ABC Election Set For Feb. 3 Here

The Board of County Commissioners, meeting in a special session last Thursday, changed their requested date for the holding of an A. B. C. election in Orange County from February 7 to Tuesday, February 3, next.

The commissioners at their monthly meeting on September 2 had voted to ask the Board of Elections to conduct the county-wide referendum for the establishment of liquor stores on February 7, coinciding with a previously announced decision of the Alamance County commissioners to hold a similar vote on the same day.

The date for the election was moved back to February 3 in order that it might be held prior to the convening of the State legislature on February 4 and possible legisla-

tion to prevent the holding of the election or the application of the state law.

No vote on the establishment of ABC stores has been held in this

Members of the board had been advised that opponents of the referendum may have prevailed upon members of the legislature to introduce special local legislation restricting or otherwise interfering with the proposed county-wide expression of sentiment on the question by the electorate.

Indications have been evident for several years that there is strong sentiment in all parts of the county for another vote on the question and the Commissioners, acting on informal petitions, called for the vote.

Extra Four And One Half Million Asked By Consolidated University For 1959-60 Operational Expenses

Public To See Art Museum After Ceremony

The public will get its first look at the William Hayes Ackland Memorial Art Center here tomorrow following formal dedication ceremonies.

On display will be an exhibition of paintings, sculpture and other art loaned by collegiate galleries throughout the country.

Edson B. Olds of Washington, a friend of Ackland and a trustee of his estate, will present the building to the University.

William D. Carmichael Jr., vice president of the Consolidated University, will make the acceptance speech.

S. Lane Faison Jr., director of the Lawrence Art Museum of Williams College at Williamston, Mass., will give the dedication address. Present for the ceremonies will be state officials, legislators, university trustees, leaders of the art world, and other guests.

Ackland will be buried in a memorial room in the Art Center. It also will include galleries and facilities for the university's art department.

Social Rooms To Be Open In Men's Dorms Saturday

Social rooms in eight men's dormitories will be open Saturday to all guests.

The opening of social rooms has been seldom done in the past but may become more frequent in the future, pending the results of Saturday's large-scale experiment, according to Student Body President Don Furtado.

The move for opening the eight social rooms came yesterday at a meeting of Miss Katherine Carmichael, dean of women; Sam Magill, assistant dean of student af-

Medical School Money To Help In Research \$62,700 Grant For Psychology Is Announced

Carolina's School of Medicine has received a \$186,000 grant enabling it to establish a new research program for the next five years, Dean W. Reece Berryhill has announced.

School professors' recent discoveries pointing to allergic and infectious processes as factors causing major heart and kidney diseases led to the grant.

The sum was awarded by the Institute of Allergy and Infectious Diseases of the National Institutes of Health. It will support an expanded program of study in microbiology and the related clinical fields of allergy and infectious disease.

Director of the new research will be Dr. William J. Cromartie, associate professor of medicine and

active efforts to develop ways to bacteriology.

The program will provide post-doctoral fellowships and fulltime residencies for students wishing to specialize in these fields.

"We need many more individuals trained in the basic science of microbiology and the clinical fields of allergy and infectious diseases, Dr. Cromartie said, "if effective treatment and control these important diseases are to be made."

Participating in the program as teachers and/or researchers in addition to Cromartie are faculty members Dr. D. A. MacPherson, chairman of the Bacteriology Department; Dr. Edward C. Curnien, chairman of the Pediatrics Department; and Dr. Charles H. Burnett, chairman of the Department of Medicine; and specialists in seven

fields.

Psychological research at the University has been given a boost by a \$62,700 grant from the National Science Foundation, Psychometric Laboratory Director Dr. Lyle V. Jones has announced.

The ward will facilitate research to be conducted during a five year period, Dr. Jones explained. Studied will be methods for measuring and analyzing simultaneously a number of different psychological traits and characteristics.

The new program constitutes part of a series of recent research projects undertaken by the Psychometric Lab staff members.

Other others are (1) the revision of group tests in reading comprehension from the fourth grade to the superior adult level; (2) the recording of test scores in primary mental abilities, reading, arithmetic, and spelling of children age six and later at age nine in order to predict academic success in school;

(3) The study of the pattern of growth and subsequent decline of mental abilities with advancing age; and (4) the analysis of 150 pairs of identical and fraternal twins with a number of psychological tests and physical measurements to make a "twin diagnosis."

OTHER STUDIES

Four other major studies are currently underway at the lab. Two are financed by governmental agencies, one dealing with preference for food combinations and the other with acceptance of certain clothing and equipment items by Army enlisted men.

The other two are concerned with aphasia, the partial or total loss of speech due to brain malfunction.

