PROF. SAVILLE TO ADDRESS TAYLOR SOCIETY TONIGHT

Engineering Professor To Present Paper On "Power Plant Management As A Problem Of Industrial Management."

At the meeting of the University student branch of the Taylor Society to be held this evening at 7 o'clock in Bingham hall, Thorndike Saville, professor of hydraulic and sanitary engineering and chief of the state department of Conservation and Development, will present a paper on "Power Plant Management as a Problem of Industrial Management."

The paper to be presented this evening will be an impartial discussion of the merits of two methods of supplying power to any industry, purchase of the power from a public utility company and generation of it at the place of use.

The decision on which method to use in obtaining power for any given industry is extremely difficult and must be made only after a detailed analysis of many factors has been made. It is the purpose of this paper to present a summary of the advantages of each method and to show how each is best fitted for certain cases.

As chief engineer of the department of conservation and development, Professor Saville has had supervision of about twenty power plant investigations that the department has made in the past ten years, and has become well acquainted with the power situation in the Southeast. In addition to supervising these power investigations, Professor Saville has served as consulting engineer on the power plant projects of several public utility corporations.

Because of the great advances made in motorization during recent years, the discussion this evening will be limited to electrical power, the phase of power production receiving the largest attention at the present time.

The meeting this evening will be the last that the Taylor Society will hold this school year. During the past two quarters, the society has held regular meetings at which various phases of scientific management have been presented by outside speakers and faculty members.

The meetings of the local branch of the Taylor Society are always open to the public, and the officers of the group extend a special invitation to all engineers to attend the presentation of Professor Saville's paper this evening.

Chemical Engineers Hold Final Meeting

The student branch of the American Chemical Engineers will hold its last meeting of the year in the auditorium of the chemistry building tonight at 7:30. Dr. Vilbrandt will deliver an address at the meeting. His subject will be "Worlds Recreate."

The public is cordially invited to attend the meeting. A large crowd is expected at the meeting as it will probably be the last opportunity to hear Dr. Vilbrandt speak as a member of the faculty here, as he will soon take over his duties at Iowa State College.

The society will not send a representative to the Detroit meeting.

German Club Notice

German Club Tickets may be secured from Will Yarborough every afternoon until Friday between one and two o'clock and every night between seven and eight at the S. A. E. house.

LYMAN B. STOWE ENJOYED RECENT VISIT TO VILLAGE

Grandson - Author Of Noted Writer Favorably Impressed By Town And Citizens.

Lyman Beecher Stowe, formerly of Doubleday, Doran and Company, who spent a week in Chapel Hill recently, was greatly impressed with the University and the town.

Speaking of Chapel Hill Mr. Stowe said, "When I get back to New York I am going to tell my friends that if they want to visit a spot where there are no prejudices and where kindness and friendliness abound in profusion they should come to Chapel Hill."

"As the grandson of Harriet Beecher Stowe, I might have expected an indifferent reception in the south, but it has been anything but that. I have found absolutely no prejudices of any sort. Many of the people on the street whom I haven't even met have bowed or spoken. It is quite a contrast with the villages in New England where the people are friendly but too inhibited to show it, or with New York, where people are friendly but too rushed to show it. Chapel Hill has the ideal climate. Before coming down I was in New England and New York, and it was very hot in both places. And, of course, Chapel Hill is a place of great beauty. In fact, this is where I should like to live."

Mr. Stowe came here to gather material for a series of articles he is writing on American universities for "World's Work." The articles are to be on the distinctive contributions of the American universities to American life.

"Before leaving New York I conferred with W. D. Howe, of Scribner's, formerly head of the English department at Indiana University, and others," Mr. Stowe said. "We made up a list of universities that for progressiveness and general enlightenment would be most likely to furnish material for a series of such articles. We placed the University of North Carolina at the head of the list."

The work in the University which impressed Mr. Stowe was that of Dr. E. C. Branson and his assistants in rural social economics; the researches of Dr. Howard W. Odum and his assistants in southern social and economic problems; the work of Dr. W. J. McKee of the school of education in going out into

Debate Try-Outs

Tonight at 7:30 the try-outs for the Bingham Debate will be held in the Phi Assembly hall. All eligible members who wish to compete in this contest will be present at that time. Two men will be chosen to meet a team from the Di Senate. The annual Bingham Debate takes place during commencement.

MONEY IS SAVED BY P. U. BOARD

Efficient Management Makes Low Price For Campus Publications.

