

State Has Opportunity to Become Nation's Greatest Game Preserve

An opportunity for North Carolina to become the Union's leading state as a home for game birds has been opened up by Joseph P. Knapp, the multi-millionaire publisher who came down from the North a few years ago to make his home in Currituck county.

W. O. Saunders, the Elizabeth City newspaper editor, who has written stories and articles for Mr. Knapp's magazines and has been a close acquaintance of his for many years, was in Chapel Hill last Friday evening and talked the project over with E. C. Branson, head of the University's department of rural social economics. Earlier in the day he had been in Raleigh in conference with President Brooks of State College and J. W. Harrelson, head of the state department of conservation and development.

Mr. Knapp has got about 25 wealthy men to join him in establishing a foundation called "More Game Birds in America." A million dollars has already been contributed, and the amount is to be raised later to \$10,000,000. This group of men, if they can obtain the proper cooperation in the way of protective laws and regional protective associations, will select North Carolina as the state in which to carry through their enterprise. They favor it because of its natural advantages as a home for game birds; it has mountains, hills, vast areas of unsettled fields and woods, and flatlands, swamps and bays; it is easily accessible to the most populous sections of the country; and Mr. Knapp and his associates think that its people and its government have a progressive spirit that will move them to take a deep interest in a venture that promises such great benefits to the state.

Governor Gardner is giving his enthusiastic support to the project, and all the state officials, educators, business men, and farmers to whom it has been explained hold the opinion that it will augment the material wealth as well as the prestige of the state. It will bring sportsmen and their families here, it will increase the value of lands, and it will constitute a new source of revenue for farmers who maintain shooting preserves, breed bird dogs, serve as guides, and provide quarters for visitors.

Among the men associated with Mr. Knapp in the foundation are Harry B. Hawes, former United States senator, president; Thomas W. Lamont, treasurer; William E. Corey, M. Hartley Dodge, Felix duPont, Richard F. Howe, Ogden M. Reid, George Whitney, and Francis D. Bartow.

Mr. Knapp has made a start in game preservation and development on his own estate in Currituck county. Last year, for example, he collected 6,000 duck eggs which produced 3,500 ducks. He plans to continue his breeding on a far more extensive scale.

W. O. Saunders, who has had the advantage of a close-up view of what Mr. Knapp has accomplished on his own land and water holdings, has volunteered his services to bring the project to the attention of the people of the state to the end that there may be general enlightenment on the subject before the legislature convenes in January.

"The results of such an undertaking are not a matter of surmise," said the editor when he was here last week, "because we have already before us what European countries have achieved by their efforts at game preservation. In Great Britain, for instance, it has been

a science for centuries. Owners of Scottish moors get \$10,000,000 as rentals for land which is valueless for anything else except grouse hunting. If our farmers will give their cooperation, the thing is going to mean not only better shooting but also many millions of dollars in increased revenue every year."

One demonstration the foundation has in mind is to send a field representative into a quail region, where would be explained to a group of farmers the advantage to them—the profit in dollars—of forming themselves into a "shooting preserve club." The individual farmer with 100 or 200 acres cannot kill vermin, take care of quail and keep off trespassers at any profit, but a group of them owning collectively 10,000 to 20,000 acres at once become important. It can put game birds onto these acres, can kill off vermin, can thoroughly discourage trespass and can make extra money off their acres by doing this.

Next, the Foundation will loan to this community club the necessary funds to erect a hatchery with incubators, brooders, etc., thus starting the community club game farm. The loan made by the foundation would be repaid out of part of the profits, as and when made by the community game farm. If money be lost, the foundation is the loser and not the farmer.

The principal source of profit to the farmer will come from his proportion of the sale of shooting privileges on the shooting club's preserve. Permits for these would be obtained by visiting sportsmen probably at designated stores in the central town and would be based upon a minimum daily charge with probably an extra charge per bird killed.

Guides would be furnished, and dogs, if desired, at given rates per day.

Intramural Schedule

Monday, October 6

- 3:30—(1) D. K. E. vs. Kappa Alpha; (2) Kappa Sigma vs. Phi Alpha; (3) Phi Sigma Kappa vs. Phi Kappa Sigma.
- 4:30—(1) Pi Kappa Phi vs. S. A. E.; (2) New Dorms vs. Old West; (3) Steele vs. Mangum.

Tuesday, October 7

- 3:30—(1) Sigma Nu vs. Sigma Phi Sigma; (2) Sigma Zeta vs. Tau Epsilon Phi; (3) Theta Chi vs. Zeta Beta Tau.
- 4:30—(1) Zeta Psi vs. Beta Theta Pi; (2) Phi Gamma Delta vs. Chi Psi; (3) Sigma Phi Epsilon vs. Chi Phi.

Wednesday, October 8

- 3:30—(1) Manly vs. Ruffin; (2) Grimes vs. Aycock; (3) Everett vs. Graham.
- 4:30—(1) Lewis ("J") vs. Question Marks; (2) Carr vs. Law School; (3) Lambda Chi Alpha vs. Alpha Tau Omega.

