

Covering The University Campus

PHILOGICAL CLUB
Prof. W. L. Wiley of the Romance Languages Department will present a paper, "The Paris Theatre Audience of the 17th Century," at the Philological Club Tuesday, 7:30 p.m. in the library assembly room. Faculty and graduate students and their families are invited to attend.

COSMOPOLITAN CLUB
The Cosmopolitan Club will present slides of the 1957 Moscow Youth Festival at its meeting today in the Library Assembly Room. Andy Blane, delegate to the festival, will speak at the informal "get acquainted" tea.

A Gal, to tame a whiskered beast Should send ten Valentines, at least.
The Intimate Bookshop
205 East Franklin St.
Open Till 10 p.m.

Dr. Fridoon Antia from Bombay, India will also speak after the dutch supper in upstairs Lenoir Hall. Dr. Antia is an economist who studies at Geneva, the Sorbonne and the London School of Economics. The public is invited to attend.

OXFORD SCHOLAR TO SPEAK
Prof. Ronald Syme of Oxford University will visit UNC this weekend and give a public lecture Monday, at 8 p.m. in 105 Gardner Hall. "The Romans and Spain" will be the title of his talk, which will be sponsored by the UNC Classics Department.

FACULTY CLUB LUNCHEON
Dr. Everett Palmatier, chairman of the Physics Department, will address the Faculty Club Luncheon Tuesday at 1 p.m. at Carolina Inn.

PI SIGMA ALPHA
Current economic development of India will be discussed at a meeting by Dr. Fredoon Antia of Bombay

at 8 p.m. in 105 Caldwell Hall, Monday.

Dr. Antia is manager of the Cement Marketing Company of India. He earned his doctor's degree at the London School of Economics and has attended universities in Geneva, Berlin and the Sorbonne. The meeting is sponsored by Pi Sigma Alpha, political science fraternity.

TRADING POST OPENS
Alpha Phi Omega is now operating its Trading Post for used books in the cabinet room of the YMCA from 9 a.m. to 4 p.m. Students may bring their books, which the APO will sell at the requested price plus a nominal handling charge, through Tuesday.

ANCIENT AFRICAN ART
The exhibition of ancient African art will close today at the African Hall Art Gallery. The public is invited to a talk on the exhibition 3 p.m. Kenneth Nass, acting chairman of the Art Department, will explain the art and other factors relating to the exhibited works. The gallery is open from 8:30 a.m. to 5:30 p.m. daily and from 2:30 p.m. to 5 p.m. on Sundays.

NURSING GRADS
UNC has been notified that women graduates who hold the degree of bachelor of science in nursing are eligible for membership in the American Association of University Women.

As a result of action taken by the Committee on Standards and Recognition of Colleges and Universities of the AAUW, all graduates of the UNC School of Nursing, regardless of date of graduation, are eligible for membership.

Fires

(Continued from Page 1)

PSYCHIATRIC TREATMENT
At the trial yesterday, Satterwhite's mother proclaimed that Satterwhite did not know what he was doing, and Judge Stewart said that the boy would be able to get psychiatric assistance in his cell.

After the trial, Satterwhite started talking about the fires, and by the time he had arrived at Hillsboro, he had admitted to setting the fires in the past few weeks that the police attributed to arson.

Foreign Film Series Begins This Thursday

Tickets for the Graham Memorial Foreign Film Series are now on sale at the GM Information Desk.

A ticket for the series, which includes eight films, costs \$2 and can also be purchased at the door before the showing of the first film.

The films scheduled for this semester are: "Mr. Hulot's Holiday" (French, Feb. 6), "Border Street" (Polish, Feb. 20), "Forgotten Village" (Mexican, March 6), "Topaze" (French, March 20), "Ten Days That Shook the World" (Russian, April 10), an evening of experimental films (April 24), "The Male Brute" (French, May 1) and "Angelo" (Italian, May 15).

UNC Med Student Admits Recent Fires

(Continued from Page 1)

he told police that he had gone to Durham, and changed the license plates.

Police continued questioning Satterwhite until about 1 a.m. Saturday during which time he explained these periods of emotional build-up and how he had found some relief in his childhood by breaking bottles. When he grew older, Satterwhite recalled taking long drives, which would give him partial release from the emotional pressure.

Under police questioning, and with the help of UNC student Owen Leland, who saw Satterwhite in Hill Hall the night police found two pianos soaked in oil, he admitted being in the building, and leaving his Leland threatened to call police. He did not admit spreading the oil until yesterday afternoon.