The introduction of the Publications Union Board into the University seven years ago brought with it many benefits to the publications and economies to the student body. According to the plan adopted at the beginning, the board consists of five members, two of the faculty and three elected by the students. This board appoints and dismisses business managers of the four publications, and the managing editor of the Daily Tar Heel, apportions money collected from the students, passes on contracts for printing and engraving, and acts as general overseer for the Daily Tar Heel, the Buccaneer, the Carolina Magazine and the Yackety Yack. In its few years of existence, it has gathered a sufficient surplus to keep them on a stable basis.

Due to the economies of the P. U. Board, fees paid by Carolina students are less than those paid at most other universities. Harvard, not having a P. U. Board to unite its publications, has students to pay \$9 for the yearbook, \$7 for the daily paper, \$2.50 for the comic magazine, and \$3 for the literary magazine, making a total of \$21.50 for the four publications. The University of Chicago charges a total of \$11, Columbia, \$12, the University of Illinois, \$10 (without a literary magazine), and Princeton, \$19. All these universities have fees more than double those at Carolina. Most of the savings are due to the

FOREIGN POLITICS FORUM WILL MEET

Recently Organized Group To Conduct Exhaustive Study Into Question.

The Foreign Politics Forum will meet tonight at 9 in 213 Saunders hall for the purpose of discussing current issues in the consular service in the United States. The meeting will be presided over by Bob Graham, president of the organization, while Professor K. C. Frazer of the government department, will lead a discussion on "Foreign Affairs."

Plans are to be made for next year, and prospective speakers will be discussed. The club is at present planning to secure noted diplomats to appear on the program for the coming year.

This Foreign Politics Forum was organized this year for the purpose of stimulating interest among students of the University who are interested in foreign political and commercial problems. Discussions in the forum combined with the advice of the department of history and government should be of service to students who are interested in diplomatic work.

During the past year Sir Herbert Ames was brought to the campus under the auspices of this forum. While here Sir Ames gave a series of addresses on "The League of Nations." The forum plans to bring numerous other such men to the campus next year in an attempt to create more interest in foreign politics.

The officials of the organization invite all students interested in foreign politics both from an academic and professional standpoint, to attend the meeting.

TAFT ENDORSES WORK IN RURAL SCULPTURE DONE BY N. C. FARMER

W. T. Covington, Of Raeford, Develops His Hobby Into Work Of Permanent And Lasting Value; Unusual Material Used In Models.

The recent visit to the campus of Lorado Taft, world famous sculptor and architect, has brought to light a new and entirely original field of artistic endeavor in rural North Carolina which has been secretly flourishing for some time. This discovery is of very great interest to the state as a whole, and especially to the University of North Carolina, where an attempt is now being made to install a school of fine arts. It is especially romantic when it is considered that this movement in art is being led by an agriculturalist—a farmer of the soil. This pioneer in the field of North Carolina art is W. T. Covington, prominent Raeford farmer and member of a well known Hoke county family.

Mr. Covington never went to college, nor has he ever had any artistic training whatsoever, having devoted his time to farming from early youth. It was not to be expected, then, that he would ever develop any liking for, or knowledge of, sculptural art. However, many years ago, he became interested in sculpture and has been enthusiastically spending all spare hours in this field ever since.

Some time ago Mr. Covington, having read of the wide reputation of Lorado Taft as an excellent judge of sculpture and architecture, wrote to Mr. Taft,

sending him photographs of some of his work and asking the authority's opinion as to its merit. At that time, Mr. Taft wrote Covington, expressing himself as being most pleased with some of the work, especially with a fountain which the Raeford man had erected in front of his home, and desirous of making Covington's acquaintance in the future. So when Mr. Covington heard that Taft was to lecture at the University, he drove up from his home to hear the lectures, and also brought with him several samples of his work.

Upon examining these samples, Mr. Taft and Dr. Harland, head of the department of archaeology at the University, were enthusiastic in the commendation of the simplicity and perfection of the work. The technique of Mr. Covington's sculpture is entirely original, and different from that generally in fashion for the day, as is his theme and subject matter, which is entirely composed of the local atmosphere of the farm and countryside—a line of thought never heretofore thoroughly developed. One of the pieces which he brought was the "Hog Caller." It consisted of four figures—the farmer, two pigs and a trough. This piece is very realistic. The farmer

Students Will Vote On Tar Heel Issue Today

Senior Notice

The second talk in the Senior Week program will be delivered tonight by Dr. R. D. W. Connor at 7:15 under Davie Poplar.

