Covering The Campus

FREE FLICK
The free flick for tonight is Vittorio De Sica's "The Bicycle Thief" starring Lamberto Maggiorani and Enzo Staiola. The film presents a penetrating picture of the postwar European world and will be shown in Carrol Hall Auditorium at 7:30 and 10 p.m.

GRAD CLUB
The Grad Club is having a coffee hour Sunday from 4 to 6 p.m. in Kenan Dorm parlor. All grad students, faculty wives and husbands have been invited.

WESLEY DANCE
The Wesley Foundation will sponsor a square dance in the Carrboro High School Gymnasium at 8 tonight. The dance is free and there will be live music and refreshments.

BINKLEY BAPTIST CHURCH
Sunday worship service of the Olin T. Binkley Memorial Baptist Church will be held at 11 a.m. in Gerrard Hall. The Rev. John T. Wayland will preach on "The Face

of Jesus." A nursery will be held in the YMCA Building during the service.

ARABBI SPEAKS
Rabbi E.M. Rosenzweig will speak on "What's Behind Anti-Semitism" at the Wesley Foundation Supper Forum Sunday. Supper will be at 5:45 p.m. in the basement of The University Methodist Church.

MEDICAL LECTURES
Emil Chanlett and John Lumsden will be Saturday's speakers in the current Medical Science Lecture Series at the UNC School of Medicine.

The entire four month series is devoted to radiation. The lectures are held each Saturday at 11 a.m. in the Clinic Auditorium of the School of Medicine. The public is invited to each lecture of the series.

Professor Chanlett is associate professor of sanitary engineering of the UNC School of Public Health. Lumsden is chief industrial hygiene engineer of the N. C. State Board

of Health, Raleigh.
NEWMAN CLUB
The Newman Club will hold a buffet supper Sunday at 5:30 p.m. The supper will be followed by "An Open Forum on the Bible."

RESEARCH WORKSHOP
Some 35 physicians, statisticians and social scientists will meet here Saturday and Sunday for an Out-patient Department Research Workshop.

The Department of Medicine and the Department of Preventive Medicine of the UNC School of Medicine will be host to the group. Matters to be discussed will concern the improvement of medical care to ambulant (non-hospitalized) patients. This will be the second meeting of the group, a previous meeting was held in New York City last year.

DRUG CLUB MEETING
The monthly meeting of the Durham-Orange County Drug Club will be held Monday at 7 p.m. at the Institute of Pharmacy.

Contest Entry Deadline Approaching For Maid

The deadline for entries in the Maid of Cotton contest, Dec. 1, is fast approaching with apparently no Carolina coed trying out for the title.

The search for the girl who will travel around the world as the 1958 Maid of Cotton began Sept. 1.

Hundreds of applications have been sent to girls, according to the National Cotton Council. These applications, with two recent photographs, must be returned to the Council postmarked no later than midnight Monday, Dec. 1.

The twenty girls selected as finalists will go to Memphis late in December for the final judging.

The lucky girl winning the title will embark in late January upon an international tour climaxed by an around-the-world journey next summer. She will also travel to Nassau, Bermuda, and 30 major cities in the United States and Canada.

As Maid of Cotton, she will be presented with an all-cotton wardrobe created for her by 42 outstanding American designers, and a new

Ford will be waiting for her at the end of her travels.

To be eligible for the title, a girl must have been born in a cotton-producing state. She must be between the ages of 19 and 25, at least five feet, five inches tall and must never have been married.

Applications may be obtained from the National Cotton Council, Box 9905, Memphis 12, Tenn.

Collection Of Paintings Showing In Art Gallery

A collection of paintings by Miss Jane Bolmiere is currently showing at the Morehead Planetarium Art Gallery.

The collection consists of 22 oils ranging from still lifes to seascapes.

Miss Bolmiere received her master's degree from UNC in 1954. Since her graduation she has studied with Hans Hoffmann's School of Art. At present she is librarian at the Metropolitan Museum of Art.

