, but vitalization," emphatically declared the president, and illustrated the statement with references to Lincoln's Gettysburg address. He informed the senate of a visit, made in accordance with the constitution, to the graves of former Di Senators, and told of inspiration which had there come to him. He appealed to each Senator to cooperate to the fullest extent in the undertakings of the organization.

In outlining the work for the present quarter, President Rector gave three aims to be attained: the fulfillment of the constitution and its requirements, hanging of an additional number of pictures on the senate walls, and hearty cooperation with the Phi Assembly in carrying out any and all projects. He proposed the making of the hall and of the activities so attractive that non-members will be anxious to seek admittance. Emphasis was placed not upon how

Sir Herbert Ames Comes Here Tomorrow To Deliver Series Of Lectures On World Peace

Ex-Financial Director of League of Nations To Speak Before General Public And International Relations Club Thursday Through Saturday; First Address Tomorrow At 4 O'clock.

(By K. C. Ramsay)

Sir Herbert Ames, ex-financial director of the League of Nations Secretariat and prominent member of the Canadian Parliament for many years, comes to Chapel Hill tomorrow to deliver a series of addresses and conduct forums on subjects pertaining to the League of Nations and international peace. He is brought here under the auspices of the International Relations Club of the University and will be in the village through Saturday.

His first address will be in Gerrard hall at 4 o'clock tomorrow afternoon before the International Relations Club and all others interested. "The Promise of Peace" is the subject for the first lecture. In this address Sir Herbert will discuss the Paris Conference, the origin of the league, analysis of the league covenant, and the duties of the league. The address will be illustrated by maps, charts and diagrams.

Public Lecture Thursday
Sir Herbert Ames will deliver his first address to the general public in Gerrard hall tomorrow night at 8 o'clock on "The Changing Spirit of Europe, 1919-1929." The speaker has made a very thorough study of the social and economic conditions of Europe in the past few years and is thoroughly familiar with "the changing spirit."

"The Machinery of the League of Nations" will be his subject at a meeting of the International Relations Club Friday afternoon at 4 o'clock. Sir Herbert will outline the organization of the league assembly, the league council, the auxiliary organizations, and the permanent secretariat in this address.

The second public address by Sir Herbert will be in Gerrard hall Friday night at 8 o'clock on "Will the Present Machinery

SIR HERBERT AMES

Prevent War?" In this address the speaker will discuss alliances for outlawing war.

"The Fulfillment of the Promise" is the subject to be discussed before the International Relations club on Saturday morning at 10:30 in Gerrard hall. Sir Herbert will outline the first ten years of the league's work in this address, and show how it has prevented wars, saved nations from financial collapse, and removed century-old causes of international friction.

In addition to these public speeches Sir Herbert Ames will address several of the classes in history and government on Friday morning. The international relations club wants it understood that the public is cordially

Laurinburg Alumni Will Hold Banquet

An alumni banquet, culminating an intensive alumni rally in Scotland county, will be held in Laurinburg Friday, April 11. All the University alumni in Scotland county are expected to attend, coming mostly from the towns of Laurinburg, Laurel Hill, and Gibson. Also, Robert M. Hardee, chairman of the arrangements of the affair, will invite the alumni from Rockingham, Maxton, and Hamlet.

Dr. W. S. Bernard, and Mary-on Saunders, alumni secretary, will represent the University among the speakers of the evening.

Another alumni meeting was held yesterday in Statesville, and one will be held in Marion today. These two meetings are held in the interest of the Alumni Loyalty Fund.

Orchestra At Georgia

Carolina was well represented at the University of Georgia last week end. While the baseball team was entertaining on the diamond the Carolina Tar Heels, University orchestra, were playing for the German Club spring dances. The University musicians followed Jack Crawford, Weidemeyer, and other well known orchestras, and, according to the president of the Pan Hellenic council, were equally satisfactory. The Tar Heel orchestra will play for the Grail dance here this week end.

DRAMA FESTIVAL OPENS THURSDAY

Complete Program Is Announced By F. H. Koch, Director, And Miss Strobach.

The complete program for the seventh Drama Festival, which includes several changes from the original announcement, was released yesterday by Professor F. H. Koch, director, and Miss Nettina Strobach, state representative, of the Extension Division.

The Festival is to open Thursday, April 10, and continue through Saturday, April 12. There are far more entries this year than last and the program will be larger than any held before.

Special events will be an invitation performance Thursday night by the Wayne Community Players of William Royall's "When the Roll is Called Up Yonder," recently selected to represent North Carolina in the national dramatic contest, and lectures by such well-known playwrights as Paul Green and Barret H. Clark.

Another special feature of the program for the week will be a special exhibit of costumes, stage models, posters and programs, submitted by the various members of the Carolina Dramatic Association. The exhibition will be placed in room 7, South Building. The doors will be open before the morning session, and between the programs.

