

TAR HEEL STAFF MEETING CALLED FOR THIS EVENING

Old and New Men to Gather at Office on Second Floor of Memorial Hall at 7:30.

Old staff members and candidates for positions in the various divisions of the editorial department of the DAILY TAR HEEL will gather at a joint meeting at 7:30 o'clock this evening in 205 Graham Memorial.

After a short joint gathering, the meeting will be divided into several sections, consisting of groups of new men, feature writers, the editorial board, sports writers, and old men.

Try-out stories written by students wishing to obtain positions on the reportorial staff must be turned in tonight so that they may be checked over before tomorrow afternoon. There will be further announcements made concerning the try-outs.

At the meeting of the old staff members, temporary beats will be assigned, and a schedule for desk work during the week beginning tomorrow will be announced and posted in the office of the paper. The new system which is being inaugurated this year for work on the desk will be explained.

Marcus Feinstein, business manager of the paper, has announced that men who have not yet received their keys for work on the DAILY TAR HEEL last year may get them tonight. He will be in the business office on the second floor of the Memorial and will distribute the keys there.

Attendance of all old members of the staff at tonight's meeting is required, and those men who do not appear will be dropped from the staff.

A special meeting of the editorial writers has been called for Tuesday afternoon at 2:00 o'clock by Vergil Lee, chairman of the editorial board.

DI, PHI SCHEDULE FIRST MEETINGS

Literary Societies to Induct New Officers and Discuss Plans For Coming Year.

The initial meetings of the Philanthropic assembly and the Dialectic senate, University literary societies, are planned for Tuesday night at 7:15 o'clock. The new Phi officers for the fall quarter will be inducted in New East. They are as follows: speaker, Lawrence H. Fountain; speaker pro-tem, A. S. Kaplan; sergeant-at-arms, Charles Bond; treasurer, Albert Ellis; reading clerk, Winthrop Durfee.

It is expected that at this meeting Speaker Fountain will deliver his inaugural address. Interested freshmen are urged to attend. Plans for getting new members will also be discussed.

The new Di officers will be installed also at the meeting at New West building. Bill Eddleman, new president will deliver an inaugural address and plans for the coming year will be discussed.

The new officers to be inducted are as follows: president, Bill Eddleman; vice-president, Ike Minor; clerk, Elmer Oettinger; sergeant-at-arms, Carl Crowell.

98 Receive Degrees

Thirty-Six of the Number Earn M.A.'s During Summer.

Ninety-eight students completed the scholastic requirements for degrees at the recent session of the summer school.

Of the 98, 15 received A.B. degrees and 26 degrees for B.A. in education were awarded. The largest number of degrees awarded was in the M. A. division where 36 degrees were given. Three students received the B.S. in Chemical Engineering one graduate in Pharmacy, six LL.B., one LL.D., six M.S., and one Ph.D.

SIGMA DELTS WIN HIGH SCHOLASTIC HONOR LAST YEAR

Local Fraternity Leads All Others During Entire School Year in Scholarship.

Eleven fraternities and two sororities on the campus maintained a scholastic average higher than the general fraternity average last year, and twenty fraternities received a scholastic rating above the academic average of the University, according to statistics released yesterday by Dr. G. K. G. Henry, assistant registrar.

Sigma Delta, local men's society, is listed highest, with a rating of 2.16 for the past year and 2.17 for the spring quarter. The fraternity is given a standard score of plus 5, the score being determined by dividing the difference between the University academic average (3.20) and the highest possible grade (1.00) into ten ratings.

Pi Phi Second

Pi Beta Phi sorority received second highest rating with a score of plus 4, having a scholastic average of 2.45 for the year and 2.41 for the spring quarter. Three fraternities were included in the class of plus 3 rating, Tau Epsilon Phi, Sigma Alpha Epsilon and Delta Kappa Epsilon.

Other societies rated above the general fraternity scholastic average, receiving a standard score of plus 2, are Sigma Phi Epsilon, Chi Omega sorority, Beta Theta Pi, Phi Alpha, Chi Phi, Zeta Beta Tau, Phi Delta Theta and Phi Kappa Sigma.

