

Services Company NSA Sign Contract

By CHARLA HABER
DTH Staff Writer

The National Student Association (NSA) has signed a two million dollar contract with Academic Services Corporation (ASC), according to Charles Jeffress, a member of the Carolinas-Virginia NSA Steering Board.

The contract provides that over the next seven years the ASC will pay NSA \$2 million and 35% of their profits.

The money earned from the 35% profit return will be put back into a national fund to be used for individual campus programs.

The ASC will serve as a marketing vehicle for NSA services. These services now available to students include RECON, the computerized job-finding service; National Student Travel literature; Student Film Festivals; the NSA Record Club; NSA College Handbook; and the Alliance for Campus Talent Search, a block booking agency for campus concerts.

In addition to the ACS contract, the NSA has received various other grants, according to Jeffress.

The Ford Foundation contributed \$300 thousand to establish a national education reform center. Though this center is still in the planning stages, the NSA has established a "Growing Book" to which any student may send his ideas for reforms that can be implemented on college campuses.

Jeffress also cited the organization of Ford Foundation-backed Summer Training Institutes for students interested in educational reform. The first such institute will be held at the University of California at Davis this summer.

"The NSA wants to establish several centers for educational reform," said Jeffress. "They're also talking about putting one in the Triangle area to benefit the several NSA-affiliated schools in the vicinity."

Grants were made by the Field Foundation in Atlanta for work with student legal rights and by the National Institute of Mental Health for studies on student stress and drug use.

According to Jeffress, the

Student Stress Committee on this campus is currently conducting a survey through the medical school, and results of the drug studies were used extensively in the recent drug bill controversy.

Jeffress also stated that the NSA is funded by the Office of Education and the Office of Economic Opportunity among other organizations.

"Most of our funds come from private organizations or federal grants," he explained. "Hopefully, the contract with ASC will give us enough funds to start developing more campus-oriented programs."
