Our Brain Truster

THE appointment of Dr. Claudius Temple Murchison Wednesday by President Roosevelt, subject to senatorial ratification, as director of the bureau of foreign and domestic commerce of the United States will, if so confirmed, snatch from our faculty a man of outstanding ability not only as a theoretical economist of the first rank but also as a practical-minded executive. And it is another piece of evidence that the control of the government of this nation is becoming vested in the hands of those individuals whose knowledge of the problems, not political power, is thrusting them into leadership. It is obvious that Dr. Murchison was considered for the position of importance in Washing. ton due to his capacity to combine practical experience with intelligence in the field of economic theory. When the name of Professor William L. Thorp of Amherst was withdrawn by President Roosevelt from consideration for this position, it was common knowledge that the reason for the decision was that Professor Thorp lacked practical experience. Dr. Murchison, it has been pointed out, was appointed because he was an answer to an effort by the administration to secure a man of Dr. Thorp's economic knowledge with that essential knowledge from experience. The trend toward governmental control by professors of experience is in direct opposition to the old theory of administration. When President Wilson took the presidential office, it was a malicious "crack" to speak of him as "Professor Wilson late of Princeton." The Brain Trusters that President Roosevelt has gathered around him for advice and planning have proved that men intelligently schooled in practical theory are eminently fitted for the jobs of directing the actions of a nation with the vast national and international interests of America. While we will be sorry to lose Dr. Murchison -and we feel that the optimism of Senator Josiah Bailey regarding the probability of senatorial confirmation was well-founded-we are proud of him in his achievement. We know that in the administration of his new duties he will continue the outstanding quality of hard work which has characterized and distinguished him as a member of the University faculty .--- P.G.H.

THE Playmakers' production of experimental as of the laymen. By charging plays Tuesday night brought to attention again a price of admission to the conthe fact that that organization is getting away certs that will be given, we can from one of the purposes which the group origi- keep up the emergency fund out nally set out to fulfill; one of the Playmakers of which unemployed musicians aims is, or should be, to help young playwrights receive their salaries. The plays Tuesday night were poorly produced. to the material .-- K.W.

In the first place, why do not the instructors set a deadline by which plays are to be turned in? The writers are allowed to hand in their work whenever it pleases them; if there were a deadline, they could be made to stick by it.

Of course, some idea of a play's quality can be determined from an experimental production, but in most cases, matters like tangled lines, halts and stumblings, and scenery that seems merely to be pasted together detract attention

A Stopper For the Cynic

COLUMNISTS should be classed as the most unhappy set of people in the world. They must sneak around with supersharpened ears and eyes, even wary for the least little slip that some one may make that will furnish copy; when they read

they can't fully enjoy it, for they must be on the lookout for errors that can be called to pub lic attention or commented upon And after this travail, when they set down their observations upon the Follies and Foibles of the World, no sighs of relief are the columnists'; they must start all over again.

And, pray, for what is this work? After checking up, this member of that unfortunate se has found that only two persons on the campus follow completely through these weekly mean derings; small wonder that Chapel Hill is classed as uncul-

An Impression

impressions Due to false abroad on the campus concerning my attitude toward Adolf Hitler and his policies, I desire to make a few short statements in the hope that I may clear these up.

As a partisan I am violently opposed to the Hitler regime. As a former German citizen, I cannot blind myself to the good sides of the movement. As a student of human civilization, I try to have an objective attitude. In my lectures on Hitler and his regime, I have tried to give rather an historical analysis than to pass moral judgment which had to be negative, as it comes from a different concepprevalent in Germany.

In my lectures I have stated that the Hitler movement is at once something very recent and also very old in the history of Germany. There is in it the revolt, despair, and hysteria of a defeated and abused nation, in so far as it resembles the movement of the Maccabeans in Jew-

but never perfected.

Reporters, artists, a pseudo opera-singer and other "floosies;" rich men, poor men, a crazed killer (wearing a Phi Bete key) western settlers and the spirit of Karl Marx met together in character last Tuesday night in the Playmakers theatre with various purposes in mind. It was a night of "experimentals," meaning in the first place, half-learned lines, in the second place, hurried and makeshift sets, and lastly the usual informal and whimsical introductions by Professor Koch.

The evening was distinguished by four things; a remarkably tolerant and appreciative audience, some mediocre acting, tion of life and history than that the hot weather, and the inability of the Playmakers staff-including Proff Koch and Sam Selden-to close one of the side entrances before a performance. The plays, all written in the University play-writing courses and produced in a week's time, ranged from melodrama to slapstick.
