

There's nothing like hamburgers from a grill as these three students learned Thursday during Morehead Residence College's annual fall Sex Day. The Sex Day had been postponed from last Thursday when rain halted the event. (Staff photo by Leslie Todd)

## In Greensboro Tuesday

# Environmental rally scheduled

by Lynn Lloyd  
Staff Writer

A statewide Environmental Rally, sponsored by N.C. Jaycees and the N.C. Conservation Council, will be held Tuesday.

Governor Bob Scott, astronaut John Glenn, State Senator Hargrove Bowles and Stewart Udall, former Secretary of the Interior under President John F. Kennedy, will tour the state in one day by air. Rallies will be held at each stopping point with a final rally in Greensboro.

The purpose of the rally is to give N.C. citizens an opportunity to "graphically show their concern for environmental protection by being at this rally."

The group will leave Washington, D.C. early Tuesday morning and arrive at the Raleigh-Durham Airport for a rally at 10:00 a.m. Rallies will follow in Wilmington at 11:30 a.m., in Charlotte at 1:15 p.m., in Asheville at 2:35 p.m. and at the Greensboro Coliseum at 8:00 p.m.

In Greensboro, the original group will be met by (all but one of the) N.C. congressmen, who will fly in from

Washington to attend the large rally at 8:00 p.m.

Udall will be the first speaker at the rally. He is now an environmental consultant and writes a column published in many newspapers.

Other speakers at the rally will include John Glenn and Senator Robert Packwood of Oregon. Packwood has been active in the U.S. environmental movements.

Two press conferences will be held at 4:45 p.m. with Glenn, Udall and Scott, and at 10:15 p.m. following the rally in the Greensboro Coliseum.

WITH STEREO COMPONENTS  
BY ADVENT, SANSUI, GARRARD  
and STANTON

\$400  
NOW BUYS YOU ALL  
THE MUSIC.

Until very recently, if you set out with four hundred dollars to purchase a complete stereo system, you were likely to be disappointed. To purchase a music system that could reproduce the lowest octave(s) of deep bass, you found you had to spend about six hundred dollars; for four hundred dollars a component system did not exist which could produce really low bass.

But this has now changed. Because of two new products, we are now able to offer (and guarantee) a complete AM/FM stereo phonograph system which provides the necessary range to reproduce all music. The system consists of two new Smaller Advent Loudspeakers, a Sansui 350a AM/FM stereo receiver, and a Garrard 406 automatic turntable with a Stanton cartridge.

The new\* Smaller Advent Loudspeakers and the Sansui receiver make possible the increased performance and lower cost of this system.

The Smaller Advent is the only loudspeaker costing less than the original Advent which can reproduce the entire musical range. Through the Smaller Advent you can hear the bottom octave of piano and pipe organ, the lowest notes of the double bass, or the bottom string of an electric bass guitar. (These low frequency sounds have a lot to do with the enjoyment you will derive from your music system.)

On all kinds of musical material, and, under most listening conditions likely to apply in most homes, the Smaller Advent is the equal of any speaker system available.

No technical sorcery is responsible for the surprising performance of the Smaller Advent Loudspeaker. To build into the speaker its excellent low frequency capabilities, Advent has had to give up a small amount of efficiency and power-handling ability: the Smaller Advents will not play as loudly as the larger Advents.

The Sansui AM/FM stereo receiver provides enough power to satisfy both you and the Advent speakers; it delivers into the four-ohm Advents more than 44 watts of RMS power, over the entire audio range, with less than 0.7% total distortion. (RMS is the most demanding and least flashy of the various power rating systems.) The FM and AM tuner sections of the 350a receiver are both sensitive and selective: weak stations as well as strong will be received with a surprising fullness and clarity.

