Kilinger To Be IFC Court Head

Pete Kilinger, Phi Delta Theta, has been appointed the chairman of Interfraternity Council Court for Summer School 1957. Jerry Oppenheimer, chairman of the IFC Court, announced yesterday.

Oppenheimer and Bill Redding, president of the IFC, have selected the court for both sessions of summer school.

"Their major responsibility will be to enforce the IFC's summer rush rules," Oppenheimer stated.

The rules said that "from the end of the spring semester until the beginning of orientation no man who has not been through formal rush at Carolina can eat, sleep, or drink at a fraternity house."

A fraternity or individual fraternity members may not spend money for the entertainment of these men in Chapel Hill or the surrounding areas.

Those on the IFC court for both sessions of summer school are: Smith Bradfield, Phi Gamma Delta; Ben Levy, Zeta Beta Tau; and Bill Michael, Kappa Sigma.

During the first session Tom Coolman, Chi Psi; Chuck Flack, Kappa Alpha; and David Moye, Sigma Nu, will serve on the court.

During the second session they will be replaced by Walter Brown, Sigma Alpha Epsilon; Jim Hillman, Sigma Phi Epsilon; and Bill McVicar, Sigma Chi.

Oppenheimer Announces Summer Counselors

Six men will serve as counselors for Summer School Orientation, according to a recent announcement by Jerry Oppenheimer, chairman of the campus orientation committee.

They are: Craven Brewer, Gene McDaniel, Bill Michael, Jim White, Sam Scott and Keith Smith.

Summer school orientation will take place June 5 and 6, and will be a modified version of the fall program, including testing, physicals, registration, Student Government meetings, the Chancellor's reception, Honor System convocations, campus tours and a welcoming dance.

The men's counselors will have a short organizational meeting Tuesday night, June 4, at 7 p.m. in the Orientation office of Graham Memorial, said Oppenheimer.

Preakness Won By Bold Ruler

BALTIMORE, (AP) — They let Bold Ruler run his race yesterday in the 81st Preakness Stakes and the Wheatley Stable colt humbled the Calumet Farm's favored Iron Liege in Maryland's great 3-year-old classic.

In as thrilling a race as has ever been witnessed at this old cavalry outpost Eddie Arcaro, Sunny Jim Fitzsimmons and Co. got partially even for the licking Iron Liege handed them two weeks ago in the Kentucky Derby at Louisville. Not since 1948 and Citation has a Derby winner copped the Preakness.

Vice President and Mrs. Nixon were among the crowd of 32,856 which jammed Old Hilltop and screamed with excitement as Bold Ruler took the lead going into the backstretch and led the parade home by two big lengths over Willie Hartack and Iron Liege in the \$113,800 gallop.

University (Continued from page 1)

Consultants in classrooms and labs will be an important feature of the new program. Classrooms will be opened to persons widely experienced in practical politics, Political party leaders and elected officials will be invited to discuss intimately with small groups of students their experiences and insights bearing on the political process.

Courses will be opened to advanced undergraduates and graduates. The Falk grant will provide for five graduate fellowships annually, partial support for an additional professor, expenses and fees of consultants, expenses of internships and field work, lab equipment and supplies, subsidies for extracurricular activities, and administrative, secretarial and office supplies cost.

Covering The Campus

SWIMMING POOL

The outdoor swimming pool, will be open from now until the end of the school year from 2-5 p.m. weather permitting. It was announced recently. When the outdoor pool is not open, regular hours will be observed at the indoor pool.

created borazon — a completely new, diamond-hard substance which promises far-reaching effect on industrial processes and everyday living.

There are more than 27,000 college graduates at General Electric. Each is provided the opportunity for self-development in the hope that his creative ability will bring forth new ideas. As General Electric sees it, these new ideas, stemming from man's native curiosity, will lead to the development of countless products as yet undreamed of for our nation's defense, industries, and homes.

A physical-chemist at General Electric conducts studies of the atomic structure of matter, and of the way atoms and molecules interact under a wide variety of conditions.
