Documents Recall Days of Elizabeth

By Charlie Kessler

Gathered from cellars, closets, and attics in every corner of the earth, night at 7:30 in the Green Room of the Southern Historical Collection has the Carolina Inn. Professor J. O. Baistored in the basement of the Univer- ley will read a paper on "The Curious sity library over two million documents, the largest and most complete collection in the world pertaining to the South and the Southern way of life.

For considerably more than a generation Southerners have complained that their section of the nation has not been given sufficient attention by writers on American history. Some of the more ardent ones have gone even further and declared that, in general, where notice is taken of the South, it has been in the direction of misrepresenta- the organization, and Robert Wautions, even slander. It is now the purpose of the Southern Historical Collection to present to the world and to posterity a clear, unbiased cross-section of Southern life and thought from the discovery of America to our present day. Oldest Document

The oldest document of this collection concerns the historically famous De Rosset family, and dating back to 1581 it is signed by Louis XIV, King of France. Hundreds of aged papers relate an exciting, romantic tale of this famous family. The De Rossets, being Huguenots and forced to flee their homes in France, migrated to England. They later came to America, settling in Wilmington, N. C.

Also accessible to the student and investigator are numerous letters concerning the Wright brothers' experiments with the airplane at Kitty Hawk, N. C., records of the Polk family, of the Brown family, and many others. Began in 1848

This tremendous collection was started in 1848 by the Governor of North Carolina. Until recently Mr. J. G. Hamilton was director of the proceedings, and at present Mrs. Cotton, Curatur of the Southern Historical Collection is in charge of arranging these papers in some semblance of order. Already having worked 9 years, and aided by a WPA project since 1933, Mrs. Cotton says that she is far from completing the task.

Stored in a huge fireproof vault in the basement of the University library, these documents have filled and are even overflowing their bounds. Already it has been necessary to store the surplus in pasteboard boxes atop the crammed metal filing cabinets. Many Donations

Archaeological Society To Meet at Duke

The eighth annual meeting of the Archaeological Society of North Carolina will be held at Duke University on the evening of November 28.

Dr. Guy B. Johnson, sociology department of University, is president of chope, director of the laboratory of archeology will be present.

ARMISTICE

(Continued from first page)

Beginning with a joint parade of the band and the Naval ROTC unit down Cameron Avenue to the Old Well, the program includes an invocation by the chaplain of the Chapel Hill American Legion post and a brief address by Professor Olsen.

The flag between the well and Davie Poplar will then be lowered to half mast, and while taps are being played, the traditional moment of silence will be observed. The band will play the Star Spangled Banner as the flag is raised again.

Graham Memorial will present a broadcast of President Roosevelt's Armistice Day address in the small

The Old Days

Picture Post Card Reveals UNC in the Old Days--1907

By Morty Cantor

Setting of one of the great early Former Students American universities in 1907 and its amazing growth in 34 years was revealed by a picture post card discovered by Dr. J. G. Beard, dean of the School of Pharmacy.

A photogravure in sepia, this old card shows the campus of the University of North Carolina as it was in 1907 as seen facing South building.

When compared to the Book Exchange map, the card makes the old campus look like a tiny cluster of buildnow known as the arboretum and large empty fields-those same fields which are now the lower quadrangle, Woollen Gymnasium, the University library, MY SAY Venable, Bingham, Manning, Murphey, and Saunders Halls.

There were only 19 buildings in those days. The basement of South building had lecture rooms and the second and third floors had living quarters for students. Hill Hall was the old library building, and Person was then being used by the School of Medicine. The Chemistry department had its quarters in Howell Hall, and the basement of Old West had been taken over by the Pharmacy School.

Approximately where the Infirmary is now, stood the first college observatory in America, equipped with what was then considered a large astronomical telescope. Across the road where Peabody hall now stands, was a large T-shaped building called The Commons, The House Administration, in a drive which was a combination of student to forestall a close vote on the mo- gathering-place and dining hall. On mentous issue, today ordered full the site of Memorial Hall was an odd- ner. speed ahead on House consideration of looking, octagonal-shaped house with
