**\$850.00**

**A new VW is cheaper at twice the price.**

How's that for an outrageous claim?  
A new VW at around \$1700 (depending on accessories) costs less than a 4-year-old Something Else at \$850.  
We knew you wouldn't believe it. So we've proved it.  
Let's say you plan to keep your next car 5 years and drive a total of 75,000 miles. Here's how it might work out:

	New Volkswagen	Used Something Else
Price	\$1,700	\$850
Gas @ 32¢/gal	\$28 (29 mi/gal)	1,600 (15 mi/gal)
Tires @ \$28 ea.	112 (40,000 mi/set)	336 (20,000 mi/set)
Oil @ 60¢ qt.	42 (27 qts fills it)	57 (needs 5 qts)
Anti-freeze	0 (air-cooled eng)	45 (water-cooled eng)
Cost for 5 years	<b>\$2,672</b>	<b>\$2,987</b>

So you're at least \$206 ahead if you buy the VW. (We didn't even count the extra \$100 it saves on lower insurance and registration fees in many states.)  
If you buy the new VW, you won't have to worry about why the first owner sold it. (And you won't have to pay for the expensive ailments that can hit an old Something Else.)  
Now then. We don't have a crystal ball, but today's market is an interesting clue to the future.  
After 5 years, the used car will probably be a 9-year-old candidate for the junk heap. But the VW will probably just be reaching its prime. (Check the classified ads and you'll find 5-year-old VWs selling for \$600 to \$900, depending on the shape they're in.)  
But you can do much better than that. Don't sell your VW at all. (Think of the money you'll save by driving it for another 5 years.)