Thursday, October 9

- 3:30—(1) Delta Psi vs. Phi Delta Theta; (2) Pi Kappa Alpha vs. Kappa Sigma.
- 4:30—(1) Phi Alpha vs. Phi Sigma Kappa; (2) Phi Kappa Sigma vs. Pi Kappa Phi; (3) S. A. E. vs. Sigma Nu.

Friday, October 10

- 3:30—(1) Sigma Phi Sigma vs. Sigma Zeta; (2) T. E. P. vs. Theta Chi; (3) Zeta Beta Tau vs. Zeta Psi.
- 4:30—(1) Mangum vs. Manly; (2) New Dorms vs. Everett ("T"); (3) Old West vs. Steele.

Bill Wraneck, Publicity Director of the University of Virginia, spent the week-end in Chapel Hill.

yards, but on being tackled the receiver fumbled the ball. Poss, tackle for Virginia, recovered, making it Virginia's ball, first down on the 35-yard line.

With Thomas and Beury carrying the ball the Cavaliers got a first down, but the Duke line stiffened and it was the Methodists' ball on the 23-yard line.

Ershler met with little difficulty in carrying the ball over by a drive over center for the third touchdown of the afternoon. The extra point was good when Brewer hit the line for the three yards.

Thomas Runs 45 Yards

Duke kicked off to Virginia with Thomas receiving. Thomas took the ball on his ten-yard line and shook off tackler after tackler, finally being downed on Duke's 45-yard line. But again the Cavalier offense failed to function because of the weaknesses in the line and Duke got the ball on downs.

Late in the third quarter Murray and Mullen alternated at carrying the ball and drove down to the one-yard line by off-tackle plays and line bucks. Kid Brewer again took the ball across Virginia's last white stripe. A line buck was unsuccessful for the extra point.

The final score of the game came about the middle of the final period when Brewer made his third score of the day. Brewer was too much for the center of the Cavalier line, which nev-

er stopped him for less than two or three yards. The extra point was not made this time.

Duke did not attempt to kick a single extra point during the game, but succeeded in getting two of the points through the line.

After the final tally Coach DeHart sent in many substitutes, as did Coaches Neale and Tebell. The game ended with the ball in Duke's possession at mid-field, and the final score was Duke 32, Virginia 0.

ANNUAL NOVICE CROSS COUNTRY PRACTICE BEGINS

(Continued from page three)

be held Monday afternoon, and it is essential that candidates report to the manager before running, in order to get credit for the workout.

Founder's Day Program Arranged at N. C. C. W.

Greensboro, Oct. 4.—North Carolina college has practically completed her program for the local observation of Founder's day at Aycock auditorium Monday, October 6. Exercises are to be held at 10:30 o'clock in the morning, with Beverley R. Tucker, M.D., professor of nervous and mental diseases, Medical College of Virginia, Richmond, Va., the principal speaker. Dr. Tucker's subject is "The Greatest Genius of the World."

Things seem to be reaching a pass in New York city where it doesn't pay to be a magistrate. —New York Times.

Election Notice

The regular election of chief cheerleader will take place tomorrow.

Chapel Thursday and Friday has been turned over to the candidates who lead a few cheers to show their ability and said a few words about their aims if and when elected. Monday's chapel will be similar to the two preceding, and Howard Tenry, Billy Arthur, George Brown, and Dan McDuffie are scheduled to perform so that the second half of the freshman class may have a chance to see the cheer leaders.

The election will be held in the Y. M. C. A., or in front of it, and will be under the direction of Red Greene, president of the student body.

Friendship Council Will Meet Tomorrow

The principal feature of the meeting of the freshman friendship council tomorrow night will be an address by Dr. G. T. Schwenning of the school of commerce. The rest of the meeting will be devoted to committee organization and devotional exercises.

The junior-senior cabinet will complete appointments to committees, and discuss additional program work.

Chapel Hill Wins From Hillsboro 13-7

cal backfield, while Stone and Captain Ray were the players showing up best on the line. Captain Miller of Hillsboro was the outstanding player for the visitors.

Dean N. W. Walker and Mr. I. C. Griffin of the school of education have gone on a business trip to Elizabeth City and will return Monday.

Planting along Street

Stretch of Business Block Will Be Beautified with Grass and Trees

Grass is to be planted at once along the south side of Franklin street, from the Columbia street corner down beyond the bakery, and trees will be planted later on in the fall. This is the stretch where the regrading of the sidewalk has just been completed.

An unpaved strip was left between curb and sidewalk, according to the aldermen's resolution authorizing the improvement, so that the trees which had to be cut down could be replaced. The municipal street force has put on a good thick layer of top soil.

W. C. Coker, University botanist, is in charge of the planting. He will confer with the aldermen before deciding what kind of trees to set out. A determined effort will be made to protect both grass and trees. Mr. Coker is much pleased by the provision made for planting and believes that this part of the business block can be made beautifully green.

DICTIONARY OF PUBLIC EQUATIONS

Contains 12,000 completed and balanced chemical equations, classified and arranged for ready reference. It is no more difficult to find a desired equation in this book than it is to find a word in the Standard Dictionary.
