New Scar On Campus

Much to our astonishment, yesterday we discovered a new path that appeared over the summer. Not in Battle Park, or Coker Arboretum, or the woods around Kenan Stadium, ter finds U. N. C. with a new where new paths spring up occasionally, and are to be expected.

This path is a deep hard scar right across the commons back of South Building. The temptation is to blame residents of Steele Dormitory, but it is probable that other summer school students coming from Saunders and Murphey aided and abetted in its making.

We measured the difference in paces. Those who take the mth save themselves two steps over walking around the walks. And for such a cost in beauty!