Chairman of Senior Week

RUTH ST. DENIS GIVES PLAN FOR ART EXPRESSION

Advocates Establishment Of Community Dancing Centers; System Is Used In California.

"Dancing is the fundamental expression of all the arts," Miss Ruth St. Denis, dancer and co-director of the famous Denishawn School of Dancing, said in an interview after she had presented a well-received program of dances in the Kenan stadium.

"Architecture and dancing go hand in hand, leading the arts. They are the basis on which all the others are built. For this reason, dancing is an important part of a nation's life."

In speaking of dancing in America, Miss St. Denis told of her own idea and ideal. Dancing, she said, should be for all people, not merely a few interested particularly in the art. Old and young alike can dance, and should be encouraged. The best and most practical means of achieving this end of spreading dancing to all is to establish community centers in the residential districts, where singing and dancing would combine to further the artistic life of the community.

Those too old to dance, whose bodies have become too stiff or are no longer beautiful, may be organized as a chorus. The younger members of the group may then interpret the music of the chorus, improvising where possible. A community interest in culture is thus aroused. Miss St. Denis' school in New York is not of this type, but she has started work along these lines in California, where it is being carried steadily forward.

While Miss St. Denis is heartily in favor of athletics, she decries the fact that huge stadiums on which fabulous sums have been spent are not utilized two-thirds of the year. Choruses, symphony orchestras, pageants and dance programs could be presented. Yet in many parts of the country the structures stand unused. The use of Kenan stadium to stage the program of dances given here was heartily endorsed by the dancer.

Miss St. Denis and her troupe left Chapel Hill for New York, where they will prepare for their appearance in August at the Lewisohn stadium with the New York symphony orchestra. Her appearance here was the last in a ten-day tour of the south.

Yackety Yack Notice

There will be an important meeting of the Editorial staff of the Yackety Yack tonight at seven o'clock. It is imperative that all members be present, and on time, since the purpose involves the formulation of next year's staff and plans for the 1931 Yackety Yack.

CONTINUANCE OF DAILY REQUIRES INCREASE IN FEE

Many Notables Favor Continuation Of Daily; Student Activities Committee Approves.

POLLS IN Y. M. C. A. 10 TO 5

(By K. C. Ramsay)

Thirty-three and one-third cents per quarter additional publications fees or no Daily Tar Heel for next year is the question that must be decided by the students today at the polls inside of the Y. M. C. A. The polls will be open from 10 a. m. to 5 p. m.

At the meeting of the student activities committee on last Tuesday it was decided that this would be the only feasible plan by which a daily paper may be continued in the University. Numerous plans were proposed by both the faculty and student members of the committee, among which was a suggestion that the Buccaneer be abolished. This was unfavorably received by a large majority of the group.

Reports were made by the president of the Publications Union Board, Clyde Dunn, and by Professor J. M. Lear, treasurer of the board, and it was shown that a deficit of over \$3300.00 would have to be carried over by the P. U. Board because of the losses of the Daily Tar Heel. Not one member of the student activities committee would hear to a suggestion that the daily be abolished. With one accord the group said continue the newspaper at any price.

Student Leaders Endorse Daily

During the past week discussion of the proposed raise in the publications fee has been heard in all parts of the campus, and the proposal has met with hearty approval. Some of the students having spoken in favor of keeping the Daily Tar Heel under the proposed plan are ex-President of the Student Body, Ray Farris; President of the Student Body, Red Green; Glenn Holder, past editor of the daily; Ed Hamer, President of the Y. M. C. A.; Dave Nims, captain of track; Strud Nash, captain of the football team. The entire staff of the Daily, editor to news reporter, is strongly in favor of continuing its work.

Many students have declared that the Daily Tar Heel has become a necessary part of their breakfast and that they would not know what to do without it.

Favored By Faculty Men

"The experimental year for the Daily Tar Heel closes with two facts clearly evident" stated Professor Harold D. Meyer in a Readers' Opinion last week, "one, a successful editorial policy and the other, a financial deficit. "The Daily Tar Heel has been a source of pleasure and interest throughout the year. In fact, it has become a student necessity. Like breakfast, classes, study, the Carolina and many other habits we are now accustomed to having the Tar Heel as a daily necessity."

Dean F. F. Bradshaw says "I am in favor of continuing the Daily Tar Heel. It has proven a success, and should be continued."
