

## Now a car stereo that can fix flats and sharps. Panasonic Component Systems II™ with graphic equalizer.

Music from some car stereos can sound like a retread of the original. Because with most car stereos you can't fix the bass without affecting the treble. Or fix the treble without affecting the bass. Add these problems to the problems your car's interior creates and you have an acoustic condition hazardous to your music. Panasonic Component Systems II solves the problem with a 5-band graphic equalizer.

The Panasonic graphic equalizer, CJ-3600, gives you 5 separate tone controls. That's one bass and treble control for every two musical octaves. So you can change the music that sounds too flat or too sharp. And the graphic equalizer is also a power booster, giving you 30 watts of total power. So you'll have both the power and control to steer clear of the many musical bumps caused by your car's interior.

And there's a lot more to Panasonic Component Systems II. There's a stereo cassette player with auto-reverse, the CX-7200. It has a built-in 2-stage preamp and dual channel power amp for clean stereo separation. And a sensitive AM/FM stereo tuner, the CA-9600, with AFC plus local/DX and auto-stereo/mono switches. They're all designed to fit neatly under your dash.

The Panasonic Component Systems II. Also available with repeatrack cassette or 8-track. They'll give your ears one of the smoothest rides they ever had.