To match the level of quality which the 350a receiver and the Smaller Advent speakers represent, we recommend the Garrard 406 automatic turntable. It has a good heavy platter, a convenient cueing control, and minimal (also inaudible) wow, flutter, and rumble. The 406, with the Advent speakers and the 350a receiver, allow us to offer you a quality sound system at a cost substantially lower than that

which was previously possible.

We include with the 406 a dust cover, a base, and a Stanton 500a cartridge — a smooth, light-tracking, wide-range cartridge with fine high frequency capabilities. It complements the excellent high frequency characteristics of the Smaller Advent Loudspeakers and the Sansui receiver.

The complete system, guaranteed for two years, parts and labor, cost \$400. You can sit back and hear all the music.

\*In most talk about stereo equipment, a "new" product is one that is either "better" or "worse" than a "not-new" product. (Sometimes it is "the same", but with a few additional frills — black-light front panel, Day-Glo controls, Remote Control, etc.) The Smaller Advent Loudspeaker is really "new" — not better or worse than the original Advent. It was designed to answer a very real need — the need for a quality loudspeaker at low cost and of small size which could provide every sonic characteristic that most people associate with the best possible loudspeaker, when connected to a low-cost receiver or amplifier.

## In closed meeting RCF discusses bus system

by Evans Witt  
Staff Writer

The Residence College Federation discussed Wednesday proposals for the campus bus system and policy modifications in the Physical Plant refutations on dormitory room renovation.

RCF Chairman Steve Saunders asked a Daily Tar Heel reporter to leave the organization's regular meeting. He reported left the meeting, and Saunders discussed the meeting Thursday.

He said the "delicate nature" of some

of the discussions in the meeting was the reason he did not want the meeting reported in the campus newspaper.

"Our discussions about physical operations involved personality difficulties which had to be worked out," Saunders said.

"If the actual discussions were to be reported, it would have made the discussions less free," he added.

Saunders said the group made progress in alleviating the personality difficulties.

An involved discussion of the role of the Office of Residence Life in the physical operations of the dormitories

occupied a good portion of the meeting, according to Saunders.

He said lack of communication between residence college governors and Residence Life staff members was one of the problems pointed out in the discussion.

Closer cooperation between the governors and the residence directors of their dorms was one solution endorsed by the group, Saunders said.

Expedient residence college requests to the Physical Plant by the Residence Life office was another solution offered by the group.

An inventory of all dormitory furniture — the first of its kind — was also agreed to by the RCF, its chairman said. Several governors and Jane Poller, assistant director of the Office of Residence Life, will make the inventory.

Saunders said proposals for enlarging the campus bus system were also discussed at the meeting.

Bailey Cobbs, Student Transportation Director, and student legislator Clayton Woodard will do research into other campus bus systems and the needs on this campus. RCF will work with the two on this issue.

Woodard sponsored a bill in Student Legislature proposing a mandatory dorm room rent hike to fund an expanded campus bus system. He has withdrawn the bill until further studies can be made.

A leadership conference will be held by the RCF on October 16, according to Morrison governor Joe Grier.

The one day meeting on campus will be for residence college governors and academic lieutenant governors to discuss innovative programs for the residence units, Saunders said.

Required residency for sophomores and junior transfers was discussed, but action was deferred, Grier said.

RCF is going to wait for the results of the residency survey being conducted by Bob Kepner, Director of Residence Life, before taking any other position on the issue, Saunders said.

## Women's Week ends today

A panel discussion by prominent local women at 3 p.m. will conclude Women's Week, sponsored by the Association of Women Students (AWS).

The panel meeting in the South Lounge of the Student Union will discuss problems of women in contemporary society.

Panelists will include Paula Goldsmith of the UNC School of Social Work, Alice Welsh, member of the Chapel Hill Board of Aldermen, Mrs. Elizabeth Branson, member of Female Liberation, and Mrs. William C. Friday.

Topics for discussion will include career opportunities for women, problems of working women in modern society and the psychological dimensions of being a woman.

The panel discussion will be followed by a reception in the South Lounge.
