Man with a system

Simply pick up your telephone and you can route your voice through any one of thousands of central offices-some with dial mechanisms so complex they stagger the imagination, yet so efficient they seem to work like magic-others staffed by competent, courteous operators whose standards of work have long been a fine tradition.

You command, in effect, millions of miles of telephone wire and cable.

You can direct your call -one of some 110,000,000 that will be made today - to any one of some 53,000,000 telephones here and abroad.

The operation of this vast system is big business. It is a complex, many-sided business in which thousands of college trained men are working in their chosen fieldsdevelopment or research, engineering planning, accounting or statistics, public contacts, supervision of operations or other phases of management. These men have found highly interesting and rewarding

Bonds Issued to Cover Cost of Street Repairs

of Aldermen voted for a bond grew. issue totaling \$12,000. Bids were received September 5 for the job of patching, resurfacing and eal-coating the 40,000 square yards of street.

Under the state constitution these bonds can be issued by the Aldermen, without a popular vote, because the amount is not more than two-thirds of the reduction debt of last year. Any question of the validity of the ordinance must be submitted to the Aldermen within 30 days after its enactment.

Due to the war and its resulting shortages the city's streets have been allowed to deteriorate, and the increased traffic on the streets adjacent to Franklin St. make it imperative that this project be completed as soon as possible.

Speed laws aren't the only good reason you're smart to know what you're driving at.

A genuine leather

that reads value WITHOUT SUPERLATIVES here are the facts
