## Wilson Recounts Visit To European Libraries

By Mary Buie

Dr. Louis R. Wilson, University Librarian, in an interview on European and American libraries, discussed some notable libraries of Europe, and compared in general those of Europe and America.

Dr. Wilson discussed the Library of the Vatican in view of the interest aroused in the United States by the fact that an American committee of experts has been called on to supervise the revision of the catalogue of the Vatican along the lines of American university libraries. Dr. W. W. Bishop, librarian at the University of Michigan, and Dr. H. C. Hanson of the University of Chicago are doing this work.

"This does not mean," Dr. Wilson explained, "that this committee is supervising the revision of what ordinary visitors see when visiting the exhibits of rare manuscripts and printed books of the Vatican. The library proper is a different sort of thing from the ordinary library. The reading room, catalogue, and stack are spread out in a series of rooms and buildings." He further explained that there are two points in which the library is being worked over. The catalogue is being revised according to American principles, and an American firm, Snead and Co. of Jersey City, is building in one section, an American stack. "This change," Dr. Wilson continued, "is probably being made because the Pope, while a cardinal, was librarian in the Ambrosiana Library of Milan, and he has always been

interested in library affairs."

Two other notable Italian libraries visited by Dr. Wilson were the Library of St. Mark in Venice and the Laurenziana or Medici Library in Florence. The first is famed for the beautifully illuminated Grimani breviary, and the Laurenziana for a collection formed by the Medici of 10,000 manuscripts, among which are more than 200 of the writings of Dante.

Dr. Wilson made special reference to the Technal library of the Deutsche Museum in Munich. "It is for the use," he says, "of students and visitors who are associated with the Deutsche Museum, which has every sort of instrument or machine which Germany, in her thorough going way, has worked out." The distance covered in traversing the hundreds of rooms in the museum is fifteen miles, the rooms being filled with machines of all kinds which the students study in connection with the literature in the library. This, Dr. Wilson stated, is of interest to Americans because Julius Rosenwald of Chicago, has indicated that he intends to establish such an institution for Americans in Chicago.

Dr. Wilson spoke also of the difference in the American and European libraries as well as German, French, and English.

American universities catalogue their materials according to one of two general classifications, the Library of Congress, or the Dewey. In Germany the system of classification is greatly modified by each institution