Nine additional fraternities with a score of plus 1 are listed with standings above the University average: Theta Chi, Zeta Psi, Delta Sigma Phi, Kappa Sigma, Pi Kappa Alpha, Sigma Nu, Delta Psi, Phi Sigma Kappa and Delta Tau Delta.

New Section of Math 13 Created for Overflow

Another section of Math 13 has been created due to the heavy registration in the course. The new section will meet at the same hour, 11:00 o'clock, under Professor Mackie. Math 13 is a course in analytic geometry required for all students specializing in mathematics.

The class in Math 102 is still unfilled. This is a course in college geometry.

Cheerleaders to Practice

There will be a cheerleaders' practice at 3:30 Monday afternoon in front of the equipment room at Emerson field. Chief Cheerleader Ernest Hunt announced after the practice game yesterday.

Frantic "Food Trust" Cause Of General Epicurean Upset

Agents of Eating Houses Bring Destruction, Despair, and Indigestion to Recipients and Donors of Gratis Meal Tickets; Freshman Class Throws Scare Into Boarding Houses.

Registration, lost trunks, rushing prospects, and the humidity notwithstanding, the Carolina gentlemen must eat. And nobody knows that better than the odd hundred scouts of the myriad Chapel Hill eateries.

Their attack, though centered on the freshmen, extends through graduate students and professors. Virtually the only people who have escaped the solicitous attentions of the "Food Trust" are the dyed-in-the-wool members of the Bachelor's eating club who walk down the street with the air of knowing whence cometh their next meal. Messrs. Pegg, McKie, and Jenkins actually have developed a superior air.

"No Ticker—No Soupee"

For the balance of the campus things are in a bad way. At first there was the usual and expected deluge of invitations for free meals. That stage was quickly passed, and there remain only the words and music of the agents who so politely did the inviting.

Not all who took advantage of saving half a dollar on meals are proclaiming the gratis system perfect. One freshman remained almost two hours at a boarding house table, consuming some fifteen desserts while telling his hostess all about his mother's "swell punkin pie." Said gentleman kept his bed for two days following.

The cafeterias took a real trimming on their generosity. The freshman class may be small, but somewhere it acquired a mass appetite of alarming proportions. Any class which boasts a man capable of drinking six tomato juice cocktails and topping them off with four cups of coffee is making a real bid for Carolina Epicurean Immortality. As one observer phrased it, "When the cafeteria closed there was nothing on the racks but spinach and even that had been tampered with."

The Commons' Report

Swain Hall has had its share of trouble. There were so many places to pay out money in the check-out line at the Tin Can that by the time weary students reached affable Hamilton Hobgood they were more likely to apply for a loan than hand over cash for weeks' food ahead.

Best anecdote of the sorry mess: A freshman eager to make an impression on the Food Trust for whom he was working assailed a member of Chuck Collins' squad. The footballer who had been feeding on the healthful but not precisely fancy diet of a training table listened for a few seconds to the freshman's description of cream-puffs, ice-cream, ginger-ale, Russian dressing, and stuffed duck.

Geology Field Trip Proves Successful

The geology department conducted another of its annual field trips along the middle Atlantic coast-line during the first session of the summer school. Although the trips are mainly for University students, a number of men from other schools also took the tour.

Sixteen students and three instructors collected over 1,000 pounds of material, including fossils and minerals in Virginia, West Virginia, and North Carolina.

The department this year has added a new course, mainly for sophomores but open to other students, in the elements of geology. The course in the geography of North America which was begun last year is to be continued this year. S. Emery has been permanently added to the faculty to take care of the geography work.

Phi Beta Kappa Aspirants

All students who desire their scholastic records to be considered for eligibility for election to Phi Beta Kappa are requested to submit their names and local addresses to the registrar's office, it was announced yesterday.

Changes in Math Faculty

Two new teaching fellows, Mr. Palmerlee and Mr. Nahikian replaced Mr. Park and Mr. Pettis in the math department.

Frat Invitations

Many New Men Can Not Be Located To Deliver Invitations.