ORGANIST ROBERT BAKER OF NEW YORK
His Recital To Dedicate New UNC Organ Console

Organ Recital Tuesday To Dedicate Console

The new Reuter Organ Console in Hill Music Hall will be dedicated at a special recital on Tuesday night at 8 o'clock.

Robert Baker, an outstanding American organist, will be the guest artist for the program, one of the Tuesday Evening Series. The public is invited to attend without charge.

In addition to teaching organ at the Union Theological Seminary, Dr. Baker is organist at the Fifth Avenue Presbyterian Church and the Temple Emanu-El in New York. He has appeared on many university campuses as recitalist and lecturer.

His Tuesday night program, chosen to best make use of the Reuter Organ's musical possibilities, is divided into three groups of compositions, beginning with the baroque period.

Handel's Concerto No. 1, in G Major, and Bach's Prelude and Fugue in B Minor will be included, along with works by Dietrich Buxtehude and Jean Philippe Rameau.

Other selections on the program are by Darius Milhaud, Cesar Franck, Jean Langlais, Alfred Hollins, Samuel Barber, Johann Christian Rinck and Joseph Jongen.

Satellite Comparison

By THE ASSOCIATED PRESS

Here is a comparison of the Soviet Union's two satellites and the U. S. satellite:

	Explorer	Sputnik I	Sputnik II
Speed	18,000-19,400 mph	18,000 mph	17,840 mph
Altitude Max.	1,700 miles	560 miles	1,056 miles
Weight	30.8 pounds	184 pounds	1,120.29 pounds
Length	80 inches	23 inches	Unknown
Diameter	6 inches	23 inches	Unknown
Orbit Time	106-113 minutes	96.2 minutes	103.52 minutes

(Continued from Page 1)

were told at a news conference of civilian scientists in the program that "The name of this particular satellite is 1958 Alpha."

This, of course, seemed to suggest the scientists might call the second U. S. satellite "Beta," the second letter of the Greek Alphabet.

Meanwhile, the Army was still trying to decide on a new name for the rocket launching vehicle, still designated as "Jupiter-C." Among the names under consideration is that of "Juno," the consort of the mythical Jupiter who, like Jupiter, represented light and fire.

Dr. Moller Set To Lecture On Earth Satellites

Dr. Christian Moller, a Danish scientist and authority in the field of artificial earth satellites, will deliver four lectures this month here and at Duke University.

Dr. Moller, a professor at the University of Copenhagen, has been doing research at the UNC for the past two months. The project is sponsored by the Institute of Field Physics, a privately financed project for studies in gravitation.

Dr. Moller will speak on Monday at a seminar in the UNC Physics Department. He will lecture at Duke on Feb. 5 and Feb. 10, and again in Chapel Hill on Feb. 17.

U.S. 'Moon' Proves A Success Soaring Around The World

WASHINGTON, Feb. 1 (AP)—America's first space satellite proved itself a success today.

It is soaring around the earth high enough—200 to 1,700 miles—to stay in space a long time, at least several months and possibly 10 years.

Its path is "quite satisfactorily close" to what had been planned, its delighted scientific godfathers said. They told newsmen they didn't know of a thing that had gone wrong.

The satellite is not easy to see, but observers in the Southern United States may spot it with field glasses.

It has already radioed back to the earth some information about temperature, and also cosmic rays and possibly about meteorites, two of the principal mysteries of space that "Explorer" was sent aloft to look into. Its steady "E-E-E-E-E" broadcast is regularly being picked up by the world-girdling chain of tracking stations.

And it was already plain that the success of the pencil-shaped moonlet and the bulky rocket system that hurled it on its 18,000-miles-an-hour course was serving as a strong tonic to the United States' confidence in its own technical ability. This confidence of Americans and

some of their friends had been sent into shock by Soviet satellite success and the failure of the first U. S. effort.

President Eisenhower's "That's wonderful!" seemed to sum up the national mood.

The elation went around the free world, inspiring fat headlines in Western Europe and a shout of congratulations from a Japanese scientist.

A Soviet spokesman said, "We congratulate you." A Soviet scientist said the third Sputnik will be launched soon.

A crowd of 10,000 joyfully demonstrated last night at Huntsville, Ala., home of the Army Ballistic Missile Agency which produced Explorer.

In Washington, delight shone

through the careful words of a panel of scientists assembled to answer newsmen's questions. Congressional leaders mixed congratulations with exhortations to push ahead quickly in the competition for space.