Lab staff members include Dr. Thomas E. Jeffrey, Dr. R. Darrell Bock and Dr. Emir H. Shuford, assistant professors; Dr. Dorothy C. Adkins, professor and head of the Department of Psychology; and Dr. Thelma G. Thurstone, professor of education.

A National Science Foundation post-doctoral fellow, Dr. John E. Overall, is also associated with the Lab.

INFIRMARY

Students in the infirmary yesterday included Frank W. Carper, William Schmidt, Herman Pickel, Vasamp Bhapkar; David Johnson Goode, Harvey Lake Harris, Miss Julia Sue Ayers, Boyd Ray Barrier, and Brian Wilson Roberts.

Faculty Pay Increase Is Stressed By Friday

The Consolidated University of North Carolina yesterday asked the State Advisory Budget Commission for an increase of \$4,460,889 in operational appropriations for the 1959-60 university year.

A. H. Shepard, business officer and treasurer, said the budget also called for a \$4,895,175 increase in the 1960-61 budget over 1958-59's figure of \$19,015,505.

Textile Study Funds Asked By N. C. State

The Commission was asked to approve salary increases of \$4,749, 132 for UNC during the next biennium to maintain and strengthen good teaching.

Consolidated University President William C. Friday told the commission, "We have made good progress in our salary program but more must be done if we are to meet the problems before us."

Salary increases are "our first priority throughout the university in the 'B' budget," Friday said.

The State Board of Higher Education has recommended salary increases of \$2,700,000 for the biennium. This figure, however, did not include academic staff personnel such as librarians, administrators etc.

The president pointed out that the university was among the top 40 in the nation. He added that in order for the university to stay on a high level, the faculty salaries must be increased.

Although President Friday stressed the needed hike in faculty salaries, he briefly discussed research programs, library services and service functions (extension department and adult education).

Friday strongly endorsed "the principle of flexibility in the handling of institutional budgets. We can make a much more efficient and wiser use of our time and of the resources entrusted to us if we have the flexibility to place them where the need appears greatest."

Each of the three universities, Carolina, Woman's College and N. C. State College, spoke on the needs of their individual college.

Shepard said the Advisory Budget Commission earlier asked for a delay in requests for capital improvements. He said this budget would probably be released some time in October.

WC Requests \$193,578 For Biennium

Chancellor Gordon W. Blackwell of Woman's College said today \$193,578 is needed by the school during the next biennium to restore budget reductions due to receipts deficiencies.

He told the Advisory Budget Commission \$90,356 is needed the first year and the \$103,222 the second year "to correct for errors in receipts estimates in the past."

Blackwell said that over the past years "they have been projecting receipts of about \$30,000 more than they could realize." The receipts, he explained, are from student fees.

The college is affecting a saving this year by not filling staff vacancies, he said.

Burglar Takes Food At Fraternity House

Chapel Hill Police today were looking for a well-fed burglar who got plenty of staple edibles last night at the Sigma Alpha Epsilon fraternity house on South Columbia St.

Fraternity officers reported that the following items were taken from the kitchen at the house: 23 pounds of butter, 10 pounds of cheese, 35 pounds of sugar, nine dozen eggs, a gallon of mayonnaise, a dozen heads of lettuce, and 10 pounds of tomatoes. They valued the stolen goods at \$34.50.

Approximately 60 University administrative personnel, together with their equipment and records are in the process of relocating in the brick building. The office space vacated by these departments will be re-allocated by the Chancellor's committee on space, headed by Dean James L. Godfrey.

The basement of Steele will continue to be used by the Booketeria.

New Dorms Free Steele

The addition of 727 new dormitory rooms at Chapel Hill has freed Steele building on the campus for administrative use beginning this year, according to Chancellor William B. Aycock and J. Arthur Branch, business manager.

Formerly housing students, Steele is undergoing minor alterations enabling it to handle accounting, personnel, purchasing and payroll activities. According to university officials, centralization in Steele will effect more efficient and economical operations of facilities formerly scattered throughout the campus.

Built in 1922, Steele has housed 72 students annually for some time. However, plans for relocating the several administrative offices has been under consideration for a number of years and the transformation will bring the plans into being.

Approximately 60 University administrative personnel, together with their equipment and records are in the process of relocating in the brick building. The office space vacated by these departments will be re-allocated by the Chancellor's committee on space, headed by Dean James L. Godfrey.

The basement of Steele will continue to be used by the Booketeria.

Open Houses In Dorms Close Orientation Week

UNC coeds rolled out red carpets at open houses in seven dorms last night to welcome "Carolina Gentlemen" to the campus and formally close orientation week.

Official hostesses for the evening were dormitory hostesses, graduate counselors and women's orientation counselors.

Mrs. J. C. Clapp, Margaret Dunn, and Mary Montgomery greeted guests in Alderman Dorm and invited them to a refreshment table which was covered with a white linen cloth and centered with an arrangement of pastel flowers flanked by crystal candelabra holding lighted white tapers.