The final preliminaries for county schools will be held at 3 o'clock Thursday afternoon, April 10, to be followed by registration of delegates at 4:30. The program will begin with the presentation, at 8 o'clock, of three original plays—Mrs. C. H. Griffith's "The Elopement," played by the Seaboard Woman's Club; Lucy Gaylord's "The Seventh Wave," by the Lenoir-Rhyne Playmakers; and William Royall's "When the Roll is Called Up Yonder."

The greater part of Friday's program will be taken up by an Institute on the problems and tendencies of the Little Theatre movement, which will feature a directors' and students' conference. Discussions will be led by such authorities as Frederick H. Koch, director of the Carolina Playmakers; W. R. Wunsch, of the Asheville Little Theatre; Luther Greene, of the University.

Average Of 350,000 Gallons Of Water Used Daily In Chapel Hill

Outside of air, water is probably the most extravagantly used of the common resources of nature, but no freshman who finds that there is no hot water when he comes to take a bath after a workout in the gym would believe that there are twelve million two hundred and fifty gallons of this commodity used at Chapel Hill per month. The records kept at the filtering plant show a daily average of three hundred and eighty-six thousand gallons for last month while the preceding month the average was four hundred thirty-seven gallons per day. This difference is caused by the absence of the students during the spring holidays. So the freshman whose mother used to have such a hard time getting him to wash his ears during his grammar and high school days can now tell her that he not only helps to use something over twelve million

A. A. President

Burgess Whitehead, who was elected president of the Athletic Association Friday, is playing his second year on the varsity baseball team. During his three years here he has won the Grail cups for the best freshman scholar-athlete and the best scholar on the baseball team.

Dr. Prouty Tells Of Work During Summer At Sigma Xi Meeting

In his talk before the Sigma Xi scientific society recently, Dr. W. F. Prouty told of work which he carries on during summer and recess periods concerning the nature and relation of the various Triassic deposits of eastern United States and of the Durham Basin in particular. He pointed out that, with the exception of slightly different types of sediments and structure, the great similarity in regard to the general characteristics warrant the conclusion that all are structurally related and have a similar geological history. He pointed out that structures to be found in rock formations are traceable to sediments and disintegration of radio active minerals in the Piedmont area during the late Paleozoic time. Later cooling and settling brought about shrinkage and block-faulting.

Dr. Prouty also summarized results of recent studies of Serpentine (marble) deposits in Maryland and Pennsylvania. The source of the silica found in the mineralization of the serpentine wall rock was concluded to be hydro-thermal alteration from active vein solutions.

Student Notice

The student who asked for the forwarding of credits to the Naval Academy is requested to call at the Registrar's office today or tomorrow.

MATERIALS FOR STOCK COMPANY PURCHASED HERE

Imperial Stock Company Believes In Buying At Home; To Produce "Thorns and Orange Blossoms."

In accordance with their established policy of patronizing local resources as fully as possible, Paul Green and Wilbur Daniel Steele, producers for the Imperial Stock Company of the sensational stage play "Thorns and Orange Blossoms," will not go outside Chapel Hill for either set or costume materials if they can possibly avoid it. This production, announced in the Tar Heel yesterday, will be presented on May 2 at the Playmaker Theatre, through the courtesy of Frederick Koch, director of the Carolina Playmakers and leading exponent of folk drama in America.

The all-star cast, directed by Howard Mumford Jones, will be costumed in the dress of the period—the early 1880's, and as the play has four superbly dramatic acts, likewise calling for much ingenious adherence to the interiors of the period, the announcement of this patriotic policy will do much towards popularizing the Imperial Stock Company in Chapel Hill.

Mrs. Paul Green is assisting her husband in superintending the construction of the flats from good Chapel Hill pine, while Mrs. W. F. Prouty and Mrs. P. C. Farrar, in charge of costumes, will exploit the well-stocked shelves of Andrews-Henninger for the many yards of cloth needed both for costumes and drops.

Rehearsals are taking place nightly, and lovers of the drama are eagerly awaiting the date of the production—May 2.

McCarthy Talks At Sigma Xi Meeting

The following summary by Dr. G. R. McCarthy incorporates the substance of an address made recently before the Sigma Xi scientific society.

A preliminary study of the Atlantic Coastal Sands based upon about 120 specimens collected along the outer beaches from the northern end of Long Island to Cape Look Out has shown several interesting features. In all cases the average size of the sand particles decreased southward from each of the chief breaks in the coast line, i. e., New York Harbor, Delaware Bay, and Chesapeake Bay. The coarsest sands are found a short distance south of these openings, the sands growing progressively finer as one moves southward along the coast. It was also noted that in the immediate vicinity of each of these breaks in the coastline the sands were coarser than slightly farther away, the gradual decrease in size mentioned above not being in evidence for 10 to 20 miles.

This latter feature is explained as an effect of the scour of the tidal currents sweeping in and out of the bays, the finer materials being washed away first, leaving the coarser sands behind. The gradual increase southward was interpreted as an effect of the shore currents which move southward along the Atlantic coast, the moving sands being worn smaller in proportion.
