

**Professor Popularity Poll Results**

**Lefler, Mackie, and R. Hobbs Most Popular Professors; Dykstra, Friederich Found Most Unpopular of Faculty**

The long-awaited Professor Popularity Poll results have been tabulated and the complete results published for the benefit of students, faculty and administration alike.

To the student, this tabulation might serve to guide him in selecting professors for future courses or perhaps to satisfy his sanguineous lust to see his instructors receive that which they have given or even to fulfill their curiosity to see what is the general student opinion of our faculty.

To the faculty this poll may guide them in improving their methods of instruction.

The administration might find this a useful guide when and if they decide to weed out the old stock and refresh our flock with new blood. Results are always a product of a stimulus or cause.

Therefore, the Daily Tar Heel presents the results of the Professor Popularity Poll for all its readers to consider over their morning coffee.—R. C.

**Letters To The Editor**

**A. B. Smith Statement**

I have decided to enter the race for the presidency only after ascertaining that I shall be able to fulfill all the demands that this high office will exact of me should I be elected. I am submitting my name to the student body on the basis of my qualifications and past record in student government and on a platform of future action that is designed to lift student government out of the morass into which it has fallen during the war years.

Since returning to the campus I have strived for a better orientation and indoctrination system and a more efficient financial structure in student government and have worked to attain better student entertainment. These efforts have seemed almost futile when the men in office have failed to fulfill their obligations to the student body. I pledge that I will continue to work for these ideals whether in office or not; but I can do much better in office than out. I have worked for a student constitution that will clarify and record the powers of student government that have been inherited over a period of 151 years through student acceptance of the responsibility that accompanies privilege. I do not agree with the new constitution in its entirety but am content to give it a chance to work and to amend it when weaknesses make themselves apparent.

Under the leadership of weak officers, student government has yielded more and more of its privilege and powers to the administration and faculty. If elected I am determined to halt this backward trend that threatens eventually to deprive the students of many more hard-won privileges, and which may even lead to an end of student government.

There are many persons in the faculty and administration who would like to abolish fraternities. There are many who think that coeds have too many and too liberal privileges. There are many who would like to terminate the honor system. Only by strong, efficient, experienced student leadership can these elements be kept in the minority. I pledge myself always to try to see that the voice of the students is able to compete with the voice of those who attempt to subdue their rights.

**Blount Stewart Pledges:**

To avoid having elections declared null and void by appointing a competent elections committee, and to keep the student body from having to vote twice on every issue.

To work for first class entertainment programs by having students acquainted and interested in this work placed on the committee.

My Bonnie lies over the ocean,  
 My Bonnie lies over the sea—  
 When she cables unwearingly  
 devotion,  
 My Bonnie lies—obviously—  
 Army Times

Long ago when the Bishop of Texas visited New York, he was taken to a very swanky ball, at which it was evident that the women's dresses were cut very low, both in front and in back. When asked if he had ever seen such a sight, the bishop diplomatically replied, "Not since I was weaned."

She: "Was father surprised when you said you wanted to marry me?"  
 He: "Was he surprised? The gun fell right out of his hands."

Pretty Caller: "May I see the CO?"  
 Sergeant: "Certainly, lady. The CO always has time to see a pretty girl."  
 Pretty Caller: "Well, tell him his wife is here."

Yardbird: "Hi there, Rookie. How's your girl?"  
 Rookie: "Not so good, Yardbird, not so good."  
 Yardbird: "You always were lucky."—Army Times

Together they sat  
 On a bench in the park  
 Together they sat  
 So close in the dark.  
 The breezes blew softly  
 The moon shone above  
 'Twas a warm summer evening—  
 A night made for love.  
 He snuggled up closer  
 She kissed in the dark  
 He licked her sweet face  
 And let out—a bark.  
 —Purple Parrot.

The Judge, disgusted by the number of divorces in town, finally tacked this sign up on the door: "Meditate well, girls, before you make your decision. Remember alimony is next to worthless on a cold night."

Though early treatment is important, appointments at some cancer clinics must be booked eight months in advance.