Arrangements of gold and yellow marigolds, magnolia blossoms, and pink gladioli were used in the parlors.

Les Sattorius' combo provided music for dancing at Melver Dorm and balloons and multi-colored streamers were used throughout the party rooms. Silver and crystal punch bowls graced tables which were centered with arrangements of red roses, magnolia and greenery. Mrs. Roy Parker, Nola Hatten and Lucy Postage received guests in the parlors and on the porches.

Japanese lanterns were featured in the square outside Carr Dorm at a lawn party and Hi-Fi music was used for dancing. Mrs. Victor Humphreys, Mariul Shipt and Sue Ballentine assisted in serving punch and cookies from a table covered with a yellow cloth and centered with yellow marigolds and greenery and lighted yellow candles.

A tropical setting prevailed in

First Pep Rally In Emerson Tomorrow Nite

A large crowd is expected to be on hand at Emerson Stadium tomorrow night as students show their backing of Coach Jim Tatum's Tar Heels with a "Kickoff" pep rally.

The first pep rally of the year will get underway at 8:30 p.m. and will be led by the UNC cheerleaders, headed by Carter Jones. The event is sponsored by the University Club.

Dave Jones, president of the University Club, has invited all Carolina students to participate in the first rally.

He said there would be band music, majorettes, and a bonfire. Tatum will introduce his team furnish music for the outing. He during the session.

Jones said a combo also would reminded all students that the victory bell is now on the Carolina campus and would sound off at the rally.

G. M. SLATE

Activities scheduled for Graham Memorial today include: Pan Hel League, 7-9 p.m. in Main Lounge; Cardboard, 7-9 p.m. in Roland Parker 1 and 2; Stray Greeks, 4-5 p.m. in Roland Parker 2; Yack Staff, 2-3 p.m.

School Of Education Strengthened To Train More School Teachers

What is the University doing to train more and better teachers for the public school system—in the face of the swelling enrollments?

One answer was provided this week by Dean Arnold Perry of the University's School of Education.

The School of Education is being strengthened. More students are going into teaching, Dean Perry announced today three new additions to the faculty, aside from the appointment of Dr. Ben Fountain of Rocky Mount some weeks ago.

Dean Perry revealed that undergraduate enrollment in the School of Education here has increased 40 per cent since 1955. An additional ten per cent increase is expected with the enrollment here this week.

Also on the rise is the number of part-time students doing graduate work or taking post-baccalaureate work to complete requirements for teaching certificates in North Carolina and other states.

Part-time enrollment has jumped 27 per cent in four years, and another five per cent increase is predicted for 1958-59.

Continued growth for several years is expected because of the strong demands for teachers, Perry said. "For the past decade the demand for elementary school teachers has been exceedingly high and the State of North Carolina has reached each new school year with a shortage of more than a 1,000 fully qualified

teachers.

"During the next six years the most acute shortage will apparently be in the junior and senior high schools as the children born immediately following the close of World War II are now of junior high school age," he continued. "Each year for the next six years there will be an increase in the demand for teachers prepared for junior high school work and the various subject departments in the North Carolina high schools."

NEW STAFFMEMBERS

Joining the UNC staff to help meet the teacher demand are four new staff members: Miss Annie Lee Jones, Neal H. Tracy, James F. Rogers, and Ben E. Fountain Jr.

Miss Jones, a native of Aurora in Beaufort County, has been at Boston University completing her doctoral studies in education. She has held public school teaching and supervisory posts in several eastern N.C. counties. Her new work at UNC will involve elementary school teaching and supervising, including field work with supervisors of instruction.

Fountain replaces Dr. Wilmer M. Jenkins, who is now superintendent of Hickory City Schools, as director of student teaching and placement. He recently completed his doctoral program at the University.

Tracy and Rogers come to Chapel Hill from North Dakota and Texas,

respectively, Tracy will work in the field of educational administration, and in an improvement program for secondary school mathematics teaching. Rogers will assist in the Education School's graduate centers as well as work in the school administrators program.

EMPHASIS

Passage in late August of the National Defense Education Act of 1958 by the National Congress forecasts still greater emphasis upon teacher education in order that the programs in science, mathematics foreign language and guidance may be strengthened in the public schools, Dean Perry noted.

The staff of the School of Education at Carolina has been studying the new Defense Act for the past three weeks and is making plans to take care of increased enrollments number of fellowships and the substantial stipends to be paid from federal funds for students who are working in various fields covered by the National Defense Education Act.

Special emphasis is being placed upon the graduate offerings in the School of Education. Since the doctoral program in Education was started slightly over 30 years ago, more than 100 students have completed doctoral programs and are now placed in responsible administrative positions and college teaching positions in some of the best institutions in the United States. A