Recorder's Court

Recorder's Court action Tuesday included the following:

Jerry Lee Jones, 22, speeding and passing red light, \$10 and costs; Peter R. Townsend, 18, speeding, \$10 and costs; traffic light violation, \$10 and costs; operating an overcrowded vehicle, \$10 and costs; Bobby R. Mauldin, 23, traffic signal violation, costs;

James Otha Perry, 24, parking on highway, costs;

Samuel Irby Smith, 21, stop sign violation, costs;

Rupert Spenser Eaves, 25, traffic light violation, \$10 and costs;

Richard W. Sieder, 20, public drunkenness, \$10 and costs;

Richard H. Kepley, 21, obstructing traffic, amended to improper turn, costs;

Carl Damm, III, 26, speeding, \$5, and costs;

Sterling Dilton Wooten Jr., 19, reckless driving, \$15 and costs;

William A. Rankin Jr., 27, driving under the influence, not pros; reckless driving, \$100 and costs;

John A. Oetgen, 34, improper passing, costs; expired operators license, costs;

R. A. Porter, parking violations, costs and \$1 for each of 5 tickets;

James F. Arthur Jr., 20, reckless driving, \$15 and costs.

Plane Seats Available For Those Going West

A representative of Piedmont Airlines said yesterday that approximately 16 seats will be available for students on a special Thanksgiving flight to the Midwest.

The flight will leave Raleigh-Durham airport Wednesday, Nov. 26, at 3:30 p.m. It will arrive in Cincinnati, Ohio, at approximately 6 p.m.

Do You Agree?

"It is notorious that the colleges did not recognize the abilities, elicit the best work, or inspire the interest of this century's two greatest men — Winston Churchill and Franklin Roosevelt."

From SOME OF MY BEST FRIENDS ARE PROFESSORS, by George Williams. On display at the Intimate Bookshop.

Travel Magazine Features Planetarium

Space-conscious Americans and their visits to planetaria—including the Morehead Planetarium here—are discussed in Travel Magazine's November issue, in an article by Sando Bologna.

"Any traveler can have stars in his eyes by visiting such planetaria as Morehead at Chapel Hill," says the caption for a full-page photograph of the UNC Zeiss projection device.

The author comments that "Americans were never as space-

conscious as they are today... and this fascination for astronomy is influencing the travel plans of countless families."

He relates a recent incident at the Morehead Planetarium when the audience was taken on an imaginary trip by rocket ship to Venus, and

describes the Copernican error room in the UNC facility. In addition to listing and description of Morehead and the other five major planetaria, Bologna discusses and lists important observatories for solar research and viewing.

GROOMING ELECTRONICS FOR THE SPACE AGE

Systems in the Air

The march of electronics into the Space Age is being quickened as a result of Hughes work in airborne electronics systems.

One such development is the Hughes Electronic Armament System, which pilots high-speed jet interceptors to enemy targets, launching Hughes air-to-air guided missiles, and flies the plane home. Even more sophisticated Electronic Armament Systems completely outstrip those presently released for publication.

Working on space satellites, Hughes engineers are active in the preliminary design of guidance and control systems, communication and telemetry systems, sensing devices using infrared, optical and radar techniques.

Information resulting from Hughes study in the fields of air-to-air and ballistic guided missiles is presently paying dividends into the fund of space knowledge.

Hughes engineers have developed space hardware using high-reliability wire wrapping to replace soldered connections and miniaturized "cordwood" circuit modules to allow high component density.

The advanced nature of Hughes electronic systems—in the air, on the ground, and for industry—provides an ideal growth environment for the graduating or experienced engineer interested in building rewarding, long-range professional stature.

Data Processors, which monitor hundreds of aircraft and store the information for high-speed assignment of defense weapons, comprise one part of an advanced Hughes ground defense system.

Capacitors which provide for electrical, rather than mechanical tuning of circuits, are being produced by Hughes Products, the commercial activity of Hughes.
