

Board chief former candidate

Former North Carolina Democratic gubernatorial candidate Hargrove "Skipper" Bowles of Greensboro was unanimously elected chairman of the UNC Board of Trustees at the board's July 26 meeting held at Kill Devil Hills.

Bowles is chairman of the Board of Bowles, Hollowell, Connor, Inc., a Greensboro financial consulting firm. He succeeds Ralph N. Strayhorn of Winston-Salem as chairman of the Board of Trustees.

Newman A. "Nat" Townsend, a Raleigh attorney, succeeds Bowles as the board's vice chairman.

Margaret T. Harper of Southport, N.C. was re-elected the board's secretary. Harper, head of the Stevens Insurance Agency of Southport, has served as the board's secretary for the past several years. She also is a member of the board of directors of Carolina

Hargrove 'Skipper' Bowles

Power & Light, Blue Cross/Blue Shield and the Research Triangle Institute.

The UNC Board of Trustees consists of thirteen members. Eight are appointed by the UNC Board of Governors and four are appointed by the governor. UNC's student body president serves as an ex officio member.

The principal powers of the UNC Board of Trustees are delegated to it by the Board of Governors, which serves the 16-campus UNC system.

Man arrested after firing gun

A man was arrested by Chapel Hill police Sunday night after he fired several gunshots into the apartment building in which he lived on West Franklin Street.

Lanny Brewer, 26, of 411 W. Franklin St., was charged with possession of a stolen weapon and firing a gun into an occupied building.

Police said Brewer lost his temper, tore his door from the hinges and fired about 10 shots into the building. There were no injuries.

Brewer is being held in the Orange County Jail under \$1,000 bond.

David Hinds, Brewer's landlord, said he heard gunshots in the building. "I just didn't want anyone to get hurt, so I called the police," he said.

According to the investigating police officer, Brewer said the shooting was his way of working out his frustrations.

The gun used in the shooting was one which was stolen from a parked van in Chapel Hill about a year ago, police said.

New Vatican policy draws local reaction

By ANGIE DORMAN
Staff Writer

A recent announcement by the United States Catholic Conference allowing married Anglican priests to become Roman Catholic priests and remain married has drawn mixed reaction from area clergy.

The plan would allow Anglicans to enter the Roman Catholic Church under a "common identity" with their own Anglican liturgy while accepting Catholic doctrine.

The Rev. George Stenhouse, rector of The Church of St. Thomas of Canterbury, a dissident Anglican church in Chapel Hill, said the decision was exciting and that he would consider becoming a Roman Catholic priest.

"Rome is giving credibility to our movement (the group of Anglicans who separated from the Episcopal church)," Stenhouse said. "I would consider becoming a Roman Catholic priest although I'm not sure what

would become of my people."

The Vatican-approved plan stems from a request to enter the Catholic Church by some 1,000 individuals who broke with the Episcopal Church over the ordination of women three years ago. Some Roman Catholic priests, however, have expressed dissatisfaction with the new ruling.

"I feel very negative about the proposal," said Rev. Gerald Lewis of St. Raphael Catholic Church in Raleigh. "What bothers me is why the Anglicans want to join anyway."

The Rev. James Waters, pastor of St. Mary Mother of the Church in Raleigh, called the move liberal for the Catholic Church and said the Anglicans want to join because the Roman Catholic Church is larger and more stable.

"The proposal is a very liberal move but is only one more change that reflects a slowly changing society,"

Waters said. "The Roman Catholic Church is 10 times the size of the Anglican Church and is more stable."

"The Anglican Church accepted the gay movement and donated money to the Black Panthers and now the dissidents want to return to the stability of the Roman Catholic Church."

Anglican priests who wish to join the Catholic Church will have their requests reviewed individually. If accepted, they will not be allowed to become bishops or remarry in the case of widowhood.

"Many details remain to be worked out and the cases of priests will be reviewed on an individual basis," said Archbishop John R. Quinn of San Francisco, president of the National Conference of Catholic Bishops.

Quinn said the decision applies only to persons who, while wishing to retain some elements of Anglican tradition, fully accept Roman Catholic doctrine and the authority of the pope and bishops.