Dean Bradshaw has announced that there are fraternity invitations to about 160 men that were undelivered yesterday because it was impossible to locate the men. Any man who believes he should have received an invitation and did not may call by 205 South building today at 12:00 o'clock to check over the list. Fraternities may also check the names to see if their invitations were delivered.

Every effort will be made to locate recipients of invitations.

MAGAZINE STAFF WILL MEET WITH BARNETT TONIGHT

Acting Editor Wants New Writers and Old Men to Bring Work of Summer.

"The first issue of the 'Carolina Magazine' will endeavor to present to the student body the best summer writings of the last years staff rather than try to publish new work which would be written under the stress of the new school and handicapped by short time," stated Bob Barnett, acting editor of the publication.

Barnett wants all the members of the old staff and as many new men who are interested in literary writings to attend the year's first meeting of the staff which will be in room 203 Graham Memorial, Sunday evening at 7:00 o'clock.

Barnett said that it is imperative that every member of the staff attend this meeting so that material can be collected for the first issue. Anyone who has written useable material during the summer months should bring his work to the meeting. This first meeting is called to bring the old writers back into contact with the magazine, to introduce new men into the mechanics of the magazine and to acquaint them with the type of material which is most suitable to a college literary publication.

The magazine this year will endeavor, as far as Barnett can say, to present a greater variety of work, to include more critical essays and to stimulate interest in the short one-act play as a literary and dramatic effort.

New Geography Course

A new course in the elements of geography is being offered this fall by S. T. Emory. This course, which is intended primarily for sophomores and juniors, will be known as Geography 15. Mr. Emory received his training at Randolph-Macon and Columbia and is working on his doctor's degree at the University of Chicago. He has been an instructor here for two summers.

Gymnasium Assistants

The gymnasium assistants for this year will be J. P. Jenrette, J. L. Hodges, and G. W. Chandler, Jr. They will assist Dr. Lawson and will supervise the freshman gym periods.

Chess Club to Meet

The Chapel Hill Chess club will conduct its first meeting of the year tomorrow night at 7:30 o'clock in the Episcopal parish house.

RUSHING SEASON GETS UNDER WAY THIS AFTERNOON

Preliminary Period Will Last From 2:00 O'clock Until 12:00 Tonight.

The 1933 rushing season will get under way this afternoon at 2:00 o'clock, when freshmen, by invitation, will begin visiting at the various fraternity houses. This preliminary visiting period will come to a close tonight at 12:00 o'clock.

Since Friday night, the Interfraternity council has been at work delivering invitations extended to freshmen by campus societies, and most of the work was completed last night. However, a number of the invitations have not been delivered due to the fact that the addresses of the men were not listed in the directory.

Any men who think they have been extended an invitation and who have not yet received one should go to 205 South building at 12:00 this morning to check over the list. The list will be available to any fraternity men who may wish to ascertain whether or not their invitations were delivered.

Only Two Dates

The Interfraternity council has issued a warning that fraternity men may not make more than two dates with freshmen during the visiting period today. Further appointments must be made some time after today.

Freshmen are required to visit the houses of fraternities which extended them invitations, and there they make dates for other visits.

For the benefit of freshmen who do not know where the various houses are located, the Interfraternity council will have three of its members at Graham Memorial from 2:00 o'clock until late in the afternoon to give information relative to the location of the lodges.

PRESS PUBLISHES TWO NEW BOOKS

First Authentic Biography of Fanny Kemble Written by Mrs. Leota S. Driver.

Two new books were published by the Chapel Hill press on June 1. These are "Fanny Kemble," by Leota S. Driver and "The Schools and International Understanding," by Spencer Stroker.

"Fanny Kemble" is the first authentic biography of that unusual personality of the nineteenth century, an actress, poet, novelist, musician, and critic. Her versatility permitted her to cover a great range of activities, but she was most known as an engaging and extraordinary personality. This book covers her life adequately, and has been much discussed.

Mrs. Driver is on the faculty of the Peabody College for Teachers in Tennessee. Her husband's book "John Sevier" was published by the Chapel Hill press about last December.

"The Schools and International Understanding," by Spencer Stroker deals with the belief in using educational institutions as mediums in promoting international understanding. This book analyzes the progress made in this line up to 1930.