I-131 waste said not from UNC labs

A University investigation to determine the source of some low-level radioactive waste that was improperly disposed of in July has found that the waste did not come from a University research lab.

The investigation to find the source of Iodine 131, a radioisotope used in diagnostic and therapeutic work, was begun after a small amount of the waste was found in a sanitary landfill on Eubanks Road.

It has determined that the waste did not come from UNC research labs because records showed it had not been ordered recently for use in the labs.

"Our inventory lists show that no one has requested the isotope for research in several months," said Donald Wilhoit, director of the University Health and Safety Office. "It could come from a lot of places, like the hospital (North Carolina Memorial Hospital) or Duke (University)."

The isotope is given to some outpatients and could have been disposed of by someone receiving treatment, he said.

The I-131 waste was discovered when officials of the radiation protection section of the N.C. Department of Human Resources were searching for another radioisotope, Iodine 125. That waste was accidentally thrown away with regular trash from a University research lab. It has short half-life and was never found, but the I-131 was discovered.

The resources department issued a citation to the University for the loss of the I-125.

Wilhoit said there was no sure way to determine where the I-131 came from.

primarily concerned with inflation, and a tax cut is not appropriate at the time," he said. "But once inflation is under control, a tax cut makes a great deal of sense."

"I believe that steps should definitely be taken toward examining a long-term tax reform," Pfouts said. U.S. decline in productivity and America's need to reindustrialize come largely as a result of our tax system, he said.

Year 'Round Service and Supplies Plus Discount Prices Make Your STUDENT STORES HEADQUARTERS for Hewlett Packard Calculators and a complete line of accessories

PLUS 90 DAYS OVER-THE-COUNTER EXCHANGE ON ALL CALCULATORS

NOW THERE'S ENOUGH TO GO AROUND

HP-31E—Scientific. Trigonometric, exponential and math functions. Metric conversions. Fixed and scientific display modes. Full 10 digit display. 4 addressable storage registers. reg. \$50 **\$44.95**

HP-32E—Advanced Scientific with Statistics. All HP-31E functions plus math and metric capabilities. Hyperbolics. Comprehensive statistics. ENG, SCI, and FIX display modes. Decimal degree conversions. 15 addressable storage registers. reg. \$70 **\$66.95**

HP-33E—Programmable Scientific. Science, math and statistical calculator with the added clout of programmability. 49 lines of fully-merged program memory. Editing keys, control keys and a full range of conditional keys. 8 addressable storage registers. reg. \$90 **\$71.95**

HP-37E—Business Management. Best choice for a basic business/finance calculator. Features HP's unique "cash flow sign convention" to let you solve problems intuitively. Can handle Present Value, Payments and Future Value calculations simultaneously. Calculates percents, discounts, markups, Figures amortization schedules. Statistics with trend line forecasting. 5 financial and 7 addressable storage registers. reg. \$75 **\$71.95**

HP-38E—Advanced Financial with Programmability. HP's first financial programmable. All the features of the HP-37E plus a lot more power. Solves routine and sophisticated problems at the touch of a key. No previous programming experience necessary. Handles Internal Rate of Return and Net Present Value for up to 1,960 cash flows in 20 groups. 2,000 year calendar. 5 financial and 20 addressable storage registers plus up to 99 program lines. reg. \$120 **\$107.95**

HP-33C—Programmable Scientific With Continuous Memory. This entry level keystroke programmable features fundamental programming capability as well as a complete set of preprogrammed scientific functions. With 8-user storage registers and a program capacity of 49 fully-merged lines, the HP-33C's easy-to-master programmings capability can perform repetitive scientific calculations quickly and accurately. Continuous Memory. reg. \$120.00 **\$114.95**

HP-34C—Advanced Programmable Scientific With Continuous Memory. Incorporates the most advanced programming capabilities in a keystroke programmable. Designed for technical professionals and students who need the flexibility and power of advanced programmings. Includes the "Solve" and "Integrate" functions. reg. \$150.00 **\$143.95**

HP-38C—Advanced Financial Programmable with Continuous Memory. HP's most powerful financial calculator. Multitude of built-in financial functions. Easy to master programming capability. reg. \$150.00 **\$143.95**
